

Star Gold Commences Drilling at Longstreet Project

COEUR D'ALENE, Idaho, May 13th, 2013 - Star Gold Corp. ("Star Gold" or the "Company") (OTCQB: SRGZ) announces that a drill rig has been mobilized onto the Longstreet Property to commence drilling at the Main Zone.

The drill program will include 5,400 feet of reverse circulation style drilling for approximately eighteen (18) holes. These holes and their respective positions are essentially the same as those recommended in the Technical Report by Agnerian Consulting in Toronto released on February 5, 2013. The holes are outlined in the Technical Report in Table 3-1 titled "Main Zone Phase One In-Fill Recommended Drilling Program.

The Technical Report can be found on the Star Gold Corp. website at:

<http://www.stargoldcorp.com/news/LongstreetTechnicalReport2013FINAL.pdf>

The drill program is expected to be finished by end of June 2013.

Commenting on this development, President and CEO, David Segelov stated, "This drilling at the Main Zone of Longstreet enables Star Gold to in-fill those areas which lie within the proposed pit outlined in Star Gold's current Technical Report. With more than 300 holes drilled at the Main Zone, these next holes will fill in any major gaps and provide a more complete picture of what lies within the proposed pit boundaries."

About Star Gold Corp.
