## NOTES TO FINANCIAL STATEMENTS

**OCTOBER 31, 2013**

---

### NOTE 1 - NATURE OF OPERATIONS

Star Gold Corp. (the "Company") was initially incorporated as Elan Development, Inc., in the State of Nevada on December 8, 2006. The Company was originally organized to explore mineral properties in British Columbia, Canada but the Company is currently focusing on gold-bearing properties in Nevada.

The financial statement represents those of an exploration stage company whose main focus is in the exploration of gold bearing properties. The Company's main business consists of assembling and/or acquiring land packages and mining claims the Company believes have potential mining reserves, and expending capital to explore these claims by drilling, geophysical work or other exploration work deemed necessary. The business is a high risk business as there is no guarantee that the Company's exploration work will ultimately discover or produce any economically viable minerals.

### NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

#### Basis of Presentation

This summary of significant accounting policies is presented to assist in understanding the financial statements. The financial statements and notes are representations of the Company's management, which is responsible for their integrity and objectivity. These financial statements and related notes are presented in accordance with accounting principles generally accepted in the United States. The Company has not produced any revenue from its principal business and is an exploration stage company as defined by the Accounting Standard Codification (ASC) Topic 915 "Accounting and Reporting by Development Stage Enterprises". Until such interests are engaged in commercial production, the Company will continue to prepare its financial statements and related disclosures in accordance with entities in the exploration stage.

#### Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the dates of the financial statements, and the reported amounts of expenses during the reporting period. Significant areas requiring the use of management assumptions and estimates relate to asset impairments and stock option valuation. Actual results could differ from these estimates and assumptions and could have a material effect on the Company's reported financial position and results of operations.

#### Cash and cash equivalents

For the purposes of the statement of cash flows, the Company considers all highly liquid investments with original maturities of three months or less when acquired to be cash equivalents.

#### Restricted cash

Restricted cash represents collateral for bonds held for exploration permits and is presented as other long-term assets in the balance sheet.

#### Fair Value Measures

ASC Topic 820 "Fair Value Measurements and Disclosures" ("ASC 820") requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 prioritizes the inputs into three levels that may be used to measure fair value:

Level 1: Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

# STAR GOLD CORP.

(An Exploration Stage Company)

## NOTES TO FINANCIAL STATEMENTS

---

**OCTOBER 31, 2013**

---

Level 2: Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quote prices for similar assets or liabilities in active markets; quoted prices for identical assets in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3: Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

### Mining Interests and Mineral Exploration Expenditures

Exploration costs are expensed in the period in which they occur. The Company capitalizes costs for acquiring and leasing mining properties and expenses costs to maintain mineral rights as incurred. Should a property reach the production stage, these capitalized costs would be amortized using the units-of-production method on the basis of periodic estimates of ore reserves. Mining interests are periodically assessed for impairment of value, and any subsequent losses are charged to operations at the time of impairment. If a property is abandoned or sold, its capitalized costs are charged to operations.

### Equipment

Equipment are stated at cost. Depreciation of equipment is calculated using the straight-line method over the estimated useful lives of the assets, which ranges from three to seven years. Maintenance and repairs are charged to operations as incurred. Significant improvements are capitalized and depreciated over the useful life of the assets. Gains or losses on disposition or retirement of property and equipment are recognized in operating expenses.

### Reclamation and Remediation

The Company's operations are subject to standards for mine reclamation that have been established by various governmental agencies. In the period in which the Company incurs a contractual obligation for the retirement of tangible long-lived assets, the Company will record the fair value of an asset retirement obligation as a liability. A corresponding asset will also be recorded and depreciated over the life of the asset. After the initial measurement of an asset retirement obligation, the liability will be adjusted at the end of each reporting period to reflect changes in the estimated future cash flows underlying the obligation. To date, the Company has not incurred any contractual obligation requiring recording either a liability or associated asset.

### Impaired Asset Policy

The Company periodically reviews its long-lived assets to determine if any events or changes in circumstances have transpired which indicate that the carrying value of its assets may not be recoverable, pursuant to guidance established in ASC Topic 360, "Accounting for the Impairment or Disposal of Long-lived Assets". The Company determines impairment by comparing the undiscounted net future cash flows estimated to be generated by its assets to their respective carrying amounts. If impairment is deemed to exist, the assets will be written down to fair value.

### Stock-based Compensation

The Company estimates the fair value of options to purchase common stock using the Black-Scholes model, which requires the input of some subjective assumptions. These assumptions include estimating the length of time employees will retain their vested stock options before exercising them ("expected life"), the estimated volatility of the Company's common stock price over the expected term ("volatility"), employee forfeiture rate, the risk-free interest rate and the dividend yield. Changes in the subjective assumptions can materially affect the estimate of fair value of stock-based compensation. Options granted have a ten year maximum term and varying vesting periods as determined by the Board. The value of common stock awards is determined based on the closing price of the Company's stock on the date of the award.

## NOTES TO FINANCIAL STATEMENTS

**OCTOBER 31, 2013**

---

### Loss Per Share

Basic Earnings Per Share ("EPS") is computed as net income (loss) available to common stockholders divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock options and warrants.

The dilutive effect of outstanding securities for three and six months ended October 31, 2013 and 2012, would be as follows:

	<u>October 31, 2013</u>	<u>October 31, 2012</u>
Stock options	3,197,000	2,532,000
Warrants	3,929,548	6,811,793
Total Possible Dilution	<u>7,126,548</u>	<u>9,343,793</u>

At October 31, 2013 and 2012, respectively, the effect of the Company's outstanding options and common stock equivalents would have been anti-dilutive.

### Income Taxes

Deferred income tax liabilities or assets at the end of each period are determined using the tax rates expected to be in effect when the taxes are actually paid or recovered. A valuation allowance is recognized on deferred tax assets when it is more likely than not that some or all of these deferred tax assets will not be realized.

### Reclassifications

Certain reclassifications have been made to the prior period financial statements in order to conform to the 2013 presentation. These reclassifications have no effect on net loss, total assets or accumulated deficit.

### **NOTE 3 – RECEIVABLE FROM SALE OF STOCK**

As of April 30, 2013, holders exercised 2,226,667 share purchase warrants at \$0.15 per share. Proceeds of \$334,000 were received during the six months ended October 31, 2013. As of October 31, 2013, receivable from the sale of stock was \$60,000, proceeds of which were received thereafter.

### **NOTE 4 – PREPAID EXPENSES**

The following is a summary of the Company's prepaid expenses at October 31, 2013 and April 30, 2013:

	<u>October 31, 2013</u>	<u>April 30, 2013</u>
Exploration expense	\$ -	\$ 41,849
Directors and officers liability insurance	11,143	26,633
Total prepaid expenses	<u>\$ 11,143</u>	<u>\$ 68,482</u>

At April 30, 2013, exploration expense was prepaid as deposit on unbilled drilling activity. The prepaid balance was reduced as invoices were applied to ongoing drilling and exploration activities which the Company recognized as exploration expense during the six months ended October 31, 2013.

## NOTES TO FINANCIAL STATEMENTS

**OCTOBER 31, 2013**

The aggregate intrinsic value of options issued for mining interests vested and exercisable was \$31,000 based on the Company's closing price of \$0.40 per common share at October 31, 2013.

### Options issued for consulting services

As per an agreement fully executed on October 3, 2012, in consideration for consulting and advisory services rendered, the Company is obligated to issue a total of 1,000 stock options based on 5 day variable weighted-average price (VWAP) at the end of each month of the associated consulting contract. The consultant options vest on the first day of the following month of service and are exercisable for a period of six months following the termination of the agreement. The Company has estimated the fair value of these option grants using the Black-Scholes model with the following information and range of assumptions:

	For the six months ended	
	October 31, 2013	October 31, 2012

## NOTES TO FINANCIAL STATEMENTS

**OCTOBER 31, 2013**

---

The aggregate intrinsic value of consultant options vested and exercisable was \$99 based on the Company's closing price of \$0.40 per common share at October 31, 2013.

### Options issued under the 2011 Stock Option/Restricted Plan

The Company established the 2011 Stock Option/Restricted Stock Plan. The Stock Option Plan is administered by the Board of Directors and provides for the grant of stock options to eligible individual including directors, executive officers and advisors that have furnished bona fide services to the Company not related to the sale of securities in a capital-raising transaction.

The Stock Option Plan has a fixed maximum percentage of 10% of the Company's outstanding shares that are eligible for the plan pool, whereby the number of Shares under the plan increases automatically increases as the total number of shares outstanding increase. The number of shares subject to the Stock Option Plan and any outstanding awards will be adjusted appropriately by the Board of Directors if the Company's common stock is affected through a reorganization, merger, consolidation, recapitalization, restructuring, reclassification dividend (other than quarterly cash dividends) or other distribution, stock split, spin-off or sale of substantially all of the Company's assets.

The Stock Option plan also has terms and conditions, including without limitations that the exercise price for stock options granted under the Stock Option Plan must equal the stock's fair market value, based on the closing price per share of common stock, at the time the stock option is granted. The fair value of each option award is estimated on the date of grant utilizing the Black-Scholes model and commonly utilized assumptions associated with the Black-Scholes methodology. Options granted under the Plan have a ten year maximum term and varying vesting periods as determined by the Board.

On June 18, 2012 the Board of Directors authorized the grant of 1,725,000 options to purchase shares of common stock of the Company to various directors, officers and advisors. The options have an exercise price of \$0.30 based on the closing price of the Company's common stock on the date of grant and vest over one year.

On May 22, 2013 the Board of Directors authorized the grant of 675,000 options to purchase shares of common stock of the Company to various directors, officers and consultants. The options have an exercise price of \$0.29 based on the closing price of the Company's common stock on the date of grant and vest over one year.

The fair value of each option award was estimated on the date of the grant using the information and assumptions noted in the following table:

	Six months ended October 31, 2013	Six months ended October 31, 2012
Expected volatility	305.3%	276.1% to 350.2%

### NOTE 9 – STOCKHOLDERS' EQUITY

On October 4, 2013, the Company completed a private placement of its securities wherein it raised a total of \$1,100,800 (the "Offering"). The Offering consisted of the sale of "units" of the Company's securities at the per unit price of \$0.25. Pursuant to the Offering, the Company issued 4,403,200 shares of its common stock and warrants to purchase and additional 2,201,600 shares of its common stock. Warrants issued pursuant to the Offering entitle the holders thereof to purchase shares of common stock for the price of \$0.50 per share. The term of each warrant is for one year after its issuance date.

On October 31, 2013, the Company issued 20,625 shares of common stock in lieu of cash in consideration of fees for Board of Director meetings accrued through October 31, 2013. These shares were value at \$8,250 or \$0.40 per share which approximated the fair value of the shares at the date of issuance.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS AND PLAN OF OPERATION.

### CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This quarterly report and the exhibits attached hereto contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, as amended. Such forward-looking statements concern the Company's anticipated results and developments in the Company's operations in future periods, planned exploration and development of its properties, plans related to its business and other matters that may occur in the future. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

Any statement that expresses or involves discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates", or "intends", or states that certain actions, events or results "may" or "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be forward-looking statements. Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events or results to differ from those expressed or implied by the forward-looking statements, including, without limitation:

- Risks related to the Company's properties being in the exploration stage;
- Risks related to the mineral operations being subject to government regulation;
- Risks related to the Company's ability to obtain additional capital to develop the Company's resources, if any;
- Risks related to mineral exploration and development activities;
- Risks related to mineral estimates;
- Risks related to the Company's insurance coverage for operating risks;
- Risks related to the fluctuation of prices for precious and base metals, such as gold, silver and copper;
- Risks related to the competitive industry of mineral exploration;
- Risks related to the title and rights in the Company's mineral properties;
- Risks related to the possible dilution of the Company's common stock from additional financing activities;
- Risks related to potential conflicts of interest with the Company's management;
- Risks related to the Company's shares of common stock;

This list is not exhaustive of the factors that may affect the Company's forward-looking statements. Some of the important risks and uncertainties that could affect forward-looking statements are described further under the sections titled "Risk Factors and Uncertainties", "Description of Business" and "Management's Discussion and Analysis" of this Quarterly Report. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, believed, estimated or expected. The Company cautions readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Star Gold Corp. disclaims any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events, except as required by law. The Company advises readers to carefully review the reports and documents filed from time to time with the Securities and Exchange Commission (the "SEC"), particularly the Company's Annual Reports on Form 10-K, reports on Form 10-Q and Current Reports on Form 8-K.

**Star Gold Corp qualifies all forward-looking statements contained in this Quarterly Report by the foregoing cautionary statement.**

Certain statements contained in this Quarterly Report on Form 10-Q constitute "forward-looking statements." These statements, identified by words such as "plan," "anticipate," "believe," "estimate," "should," "expect," and similar expressions include the Company's expectations and objectives regarding its future financial position, operating results and business strategy. These statements reflect the current views of management with respect to future events and are subject to risks, uncertainties and other factors that may cause actual results, performance or achievements, or industry results, to be materially different from those described in the forward-looking statements. Such risks and uncertainties include those set forth under the caption "Management's Discussion and Analysis or Plan of Operation" and elsewhere in this Quarterly Report.

As used in this Quarterly Report, the terms "we," "us," "our," "Star Gold," and the "Company", mean Star Gold Corp., unless otherwise indicated. All dollar amounts in this Quarterly Report are expressed in U.S. dollars, unless otherwise indicated.

Management's Discussion and Analysis is intended to be read in conjunction with the Company's financial statements and the integral notes ("Notes") thereto included in the Company's Annual Report on Form 10-K for the fiscal year ending April 30, 2013. The following statements may be forward-looking in nature and actual results may differ materially.

### **Corporate Background**

The Company was originally incorporated on December 8, 2006 under the laws of the State of Nevada as Elan Development, Inc. On April 25, 2008, the name of the company was changed to Star Gold Corp. Star Gold Corp. is an exploration stage company engaged in the acquisition and exploration of precious metal deposit properties and advancing them toward production. The Company is engaged in the business of exploring, evaluating and acquiring mineral prospects with the potential for economic deposits of precious and base metals.

Star Gold Corp. currently leases with an option to acquire 113 unpatented mining claims (covering approximately 490 Hectares) located in the State of Nevada and known as the Longstreet Property.

The Company currently owns the rights to acquire up to a 100% mining interest (covering a total of 50 unpatented claims) in a mineral property (known as the Excalibur Property) located in the State of Nevada.

The Company has completed an initial exploration program on the Excalibur Property, which included Geological Mapping, Rock Sampling and Assaying. Based on this analysis the Company has decided to move forward with the permitting of this property and associated drilling program. The permitting was completed in June 2010 and the drilling program originally commenced the week of June 20th, 2010. The Company conducted additional drilling and exploration of the Excalibur Property which commenced in late October 2012.

On July 7th, 2010, Star Gold Corp. entered into a Property Option agreement whereby it may earn a 100% mineral interest in a Property located in the State of Nevada (approximately 300 kilometers northwest of Las Vegas) known as the Jet Property.

The Company has no patents, licenses, franchises or concessions which are considered by the Company to be of importance. The business is not of a seasonal nature. Since the potential products are traded in the open market, the Company has no control over the competitive conditions in the industry.

### **Overview of Mineral Exploration and Current Operations**

Star Gold Corp. is a mineral exploration stage company with no producing mines. Mineral exploration is essentially a research activity that does not produce a product. Successful exploration often results in increased project value that can be realized through the optioning or selling of the claimed site to larger companies. As such the Company acquires properties which it believes have potential to host economic concentrations of minerals, particularly gold and silver. These acquisitions have and may take the form of unpatented mining claims on federal land, or lease claims on private property owned by others. An unpatented mining claim is an interest that can be acquired in the mineral rights on open lands of the federal owned public domain. Claims are staked in accordance with the General Mining Law of 1872, recorded with the United States government pursuant to laws and regulations established by the Bureau of Land Management. The Company intends to remain in the business of exploring for mining properties that have the potential to produce gold, silver, base metals and other commodities.

### **Compliance with Government Regulations**

If the Company decides to continue with the acquisition and exploration of mineral properties in the State of Nevada it will be required to comply with all United States and Nevada regulations, rules and directives applicable to the exploration of minerals in the United States generally and the State of Nevada specifically.

#### *United States*

Mining in the United States generally and specifically the State of Nevada is subject to federal, state and local law. Three types of laws are of particular importance to the Company's U.S. mineral properties: those affecting land ownership and mining rights; those regulating mining operations; and those dealing with the environment.

### *Land Ownership and Mining Rights.*

On Federal Lands, mining rights are governed by the General Mining Law of 1872 (General Mining Law) as amended, 30 U.S.C. §§ 21-161 (various sections), which allows the location of mining claims on certain Federal Lands upon the discovery of a valuable mineral deposit and proper compliance with claim location requirements. A valid mining claim provides the holder with the right to conduct mining operations for the removal of locatable minerals, subject to compliance with the General Mining Law and Nevada state law governing the staking and registration of mining claims, as well as compliance with various federal, state and local operating and environmental laws, regulations and ordinances. As the owner or lessee of the unpatented mining claims, the Company has the right to conduct mining operations on the lands subject to the prior procurement of required operating permits and approvals, compliance with the terms and conditions of any applicable mining lease, and compliance with applicable federal, state, and local laws, regulations and ordinances.

Star Gold's ability to drill at the Longstreet project is dependent on approval pursuant to a Plan of Operation granted by the USFS. The current Plan of Operation (POO #04-10-12) has expired and Star Gold through its vendor Minquest has applied for a new Plan Of Operation which will determine future drilling. There is no certainty of when a new Plan of Operation will be issued.

### *Mining Operations*

The State of Nevada likewise requires various permits and approvals before mining operations can begin, although the state and federal regulatory agencies usually cooperate to minimize duplication of permitting efforts. Among other things, a detailed reclamation plan must be prepared and approved, with bonding in the amount of projected reclamation costs. The bond is used to ensure that proper reclamation takes place, and the bond will not be released until that time. The Nevada Department of Environmental Protection, which is referred to as the NDEP, is the state agency that administers the reclamation permits, mine permits and related closure plans on the Nevada property. Local jurisdictions (such as Eureka County) may also impose permitting requirements (such as conditional use permits or zoning approvals).

### *Environmental Law*

The development, operation, closure, and reclamation of mining projects in the United States requires numerous notifications, permits, authorizations, and public agency decisions. Compliance with environmental and related laws and regulations requires us to obtain permits issued by regulatory agencies, and to file various reports and keep records of the Company's operations. Certain of these permits require periodic renewal or review of their conditions and may be subject to a public review process during which opposition to the Company's proposed operations may be encountered. The Company is currently operating under various permits for activities connected to mineral exploration, reclamation, and environmental considerations. Unless and until a mineral resource is proved, it is unlikely Star Gold Corp. operations will move beyond the exploration stage. If in the future the Company decides to proceed beyond exploration, there will be numerous additional notifications, permit applications, and other regulatory decisions to be addressed at that time.

### **Competition**

Star Gold Corp. competes with other mineral resource exploration and development companies for financing and for the acquisition of new mineral properties. Many of the mineral resource exploration and development companies with whom the Company competes have greater financial and technical resources. Accordingly, competitors may be able to spend greater amounts on acquisitions of mineral properties of merit, on exploration of their mineral properties and on development of their mineral properties. In addition, they may be able to afford greater geological expertise in the targeting and exploration of mineral properties. This competition could result in competitors having mineral properties of greater quality and interest to prospective investors who may finance additional exploration and development. This competition could adversely impact on Star Gold Corp.'s ability to finance further exploration and to achieve the financing necessary for the Company to develop its mineral properties.

The Company provides no assurance it will be able to compete in any of its business areas effectively with current or future competitors or that the competitive pressures faced by the Company will not have a material adverse effect on the business, financial condition and operating results.

### **Office and Other Facilities**

Star Gold Corp. currently maintains its administrative offices at 611 E. Sherman Avenue, Coeur d'Alene, ID 83814. The telephone number is (208) 664-5066. In September 2011 the Company relocated its offices, from Post Falls, Idaho, but continues to rent office space from Marlin Property Management, LLC ("Marlin") which is a single member limited liability company owned by the spouse of Lindsay Gorrill; the Company's Chairman of the Board. This office space consists of approximately 400 square feet, and the Company currently leases the space at the monthly rental rate of \$2,500. Star Gold Corp. does not currently own any physical or real property.

### **Employees**

The Company has no employees other than its executive officers and directors as of the date of this Quarterly Report on Form 10-Q. Star Gold Corp. conducts business largely through agreements with consultants and arm's length persons.

### **Research and Development Expenditures**

The Company has not incurred any research expenditures since incorporation.

### **Reports to Security Holders**

The Registrant does not issue annual or quarterly reports to security holders other than the annual Form 10-K and quarterly Forms 10-Q as electronically filed with the SEC. Electronically filed reports may be accessed at [www.sec.gov](http://www.sec.gov). Interested parties also may read and copy any materials filed with the SEC at the SEC's Public Reference Room at 450 Fifth Street NW, Washington, DC 20549. Information may be obtained on the operation of the Public Reference Room by calling the SEC at (800) SEC-0330.

### **PLAN OF OPERATION**

The Company maintains a corporate office in Coeur d'Alene, Idaho. This is the primary administrative office for the company and is utilized by Company Chairman Lindsay Gorrill and Chief Financial Officer Kelly Stopher.

The Company's plan of operations for the next twelve months, subject to funding, and the availability of contractors, is as follows:

- Continue the advance exploration and pre-development program for the Longstreet Project.
- Initiate metallurgical studies to further determine the leachability of the gold/silver mineralization.
- Continue to work with potential joint venture or capital partners to advance the project into the next phase of exploration and pre-production goals.
- Update technical resource report to reflect most recent drilling program.
- Initiate a technical study which focuses on the economic viability of the outlined pit.

#### ***Drilling Highlights – Main***

The 2013 drilling program was designed to infill drill positions of the Main Zone which were not captured in the calculations of the Technical Report dated December 2012 issued by Agnarian Consultants. Four (4) holes of the twenty holes drilled during the 2013 drilling program were outside the proposed pit area outlined in the February 2013 Technical Report Highlights. Highlights of the drilling include:

Highlights of the drilling results can be found on the Star Gold website at <http://www.stargoldcorp.com/news/2013-08-28.php>.

The plan map can be found at <http://www.stargoldcorp.com/news/LSMain2013DrillingMap.pdf>.

The drilling table can be found at <http://www.stargoldcorp.com/news/LSMain2013DrillingTable.pdf>.

At October 31, 2013, the Company had \$1,008,288 cash on hand, and working capital of \$1,065,949 with no revenue. As such, the Company will likely require additional financing at some point in the future in order to meet current obligations and to continue our

Management believes it can source additional capital in the investment markets in the coming months and years, but currently, Star Gold Corp. does not have any financing arrangements in place and there are no assurances that it will be able to obtain sufficient financing on terms acceptable to the Company, if at all. The Company may also consider other sources of funding, including potential mergers or farm-out a portion of its exploration properties.

Future liquidity and capital requirements depend on many factors including timing, cost and progress of the Company's exploration efforts. The Company will consider additional public offerings, private placement, mergers or debt instruments.

Additional financing will be required in the future to complete planned exploration projections and expand operations to the production stage. The Company is unsure whether additional financing will be available at the time needed or at on acceptable terms, if at all. If the Company is unable to raise additional financing when necessary, it may have to delay exploration efforts or property acquisitions, or be forced to cease operations. Collaborative arrangements may require the Company to relinquish rights to certain of its mining claims.

## RESULTS OF OPERATIONS

The Company has earned no revenue from operations in 2013 or 2012 and does not anticipate earning any revenues in the foreseeable future. Star Gold Corp. is an exploration stage company and presently is seeking other business opportunities.

Claims	-	27,879	27,115	36,502
<b>Total mineral exploration expense</b>	<b>\$ 54,955</b>	<b>\$ 493,528</b>	<b>\$ 516,296</b>	<b>\$ 658,975</b>

Mineral exploration expense for the three months ended October 31, 2013 was \$54,955 a decrease of \$438,573 over the three months ended October 31, 2012 expense of \$493,528. The decrease in exploration expense is a result of performing and completing the Company's primary drilling and exploration program earlier in the year than in the prior comparable period.

The Company expects an increase in technical consultants' expense during the upcoming fiscal quarter ending January 31, 2014 resulting from an updated technical resource report and a scoping study related to the cost-analysis and timeline related to construction of a heap leach pad.

SUMMARY OF LEGAL AND PROFESSIONAL FEES	Three months ended October 31,		Six months ended October 31,	
	2013	2012	2013	2012
Audit and accounting	\$ 7,789	\$ 14,551	\$ 35,317	\$ 30,143
Legal fees	6,198	15,580	14,366	46,536
Public company expense	4,958	1,240	5,963	6,815

<b>Total legal and professional fees</b>	<b>\$ 70,063</b>	<b>\$ 41,103</b>	<b>\$ 108,260</b>	<b>\$ 94,565</b>

Legal and professional fees decreased \$9,382 for the three months ended October 31, 2013 from the three months ended October 31, 2012. Audit and accounting fees for the three months ended October 31, 2013, decreased \$6,762 compared to the three months ended October 31, 2012. The Company expects its audit and accounting fees for the subsequent fiscal quarter to remain relatively constant. Investor relations expense increased \$41,386 for the three months ended October 31, 2013 over comparable period ending October 31, 2012, as a result of capital raising activities. Consequently, the Company closed a private placement during the quarter for \$1,100,800 which will be used for ongoing exploration and general corporate purposes.

SUMMARY OF MANAGEMENT AND ADMINISTRATIVE EXPENSES	Three months ended October 31,		Six months ended October 31,	
	2013	2012	2013	2012
Auto and travel	\$ 16,226	\$ 21,782	\$ 21,917	\$ 27,955

<b>Total management and administrative expenses</b>	<b>\$ 177,575</b>	<b>\$ 287,666</b>	<b>\$ 269,053</b>	<b>\$ 580,203</b>

Management and administrative expenses for the three months ended October 31, 2013 decreased \$110,091 to \$177,575 compared to 2012 expense of \$287,666, resulting primarily from reduced stock option expense in the current quarter.

Management fees and payroll of \$55,129 for the three months ended October 31, 2013, decreased \$30,380 compared to the three months ended October 31, 2012. The Company anticipates an increase in payroll for the quarter ending January 31, 2014 in order to compensate its President who has foregone compensation for the past year.

## CASH FLOWS

	Three months ended October 31,	
	2013	2012
Cash flow used by operating activities	\$ (432,083)	\$ (722,568)
Cash flow used by investing activities	(14,000)	(12,986)
Cash flow from financing activities	1,100,800	536,734
Net decrease in cash during period	\$ 654,717	\$ (198,820)

The Company increased total assets to \$1,496,799 at October 31, 2013 compared to \$1,162,378 at April 30, 2013, primarily as a result of cash expenditures related to exploration activities on the Longstreet Property and the completion, in October 2013, of a private placement of its securities.

Mining Interests (Note 5) increased from \$362,999 at April 30, 2013 to \$376,999. Prepaid expenses decreased from \$68,482 at April 30, 2013 to \$11,143 at October 31, 2013 due to deposits required on exploration activities at the Longstreet Property being utilized for exploration activities at the property.

At October 31, 2013, the Company had working capital of \$1,065,949 primarily as a result of a cash balance of \$1,008,288.

The Company utilized \$14,000 in cash from Investing Activities on certain annual lease payments on capitalized mineral assets at its Longstreet, Jet and Excalibur projects for the six months ended October 31, 2013 per the terms of Property Option Agreement described in Note 5 of the Financial Statements. The Company is in compliance with all obligations of the Property Option Agreements.

As of October 31, 2013, the Company had cash of \$1,088,288. Since inception, the sources of the Company's financing have been through offerings of its equity and debt securities. Star Gold Corp. has not attained profitable operations and its ability to pursue any future plan of operation is likely dependent upon our ability to obtain additional financing in the future.

Star Gold Corp. anticipates continuing to rely on offerings of its debt and/or equity securities in order to continue to fund business operations. Issuances of additional equity securities will result in dilution to the Company's then existing stockholders. The issuance of additional debt securities will likely result in the reduction of the amount of cash available to the Company to utilize in its ongoing operations and may also result in dilution to the Company's then existing stockholders. There are no assurances that the Company will be able to complete any additional offerings of its securities or that it will be able to arrange for any other type of financing to fund its ongoing business activities.

Disruptions in the credit and financial markets over the past several years have had a material adverse impact on a number of financial institutions and have limited access to capital and credit for many companies. The prices for gold, silver and other base metals have also recently been subject to fluctuations which have had a material adverse impact on mining related companies' ability to raise capital. These disruptions could, among other things, make it more difficult for the Company to obtain, or increase the cost of obtaining, capital and financing for operations. Access to additional capital may not be available to terms acceptable to the Company or at all.

The Company's continuation as a going concern is dependent upon its ability to generate sufficient cash flow to meet its obligations on a timely basis, to obtain additional financing as may be required, or ultimately to attain profitability. Potential sources of cash, or relief of demand for cash, include additional external debt, the sale of shares of the Company's stock or alternative methods such as mergers or sale of the Company's assets. No assurances can be given, however, that the Company will be able to obtain any of these potential sources of cash. The Company currently requires additional cash funding from outside sources to sustain existing operations and to meet current obligations and ongoing capital requirements.

The Company's plans for its long term continuation as a going concern include financing future operations through sales of our common stock and/or debt and the eventual profitable exploitation of the Company's mining properties. These plans may also, at some future point, include the formation of mining joint ventures with senior mining company partners on specific mineral properties whereby the joint venture partner would provide the necessary financing in return for an interest in our properties and/or any minerals we may produce in the future.

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We do not hold any derivative instruments and do not engage in any hedging activities.

#### **ITEM 4.CONTROLS AND PROCEDURES.**

##### **Conclusions of Management Regarding Effectiveness of Disclosure Controls and Procedures**

At the end of the period covered by this report, an evaluation was carried out under the supervision of and with the participation of the Company's management, including the President and Chief Executive Officer, David Segelov ("President/CEO") and Chief Financial Officer, Kelly J. Stopher ("CFO"), of the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Rule 13a - 15(e) and Rule 15d - 15(e) under the Exchange Act). Based on that evaluation the President and the CFO have concluded that as of the end of the period covered by the report, the Company's disclosure controls and procedures were adequately designed and effective in ensuring that (i) information required to be disclosed by the Company in reports that it files or submits to the Securities and Exchange Commission under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and (ii) material information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our management, including the Company's President and CFO, as appropriate, to allow for accurate and timely decisions regarding required disclosures.

##### **Changes in internal controls over financial reporting**

There have been no material changes in internal controls over financial reporting during the quarter ended October 31, 2013.

## **PART II - OTHER INFORMATION**

#### **ITEM 1.LEGAL PROCEEDINGS**

Star Gold Corp. is not a party to any material legal proceedings and, to management's knowledge, no such proceedings are threatened or contemplated. No director, officer or affiliate of Star Gold Corp. and no owner of record or beneficial owner of more than 5% of our securities or any associate of any such director, officer or security holder is a party adverse to Star Gold Corp. or has a material interest adverse to Star Gold Corp. in reference to pending litigation

##### **ITEM 1A. RISK FACTORS**

There have been no material changes from the risk factors as previously disclosed in our Form 10-K for the year ended April 30, 2013 which was filed with the SEC on July 30, 2013.

#### **ITEM 2.RECENT SALES OF UNREGISTERED SECURITIES**

On October 4, 2013, the Company closed a private placement in which it issued a total of 4,403,200 shares of common stock and warrants to purchase an additional 2,201,600 shares to a total of 14 investors, raising a total of \$1,100,800. The warrants issued entitle the holder thereof to purchase shares of the Company's common stock for the price of \$0.50 per share and expire twelve (12) months after their issuance date. Shares were issued in reliance on Section 4(2) of the Securities Act of 1933 and Rule 506 of Regulation D.

#### **ITEM 3.DEFAULTS UPON SENIOR SECURITIES**

None

#### **ITEM 4. - MINE SAFETY DISCLOSURES**

Pursuant to Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act"), issuers that are operators, or that have a subsidiary that is an operator, of a coal or other mine in the United

States are required to disclose in their periodic reports filed with the SEC information regarding specified health and safety violations, orders and citations, related assessments and legal actions, and mining-related fatalities. The Company is in the exploration stage and has no operations.
