Fostering disruptive technologies and solutions for women's health
In order to give more visibility to FemTech and to accelerate innovation, Groupe Mutuel, one of the leaders in health insurance in Switzerland, has joined forces with the best innovation hub in Switzerland, the EPFL Innovation Park.

Together, we want to attract and promote the best solutions in FemTech and give them an opportunity to test their market, finance themselves, or better, co-create together.

More than any other healthcare domain, FemTech innovations must be supported to foster more effective prevention and treatments for women’s health.

It is a cause, and we would like you to join us.

Lan Zuo Gillet, EPFL Innovation Park
Nicolas Loeillot, Group Mutuel
Co-Directors and founders of the initiative
Releasing the power and well-being of half the planet's population

Women have been historically underserved in healthcare, as modern medicine has been built on a one-size-fits-all approach that considered men as the main parameter for health-related solutions. Having being excluded from clinical trials for so long, women have to deal with many unresolved health issues, as well as with the consequences of inadapted treatments to this day.

Yet, many studies show that because of their longer life expectancy and their tendency to seek out more preventive care, women actually spend more than men on their healthcare. On the other hand, more and more corporates are aware of the importance of the well being of their growing percentage of female work force throughout their biological life cycles.

As an established Health insurance company determined to improve health condition of 50% of the population, Group Mutuel launched this Femtech initiative together with EPFL Innovation Park, to further foster innovation in this sector and help start-ups offering disruptive FemTech solutions to go to market and accelerate their growth.
FemTech on the rise

FemTech (or female technology) is a term applied to an emerging industry that includes a broad range of technologies dedicated to the improvement of women's health and wellbeing. This sector includes solutions in many areas, including fertility & pregnancy, women's sexual wellness, women's medicine, female oncology, period health, menopause and mental health.

With the rapid rise and early successes of start-ups dedicated to women's health, FemTech is becoming a hot topic and a promising asset class for investors. In 2019, the global FemTech market generated $820.6 million, with a market value estimated to be worth $50 billion by 2025 (Frost & Sullivan).
Tech4Eva
The first Swiss program in field of FemTech

Tech4Eva is an equity-free virtual accelerator program on a mission to create an innovation platform in Switzerland, where disruptive start-ups and projects from around the globe develop innovative solutions for improving or advancing technologies relating to women’s health and achieving respective growth.

The vision of the organization is to build a global FemTech community by connecting all stakeholders in different markets active in the sector.
Tech4Eva’s 9-month acceleration program consists of multi-layer activities, such as mentorship by corporate experts, specialized workshops, roadshows, peer-to-peer experience, training sessions, experts event series, as well as focus groups for:

**Growth-stage start-ups**

Tech4Eva assists selected companies in their business development through workshops, mentorship and peer-to-peer sessions, strengthen their market visibility through public roadshows events and connects them with potential customers and investors, by leveraging the network of the EFPL Innovation Park and its other partners.

**Early-stage start-ups & projects**

Tech4Eva helps selected companies and projects to refine and validate their business models and go-to-market process strategy through training sessions and personalized coaching, as well as develop pilot projects with potential business partners.

**FemTech community**

Tech4Eva organizes a series of networking and knowledge-sharing events, such as roadshows, expert talks and focus groups. Various field specialist are invited to share their experiences, insights and recommendations and discuss how their field knowledge is (or can be) applied to specific femtech-related cases.
2021 Program activities

Through the community that the program aims to build, Tech4Eva supports the growth of the start-ups in the program and the development of ideas from innovators through its focus groups with: monthly peer-to-peer sessions for growth-stage start-ups, 6 training sessions for early-stage start-ups, 8 start-up workshops, recurring mentor meetings, 4 focus groups and various community events.

6 The Tech4Eva program
Training Sessions

1. Market Analysis & Value Proposition
2. Building a strong team
3. IP Protection
4. Product Development & Go-To Market Strategy
5. Financial Planning
6. Final presentation to jury

Community Workshops

1. Introduction to the Swiss health system
2. How to crack the press game
3. Presentation skills
4. Swiss ecosystem and how to work with pharma
5. Regulatory pathway
6. Financing
7. Where to play? Market opportunity navigator
8. Sales & Marketing in the health sector
The objective of the Focus Groups in the Tech4Eva program is to foster collaborations between start-ups, experts and corporates for the co-development of shared solutions in FemTech. Through an open-innovation approach that leverages a data federation system, Tech4Eva aims to bring concrete points of data and sources of investment for all stakeholders that work for improving women's health and wellbeing.

2021 Selected Areas

- Prevention & Wellness
- Pregnancy & Post-partum
- Fertility
- Menopause, Period Health & Incontinence
Prevention & Wellness

The Prevention & Wellness Focus Group explores open innovation in the context of prevention and wellness. It is open for start-ups, corporate or expert developing solutions in the area of prevention and wellness to co-create solutions through an open innovation approach over 6-months.

**LEADERS**
- Marco Rüedi (EPFL Innovation Park)
- Ksenia Tugay (Groupe Mutuel)
- Jihyun Lee Engler (Groupe Mutuel)

**GOALS**
- Explore open innovation in the context of Prevention & Wellness
- Identify pain points from start-ups, corporates and other stakeholders in the field and facilitate interaction between them
- Design a path for optimizing future collaborations

Pregnancy & Post-partum

This Focus Group is aimed at tackling issues, challenges, and opportunities in the domains of pregnancy and post-partum. It is a virtual space to discover the technology and scientific solutions addressing pressing health issues and to connect with experts, innovators, researchers and people who have an interest in this domain.

**LEADERS**
- Douglas Haggstrom (Innovation Office, University of Basel)
- Laura Rio (Medical Scientist)

**GOALS**
- Understand the pregnancy patient journey
- Identify corporate engagement opportunities in the domain
- Develop messaging strategies for positioning of pregnancy start-ups
Fertility: the Unspoken Journey

This Focus Group wants to revolutionize the current patient journey of fertility and infertility, by breaking the silence around the topic and empowering women through the ultimate awareness generation toolkit. It is addressed to companies, counsellors, specialists and representatives of specific patient groups.

LEADERS

Haider Alleg
(Ferring Pharmaceuticals)

Marzia Massignani
(vVardis)

GOALS

Awareness and call to action generation

Design a more fluent journey from diagnostic to success

Build a collaboration framework of all stakeholders

Menopause, Period Health & Incontinence

By 2025, 1 billion women will experience menopause (12% of the world’s population), which corresponds to a $600 billion spending opportunity. The urinary incontinence market will reach USD 3.93 billion by 2026. This Focus Group aims at connecting top industry experts, as well as co-creating joint solutions for these markets with corporates, start-ups and field experts through an open innovation approach.

LEADER

Marta Gehring
(Swiss Biotech Association)

GOALS

Create a learning community

Better understand target consumers

Help refine product-market fit

Drive investor interest
Focus Groups Meetings

Focus Group meetups are open innovation platforms for experts in the vertical areas - researchers, medical professionals, corporate specialist and start-ups founders to meet and to identify unmet needs and to join forces to develop new solutions.

Overseen by Ksenia Tugay, the 4 focus groups aims to deliver, for 2021, an overview of the state of the art of new solutions in the four verticals and identify potential new solutions to develop.

110 applications for the 2021 program

We encourage women to launch their ideas

Only a small percentage of global start-ups are led by female founders. Our application process counts more than 65% of start-ups and early-stage projects founded or co-founded by women.
The 2021 start-up selection

From a total of 110 applications, 15 growth-stage start-ups and 15 early-stage start-ups and projects have been selected for the 2021 program. The international cohort is mainly represented by Swiss-based, UK-based and French-based entrepreneurs, the majority of which focuses their solutions in the areas of Fertility & Pregnancy and Women's Wellness and Medicine.

**Sector** Fertility & Pregnancy  
**Solution** Medical Devices

At ASPIVIX, we innovate women’s care as we believe it’s about hefty time for gentler and more modern gynaecology! We create a new generation of medical instruments, eliminating pain and bleeding, for millions of women every year. CAREVIX is a single-use medical instrument designed to replace the traumatic tenaculum which is nowadays a standard of care in millions of gynaecological procedures. CAREVIX allows gentle handling of cervix for all procedures requiring an access to the uterus in gynaecology.

www.aspivix.com
Carbomed Medical Solutions is an Austrian female empowerment tech start-up on a mission to break the taboo which surrounds speaking out about trying to conceive and cycle tracking. breathe ilo is the world’s first fertility tracker that uses breath analysis to identify a woman’s ovulation pattern and fertile window in a way that is easy, comfortable and within one minute. It is a small handheld device synced to an app that reads the breath’s CO2 saturation to determine where a woman is in her cycle with incredible accuracy and can be done at any time of the day.

“The Tech4Eva accelerator program is a great opportunity to build a network within the Femtech space. I appreciate the great selection of exceptional leaders, founders, mentors and investors. Through the program I got access to particularly valuable knowledge, which brings our start-up to the next level”

Lisa Krapinger
CMO

By 2025, there will be 1.1 BN women in menopause, suffering from hotflashes. EmbrLabs has harnessed the body’s response to temperature via a wrist-worn bracelet to dramatically affect the impact of menopause symptoms.

www.embrlabs.com

The Tech4Eva program has been an invaluable platform for Embr Labs to not only connect with industry experts and mentors, but to stay abreast of cutting edge trends and technologies in Femtech.”

Elizabeth Gazda
CEO and founder

Selected growth-stage start-ups
Fizimmed develops connected medical devices for women. 1 woman in 10 is suffering of urinary leaks. Recommended by health professionals, Emy is a connected device to strengthen pelvic floor. Emy allows any woman to do Kegel exercises at home.

www.fizimed.com

Gals Bio is leveraging the monthly menstrual secretions to monitor and screen women health from the comfort of home with the accuracy of a lab.

www.galsbio.com

GynTools' revolutionary 5 minute vaginitis diagnostics is replacing current long turnarounds & misdiagnosis. Our solution is disrupting a multi $B market. GYNI allows for correct (>90%) diagnosis within minutes, from a single swab. The system has 4 elements- a smart sample collector, a scanner, web based user interface and a cloud, deep learning based algorithm that analyze the data from the scanner and send back results within seconds.

www.gyntools.com
Metabolomic Diagnostics is a deep-tech company specialized in the development of novel biomarker-based diagnostic solutions for complex diseases. Metabolomic Diagnostics current focus is on pregnancy health, including laboratory test for screening for Preeclampsia risk early in pregnancy.

www.metabolomicdiagnostics.com

The Tech4Eva acceleration program is well planned and well done. The mixture of group discussions, test cases, personal mentoring and roadshows is well blended and gives a great opportunity to learn and make a progress while receiving relevant information from the Tech4Eva team and lecturers. The program managers & mentors show real involvement and care. We participated in several acceleration programs before, and this one stands above others, with extraordinary intensity and outcomes"
MOMM Diagnostics is developing a fast and precise point of care test for preeclampsia - a dangerous pregnancy condition. Our technology will assist doctors on-site to save the lives of mothers and babies. MOMM Diagnostics' novel patented point of care technology allows the quantification of low-abundant biomarkers from a single drop of the mother's blood. MOMM's rapid preeclampsia test aims at reliable and early-stage molecular diagnosis of PE during doctors’ visits, using low-cost single-use cartridges and a hand-held reader.

www.mommdiagnostics.com

Muvon is a biotech spin-off from UZH with the mission to advance cell therapies for skeletal muscle regeneration, with female stress urinary incontinence as first indication.

www.muvon-therapeutics.com

Preglife is a HealthTech company focused creating the best pregnancy- postpartum and baby app. Preglife's mission is to maximize the conditions for all parents to be. You follow the development during the pregnancy, post partum period and toddler up to 2 years. We are now in the process of developing personalized content and programs to the user based on her medical history and current symptoms and mood.

www.preglife.com
A spin-off of the University of Geneva taking care of sexual health by making accurate testing easy and accessible, no matter who you are, or where you are.

www.testmatehealth.com

Contrelle Activgard is a Class IIa medical device for female stress urinary incontinence. It is a disposable and discreet bladder support which is designed to stop leaks before they happen.

www.contrelle.com

WOOM is a women’s health tracker, assisting women during the different stages of their lives: tracking cycles and prevention, trying to conceive, pregnancy, postpartum up to menopause. It's all about data science, we collect+100 parameters of user’s lifestyle, cycle, health and biometrics data to provide personalized recommendations, empowering women to make the right decisions about their reproductive health through a robust set of data and technology based on neural networks & machine learning.

www.woomhealth.com

Tech4Eva has a very strong ecosystem of mentors, academics, investors, and businesses in women’s health. This is key for WOOM to internationalize the company for global reach and impact at scale.”

## Impact of the program - progress of growth start-ups

| **Aspivix** | Fundraising CHF 5M round. Got into contact with a distributor in Japan through Tokyo Roadshow. |
| **Annaida** | Received EU grant of CHF 1.75M and fundraising additional CHF 4M. Finished the proof of concept study with Cow embryon. |
| **Breathe ilo (carbomed)** | Valuation €15M pre-money, fundraising €5-6M Series A |
| **Embr Labs** | About to close fundraising round $20M B1 round and launched its Wave 2 model (on Rollingstone magazine Essential list) |
| **Fizimed** | Major corporate partnership deal signed with Essity (12 billions€/year, brands Nana, Lotus, Okay, Tena etc...) |
| **Galsbio** | Fundraising $6M, time to market 3 yrs |
| **Gyntools** | Fundraising $7-10M A Round |
| **Impli** | Got 15 contacts from mentor from Merck for commercialisation. Still fund raising and going through due diligence process |
| **Metabolomic Diagnostics** | First revenues, CLIA Lab partnership MOU Q3 2021, fundraising €8M |
| **Momm diagnostics** | Through Tech4Eva Program, the company is getting visibility. Still in technology development, hope to finish pilot project by 2022 |
| **Muvon Therapeutics** | Fundraising CHF15M Series A and preparing for kickoff of phase 2 clinical trials |
| **Preglife** | Acquired Bej Technologies, 4.8 star rating in app store |
| **Testmate** | Raised $1.5M and doing product validation, have done 80 testings |
| **Viveca Biomed** | Launched Contrelle brand – sold Walgreens Aliance boots |
| **Woom** | Q2 2021 €2M bridge towards new fundraising round €5-8M |
The EPFL Innovation Park
A pole of innovation as Tech4Eva's birth house

The EPFL Innovation Park supports disruptive innovations and the transfer of technologies of the prestigious Ecole polytechnique fédérale de Lausanne (EPFL) and other regional academic partners, by providing flexible office space, training, acceleration and coaching services. Building a true sense of community, the Park is devoted to housing start-ups, SMEs, research teams and innovation cells from major companies that operate in fields as diverse as information technology, computing, health and nutrition, engineering, transport, telecommunications or materials.

In constant evolution since it was founded in 1991, EPFL Innovation Park currently houses 14 buildings with access to various laboratories and cutting-edge research, hosting over 150 start-ups, 26 large companies and around 20 services providers. The vibrant campus provides a unique environment to a large network of dynamic entrepreneurs and established companies for exchanging ideas and knowledge.
Groupe Mutuel is Tech4Eva's main sponsor and is one of the leading personal and health insurance companies in Switzerland: more than 1.3 million private customers and close to 24’000 companies rely on the insurer every day. In addition to compulsory health insurance (LAMal/KVG) and supplemental insurance (LCA/VVG), customers can choose from an extensive range of life insurance plans to cover risks and provide for their individual retirement benefits, as well as from a range of patrimony insurance solutions. Moreover, Groupe Mutuel insurers provide daily allowance insurance to companies, pursuant to LAMal/KVG and LCA/VVG, as well as compulsory accident insurance (LAA/UVG). Groupe Mutuel also manages Groupe Mutuel Prévoyance-GMP pension fund.
Network partners:

The Embassy's Swissnex team is part of the Swiss global network connecting Switzerland and the world in education, research and innovation. Our mission is to support the outreach and active engagement of partners in the international exchange of knowledge, ideas and talent. We thereby contribute to strengthen Switzerland's profile as a world-leading science and innovation hotspot.

FemTech Analytics (FTA) is a strategic analytics agency focused on relatively young yet already treated as the next big market disruptor FemTech market, which embraces the cornerstone subsectors such as Longevity for women, Mental Health & Healthy Lifestyle, Reproductive Health, and General Healthcare. The range of activities includes research and in-depth analysis on major areas of high potential in the FemTech industry, maintaining profiling of companies and governmental agencies based on their innovation potential and business activity, and providing consulting and analytical services to advance the FemTech sector.

Fermata accelerates the development of the FemTech ecosystem and a community that celebrates diversity in society. Create a place for women to share their concerns and issues related to their bodies Curate FemTech products from around the world and provide solutions in Asia.

Ferring Pharmaceuticals is a research-driven, specialty biopharmaceutical group committed to helping people around the world build families and live better lives. Ferring is a leader in reproductive medicine and maternal health, and in specialty areas within gastroenterology and urology.

Joyance Partners is the first venture fund focused on finding and growing new companies that deliver Delightful Moments derived from science. Delightful Moments are part of all human experience: the small, but powerful, separations from the daily humdrum when we feel stronger, calmer, more joyful, more in control, more distant from pain and anxiety.

Women of Wearables (WoW) is a leading global organisation aiming to inspire, connect, and support women and allies in emerging technologies such as wearable tech, IoT, health tech, and everything in between.

Swissnex is Switzerland's Science and Technology global network connecting Switzerland and the world in education, research and innovation. Swissnex's mission is to support the outreach and active engagement of our partners in the international exchange of knowledge, ideas and talent. Swissnex is the launchpad for Swiss startups going global. Our equity-free startup programs are customized to the needs of entrepreneurs exploring or entering the UK market, and we co-create programs and provide services to other Swiss innovation partners.
