**Action for Spent Fuel Solutions Now** is a new group of local governments, elected officials, utilities, environmental groups, labor leaders, Native American leaders, business organizations and other community members who support the relocation of spent nuclear fuel to a federally licensed facility away from our coastline. This is the first step forward to take action. Our founding members include representatives from the County of Orange, County of San Diego, Southern California Edison (SCE), San Diego Gas & Electric and the City of Riverside.

**WHAT WE DO**

Our goal is to encourage the federal government to provide off-site storage and/or permanent disposal solutions for the spent nuclear fuel at the San Onofre Nuclear Generating Station (SONGS) and other nuclear sites across the state and nation, with input from stakeholders and engaged communities. SCE retired SONGS in 2013, but spent nuclear fuel continues to be stored on site with nowhere to send it.

**WHY ACTION IS NEEDED**

Under the Nuclear Waste Policy Act, the federal government was required by law and executed contracts with nuclear power providers to begin taking possession of and disposing spent nuclear fuel back in 1998. Today – more than two decades later – it has not yet fulfilled its legal and contractual obligations. Spent nuclear fuel can be safely stored on site at SONGS for decades, but SCE cannot complete decommissioning of the plant and restore the land until the federal government takes action to facilitate an off-site solution.

- **100%** of SONGS spent fuel in canisters designed for storage and transportation
- **102 of 123** spent fuel canisters at SONGS ready for transport now
- **4** spent nuclear fuel dry storage sites in California
- **19** on-site dry storage facilities at retired U.S. nuclear power plants
- **35** states with at least some spent fuel stored at plant sites

Take action today! Join the coalition at [spentfuelsolutionsnow.com](http://spentfuelsolutionsnow.com).
