The nature and method of the proposed pigment (tattoo) lightening procedure has been explained to me including risks and/or possibility of complications during or following its performance. I understand there may be a certain amount of discomfort or pain associated with the procedure and that the other adverse side effects may include: minor and temporary bleeding, bruising, redness or other discoloration and swelling. Fever blisters may occur on the lips following lip procedures in individuals prone to this problem. Secondary infection in the area of the procedure may occur, however if properly cared for, this is rare.

(Initial)

I understand that several treatments may be needed in order to attempt to achieve my desired results. However, I have not received any guarantees to the quality of the outcome of the process.

\_\_\_\_\_

I understand there are medical options available for pigment (tattoo) lightening/removal. I have decided to decline those methods.

\_\_\_\_\_

I understand that the unwanted pigment may not be successfully lightened to the point that it can no longer be seen. Scarring as hyper-pigmentation or hypo-pigmentation, discoloration or other damage to the skin may occur during this process and may be permanent. This is rare but it can happen. I will not hold my technician, the Girlz Ink Studio and/or the distributor/manufacturer of tattoo removal products used in this attempted pigment (tattoo) lightening or removal liable for any damages that may occur to my person.

\_\_\_\_\_

I understand there will be no refunds if the desired lightening result is not achieved.
