NSW Grant for Honey Research Successful

EVE Investments (ASX:EVE), an ASX-listed technology investment company, is pleased to provide an update on Meluka Health, a Company it is acquiring a 50% interest in.

Award of TechVouchers Grant

Meluka Health is pleased to announce that an application for a NSW TechVoucher grant to support the Bee Health and honey research program has been successful. TechVouchers is a program where SMEs can be connected with an expert in a relevant field of research and embark on an innovative joint research project. The program also enables access to high tech instruments and facilities that would otherwise be difficult to access. TechVouchers are awarded on a competitive basis to eligible NSW companies for amounts up to \$15,000. All funding must be matched in cash by the SME.

The grant will be used to support the current research project that is testing the therapeutic value of Meluka Honey. In addition, the research is evaluating the impact on European honey beehives of bees pollenating on tea trees and the potential for bacterial disease prevention for these bees. It is thought that the incorporation of Meluka Health's melaleuca tea tree extract into hives may bring improvements in hive cleanliness and disease prevention.

About Meluka Health

Meluka Health is a wellness and nutrition company that develops and sells its naturally derived, organic and ecologically pure products created using its old growth Australian Melaleuca tea tree plantation which are worldly acclaimed for their medicinal activity. Meluka Health is currently focused on producing high quality organic medicinal honey and the development of a bee health tonic.
