Question	Response	Where to find more information
----------	----------	--------------------------------

- Technology development and commercialisation risk - a significant risk of investing in technology start-ups (such as Omniblend Innovation Pty Ltd) is whether the technology company can relevantly develop and successfully commercialise its technology. A failure to achieve commercialisation of relevant technologies may have a significant adverse impact on the Company's business model, operating results and financial position.
- Early stage investments - the investments of the Company are intended to be in early stage opportunities which may involve seed capital in unlisted companies. Such investments are in the nature of high risk and high reward. Investments in any unlisted companies are generally illiquid and may prove difficult to sell prior to such a company achieving listing on a stock exchange and may further be subject to escrow restrictions upon listing.
- Reliance on key personnel - The Company's success largely depends on the core competencies of its Directors and its ability to retain these people. The Board of Directors makes decisions on investment strategy and investments and there is no separately designated manager or investment committee. The Company further relies on the key personnel of companies in which it invests to appropriately manage such companies.

What are the key dates of the Offer?

Prospectus lodged with ASIC.	23 December 2016
Opening Date	23 December 2016
Closing Date	4 January 2017
Issue of holding statement	5 January 2017

Please note that these dates are subject to change. The Company reserves the right, subject to the Corporations Act and the Listing Rules to amend the timetable at any time, and in particular, to extend the Closing Date.

2. PURPOSE AND EFFECT OF THE OFFER

2.1 Purpose of Offer

As announced on 23 December 2016, the Company is undertaking a placement in 2 tranches to investors who are not related parties with the first tranche utilising the Company's current 15% placement capacity. The first tranche Shares will be issued during the period in which the Offer is open. The first tranche Shares constitute approximately 78,749,999 Shares to be issued at 0.8 cents per Share to raise a gross sum of \$630,000 (New Shares).

The New Shares will be issued without a prospectus to institutional, sophisticated and professional style investors under section 708 of the Corporations Act and who are not related parties of the Company.

The Corporations Act in certain circumstances restricts the trading of securities that are issued without a prospectus. The purpose of the Offer is to allow Shareholders holding the New Shares to be able to sell them without trading restrictions. This Prospectus has been prepared for the purpose of section 708A(11)(b)(ii) of the Corporations Act to remove any secondary sales restrictions on the sale of the New Shares. Section 708A(11)(b)(ii) of the Corporations Act removes secondary sale restrictions where relevant securities are issued while an offer of the same class of quoted securities is open under a prospectus.

Under the Offer, the Company will invite an investor to subscribe for 1 Share for 0.8 cents. The Company will only receive a nominal amount of 0.8 cents under this Prospectus and therefore raising funds is not a purpose of the Offer.

The second tranche of the placement is intended to constitute up to 125,000,000 Shares. The issue of these second tranche Shares is subject to Shareholder approval and is not the subject of this Prospectus.

2.2 Effect of the Offer

The effect of the Offer will be to remove the secondary trading sale restrictions on the New Shares issued.

The Offer will further:

- (a) increase the number of Shares on issue by 1 Share; and
- (b) decrease the cash reserves of the Company by approximately \$5,500, being the estimated costs of the Offer.

2.3 Capital Structure

The issued Share capital of the Company after the issue of 1 Share under this Prospectus and the issue of the New Shares is set out below.

	Number
SHARES	
Existing Shares	1,175,500,123
New Shares	78,749,999
Share to be issued under this Prospectus	1
Total	1,254,250,123^{1 and 2}

Notes:

1. Subject to Shareholder approval, a second tranche placement of up to 125,000,000 Shares is intended to be undertaken.
2. In addition to Shares, the Company has on issue 80,000,000 unlisted Options (exercise price 2 cents, expiry date 31 December 2016) and 36,000,000 performance rights. 18,000,000 of the performance rights convert into 18,000,000 Shares (fully paid ordinary) upon the Company paying the final tranche of the Omniblend Innovation subscription transaction and 18,000,000 of the performance rights convert

into 18,000,000 Shares (fully paid ordinary) upon Omniblend Innovation Pty Ltd completing an initial public offer or reverse takeover on the ASX or an alternative Board approved securities exchange or upon the trade sale of the main business of Omniblend Innovation Pty Ltd.

2.4 **Effect on Financial Position**

The issue of 1 Share under this Prospectus will not have a material impact on the Company's financial position. For this reason a pro-forma statement of financial position of the Company showing the financial effect of the Offer has not been included in this Prospectus.

2.5 **No Effect on Control**

The issue of 1 Share will have no effect on control of the Company.

3. RISK FACTORS

3.1 **Introduction**

The Applicant for the Share under this Prospectus should be aware that an investment in the Company is highly speculative. The Company is a listed investment company where its business is that of investing in emerging technologies.

The Company's current investments are:

- (a) A shareholding in Omniblend Innovation Pty Ltd, a medical technology company focused on foods for special medical purposes (the funds raised by the issue of the placement of the New Shares (first tranche) and the second tranche placement will be used in part to make subscription payments to increase the interest of the Company in Omniblend Innovation Pty Ltd to 39.39%); and
- (b) a 35% equity interest in Wayland Copper Ltd which holds the Ballek Copper Gold Project in Sweden.

The Company's investment strategy is seeking to invest and partner with innovative technology start-ups with global scalability. Consistent with this new investment strategy, the Company will focus on its investment in Omniblend Innovation and identifying and evaluating further technology opportunities.

The activities of the Company are subject to various risks that may impact on the future performance of the Company. The following is a non-exhaustive list of the risks that may have a material effect on the financial position and performance of the Company and the value of its securities.

The specific risks below are some of the risks to the Company of a specific nature by reason of its focus on technology start-ups. The general investment risks below are some of the risks to the Company of a general economic nature.

3.2 **Specific risks**

Future capital needs and additional funding

The Company's ability to raise further capital (equity or debt) within an acceptable time, of a sufficient amount and on terms acceptable to the Company will vary according to a number of factors, including prospectivity of investments (existing and future), stock market and industry conditions.

No assurance can be given that future funding will be available to the Company on favourable terms (or at all). If adequate funds are not available on acceptable terms the Company may not be able to further develop its investments and it may impact on the Company's ability to continue as a going concern.

Technology development and commercialisation risk

A significant risk of investing in technology start-ups (such as Omniblend Innovation Pty Ltd) is whether the technology company can relevantly develop and successfully commercialise its technology. A failure to achieve commercialisation of relevant technologies may have a significant adverse impact on the Company's business model, operating results and financial position.

Early stage investments

The investments of the Company are intended to be in early stage opportunities which may involve seed capital in unlisted companies. Such investments are in the nature of high risk and high reward. Investments in any unlisted companies are generally illiquid and may prove difficult to sell prior to such a company achieving listing on a stock exchange and may further be subject to escrow restrictions upon listing.

Reliance on key personnel

The Company's success largely depends on the core competencies of its Directors and any management and its ability to retain these people. The Board of Directors makes decisions on investment strategy and investments and there is no separately designated manager or investment committee.

The Company further relies on the key personnel of companies in which it invests to appropriately manage such companies.

Intellectual Property risk

The success of technology companies will often depend in part on their ability to obtain patents (and therefore proprietary rights) without infringing the proprietary rights of others. The strength of patents involves complex legal and scientific questions and can be uncertain. There can be no assurance that any patents will afford the relevant technology company commercially significant protection or that competitors will not develop competing technologies that circumvents such patents.

Competition

The technology start-up industry in which the Company will be involved is subject to significant competition. The Company will have no influence or control over the activities or actions of competitors to its investments, whose activities or actions may, positively or negatively, affect the operating and financial performance of the Company's investment.

Technology Industry Concentration Risk/Diversification

Technology sector investments are expected to comprise the material investments of the Company. Therefore there is little diversification across industries which increases the Company's exposure to an economic downturn in the technology sector. Despite the focus on selecting technology investments, the Company may not perform in line with the performance of the technology sector. Additionally, the size of the investment portfolio will affect its risk profile so the greater the number of investments the less the Company will be reliant on any one investment. Currently the Company is reliant upon its future investment in Omniblend Innovation, a medical technology company focused on foods for special medical purposes.

Possible Foreign Market Exposure

The Company may undertake investments both in Australia and overseas. Investments in overseas jurisdictions will bring with it the political and legislative risks unique to that particular jurisdiction. Foreign investment will also bring exposure to foreign exchange risk as income, expenditure and cash flows of the Company need to be accounted for in Australian dollars. Further, any investments in companies listed on foreign stock markets may have less volume and liquidity than the ASX.

NTA discount to market

Securities in a listed investment company may trade at a discount to the net tangible asset value of its underlying assets.

3.3 General investment risks

Securities investments and share market conditions

There are risks associated with any securities investment. The trading prices of securities trade fluctuate in response to a number of factors.

Furthermore, the stock market, and in particular the market for technology start-up companies and investors in such companies may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.

Economic risk

Changes in both Australia and world economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings.

Legislative

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies may adversely affect the financial performance of the Company.

4.10 **Rights Attaching to Share**

A summary of the rights attaching to the Share is set out in Section 5.

For personal use only

5. RIGHTS ATTACHING TO SHARE

5.1 Rights attaching to Share

Full details of the rights and liabilities attaching to the Share are:

- detailed in the Constitution, a copy of which can be inspected, free of charge, at the registered office of the Company during normal business hours; and
- in certain circumstances, regulated by the Corporations Act, the Listing Rules and the general law.

The following is a summary of the more significant rights and liabilities attaching to Shares. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at a general meeting of members every member has one vote on a show of hands and one vote per share on a poll. The person who holds a share which is not fully paid shall be entitled to a fraction of a vote equal to that proportion of a vote that the amount paid (not credited) on the relevant share is of the total amounts paid and payable in respect of those shares (excluding amounts credited). Voting may be in person or by proxy, attorney or representative.

Dividends

Subject to the rights of holders of shares issued with any special rights to dividends (at present there are none) and the Corporations Act, the profits of the Company which the Board may from time to time determine to distribute by way of dividend are divisible to each share of a class on which the Board resolves to pay a dividend.

Future issues of securities

Subject to the Corporations Act and the Listing Rules, the Directors may issue, grant options over unissued shares in the Company at the times and on the terms that the Directors think proper and a share may be issued with preferential or special rights.

Transfer of Shares

A shareholder may transfer Shares by a market transfer in accordance with any computerised or electronic system established or recognised by ASX for the purpose of facilitating transfers in Shares or by an instrument in writing in a form approved by the Board.

Meetings and Notices

Each shareholder is entitled to receive notice of, and to attend, general meetings for the Company and to receive all notices, accounts and other documents required to be sent to shareholders under the Constitution, the Corporations Act or the Listing Rules.

Shareholders may requisition meetings in accordance with the Corporations Act.

Election of Directors

There must be a minimum of 3 Directors. At every annual general meeting one third of the Directors or, if the number is not a multiple of 3, then such number as is appropriate to ensure that no Director hold office for more than 3 years, must retire from office. These retirement rules do not apply to certain appointments including the managing director.
