## 9 Nov Video analysis & speed tracking

Sick of searching through tons of video files? That's a thing of the past with the new video analysis app from Lympik. The app automatically syncs the video data with the timing data and athlete information. With detailed speed insights coming from our GPS-Tracker "Oculus" trainers and athletes can identify key positions where the athlete gained or lost time.

In this webinar we will show you how to use our video analysis app and how to analyse speed data with "Oculus".

## 10 Nov Competitions made simple

Never struggle again with complicated timing devices or software. With the Lympik system you can measure your ski school race or small competition completely without any special technical knowledge. In this webinar we will show you how to setup the devices, import registrations and generate the result list.
