

Celebrating 20 Years of Ameliorating Essential Infrastructure Crimes and Vandalism

---

NTAMO TECHNOLOGIES

Our Company Profile

## ABOUT US

Ntamo Technologies (Pty) Ltd is a medium size level 2 B-BBEE Black Women Owned Organization established in 2001 which provides Intelligent-Interactive-Innovative Security Technology solutions and comprehensive support services to mitigate for Essential Infrastructure Crimes and Vandalism within the electrical, railway, ICT, mining and for water industries with the integration of our company value chain.

We are registered with the Private Security Industry and Regulation Authority (PSIRA) and an affiliate member of the South African Intruder Detection Services Association (SAIDSA)

## OUR VALUE PROPOSITION

“As a registered and accredited Security Service Provider our principal offering in value to our customers in the mitigation of Essential Infrastructure Crimes is encircled by our ability to apply a fully comprehensive specialized Risk Matrix Algorithm supported by Empirical data. In deploying this strategy our leading approach is geared around the Minimizing of Risk and more significantly Reducing Revenue losses to our customers through early warning and preventative strategies. Our proposition offers a fully comprehensive approach which includes Bespoke Technologies, Specialized Forensic Investigations, Legal Watching Brief, Air Support, Specialized Armed Reaction, Guarding and a 24-hour state of the art Control Room all supported by local Law Enforcement and the Judicial System. We believe by following our mission statement “Technologies-Partners-People” our spectrum offering solidifies our approach as a market differentiator, and therefore provides an attractive value proposition and a return on investment to all our customers ”

## OUR MISSION

“Technologies ∞ Partners ∞ People”

## OUR VISION

“Harnessing our core values and endeavouring to be the leading market differentiator in deterring essential infrastructure crimes through the employment of our bespoke risk matrix algorithm, integrated with early warning and preventative strategies to curtail revenue losses to our customers”

## OUR CORE VALUES

- Fair and ethical treatment of all employees.
- Having a stimulating and creative working environment.
- Management with an open door policy.
- Building long term partnerships with our customers.
- Delivering value as well as a competitive advantage to our customers.
- Ethical values in winning new business.
- Ensuring a safe working environment for all employees

## BESPOKE DESIGNED SOLUTIONS

All of our systems are designed, manufactured and tested in-house, this includes.

- The design of PCB boards and schematics.
- Prototyping and testing of relevant designs.
- Proof of concept testing, on site, prior to manufacturing.
- Final product testing, in test bays, prior to issuing of the product.

## OUR RANGE OF TECHNOLOGIES INCLUDE

- Early Warning Underground Cable Theft Alarm System
- Low Voltage Universal Alarm
- Broken Neutral Safety Device
- GSM Pepper Gas Alarm

## OUR BUISINESS MODEL

We offer a fully comprehensive service which allows us to be a differentiator in this market segment

## OUR SERVICES

### 24 Hour Control Room

The control room's purpose is service monitoring and production control, and serves as a central space where all our dispersed services can be monitored and controlled.

### Rapid Response

The core function of Ntamo Technologies' Response teams is to conduct patrols, respond to alarms and prevent incidents from occurring, delivering a rapid and professional service to customers at all times.

### Air Support

Our drones assists us in mapping specific areas for the forensic division and allows us to determine and discourage threats during surveillance operations. The added situational awareness provided to security forces will help minimize risk to personnel.

### Technical Support

The technical division ensures that all of our systems are installed, commissioned, maintained and repaired. We have technicians available 24/7 in the case of faults and attend to them within the first 24 hours.

### Legal Watching Brief

The company employs its own internal legal counsel to oversee all criminal matters within the criminal justice system relating to crimes committed within the Essential Infrastructure environment, Scrap Metal markets and Prevention of Organized Crime.

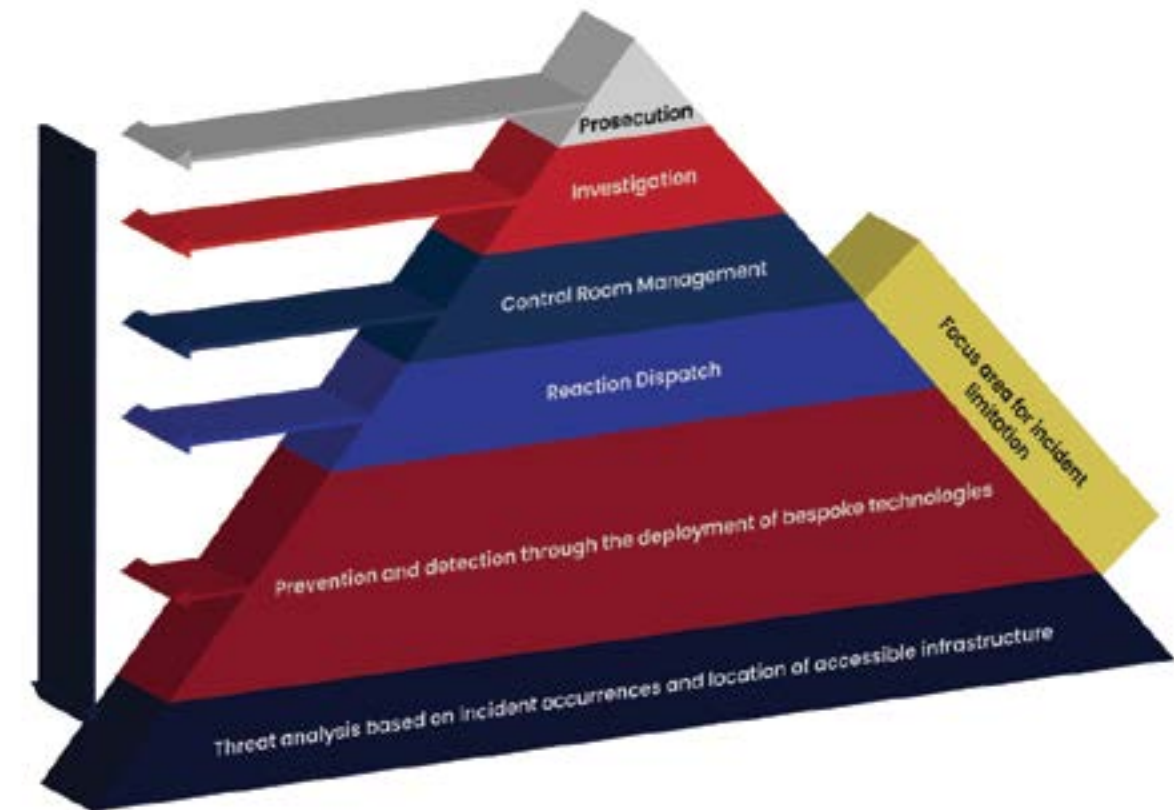

### Forensic Investigations

Our Investigators specialize in infrastructure crime with vast experience, knowledge and resources for strategic, operational and tactical investigations. The team is proficient in intelligence gathering and investigations through the entire value chain.

### OUR RISK MANAGEMENT APPROACH

Our approach in dealing with the market is to ensure compliance with the Second Hand Goods Act 6 of 2009 where a close working relationship with local law enforcement ensures compliance of Scrap Metal Dealers and Recyclers.

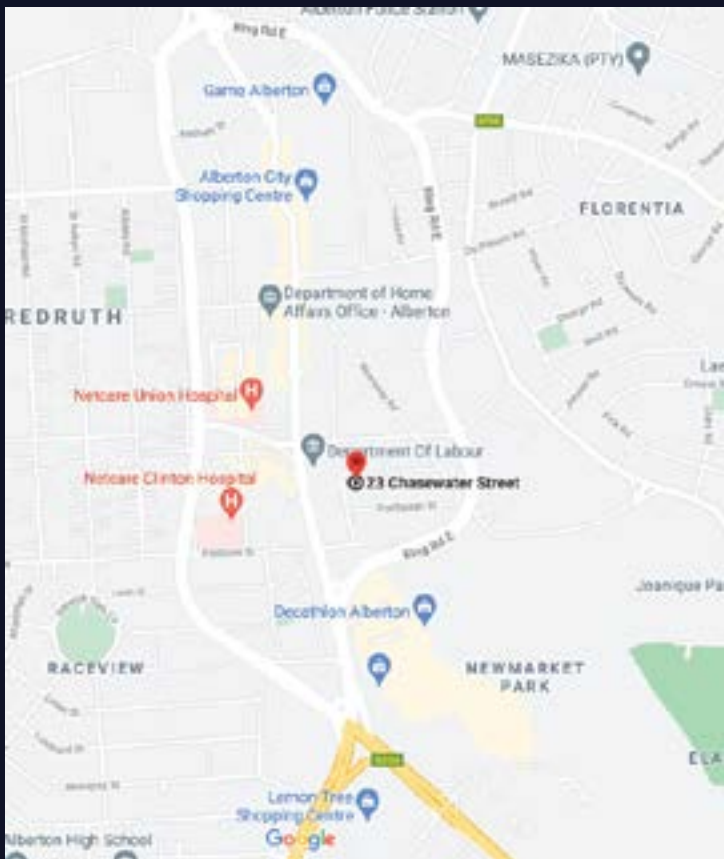

In further mitigating, the holistic approach to our strategic solution provides forensic and legal resources which are highly experienced in investigation and intelligence gathering in the field of Essential infrastructure as well as having our own employed legal advocate to act as a watching brief and oversee court proceedings.
