

# Affiliate Program for the Time to Market Accelerator

Helping you to provide more value to your  
customers by establishing a win-win partnership

# Time to Market Accelerator

The Time To Market Accelerator package is designed to serve as a product accelerator for an organisation. Many organisations are trapped within their own product teams, and can face challenges when it comes to pursuing great new ideas triggered by employees or customers.

With Time To Market Accelerator we help organisations to build a business case around the piece they want to develop, we validate that business case with their users and develop the software without interfering with their internal roadmap allowing the company to scale with speed and simplicity.

## Why companies are interested in the Time To Market Accelerator

We enable organisations to pursue their innovative changes to their business profile with our complete collaborative package. We aim to fully satisfy the needs of our customers using our external accelerator to provide various benefits:

- ✓ **Business Case Creation** - We provide you with a business case of what they want to build. Many organisations just use external providers to increase man-power but we are focused on helping them to grow their business and want to make sure the outcomes we provide are profitable for them in medium/long term.
- ✓ **Business Case Validation** - To avoid delivering something their customers don't want and to avoid expensive and lengthy development, we integrate a Google Design Sprint week to make sure that your developments fulfil their customer needs and it will be accepted by final users.
- ✓ **Time Saving** - Hiring one of our complete teams will ultimately save them time and money. We know how challenging it is to find and recruit experienced developers that will fit seamlessly with their team, and that is why we highlight the importance of a constant collaboration.
- ✓ **Focus on core business** - by outsourcing our team, they can focus on their core business while building their service offering without having to worry about recruitment or payroll.
- ✓ **Portugal** - according to the studies by Gartner, Inc. in 2015, Portugal is listed among the top seven leading countries for providers of technology-based services. Lisbon, Portugal's capital, has a strong infrastructure, and is a globally recognised as a world-class venue with a thriving start-up community.

# Reasons why this program might be interesting for you:

- ✓ You have the same type of customer that Deploy Yes but we offer complementary services
- ✓ Your customer wants to grow their software development team but cannot find skilful developers in the market
- ✓ You think you could help them but this type of service is not part of your portfolio
- ✓ You want to generate extra source of income without the risk of building a new service
- ✓ You want to expand your customer base by tapping into Deploy Yes customer base

# Affiliate Program for the Time to Market Accelerator

*Win 10% of the net profit of every project for every customer recommendation that ends in sale!*
