

BCG Digital Ventures invests in SOL-X as a game changer in the maritime industry

Singapore - 19 August 2021. SOL-X is proud to announce an investment from BCG Digital Ventures (BCGDV) and is excited to join their portfolio of companies. BCGDV's investment is a strong validation of SOL-X's vision to redefine maritime safety through smart and human-centric technology.

“This investment from BCGDV reflects the traction we have gained in the market. Our game changing technology, SAFEVUE.ai addresses the core of “human factors” risks by combining the Control Of Work with Crew Wellbeing to deliver near real time safety intelligence on the edge. Current safety solutions today are inadequate in addressing “human factors” risks and we strongly believe that SAFEVUE.ai can play a vital role in contributing to this new paradigm shift.” said Nigel Koh, Chief Executive Officer of SOL-X.

“With 90% of the world’s goods transported by ships, and considering the fragmented attempts at innovation, we believe these investments are going to be absolutely transformative to the maritime industry, as well as to industries such as mining, energy, and industrial goods.” commented Sid Shah, Managing Director & Partner and Global Leader of BCGDV’s Energy Practice.

About SOL-X

SOL-X is a leading Behavioral Based Safety company centered on human factors. Combining deep maritime knowledge with Industrial Internet of Things capabilities and predictive Artificial Intelligence, our focus is on improving safety and compliance outcomes, increasing operational productivity, and enhancing crew wellbeing. SAFEVUE.ai is an industry leading Behavioral Based Safety system that combines an enhanced Control Of Work with a holistic approach to Crew Wellbeing - improving worker health and safety culture.
