

Version 2021.01

# Store Integration

Houzz

---

WWW.SHIPSAVING.COM

# Step 1 Login to your Houzz seller account;

The screenshot shows the Houzz website interface. At the top left is the Houzz logo. A search bar contains the text "Search Stories, Photos, Products & More...". To the right of the search bar are buttons for "SALE", a shopping cart icon, a "Sign In" button (highlighted with a green border), and a "Join as a Pro" button. Below the search bar is a navigation menu with icons and labels for "PHOTOS", "SHOP BY DEPARTMENT", "FIND PROFESSIONALS", "STORIES & ADVICE", and "SALE".

The main content area features a breadcrumb link: "< Back to Professionals on Houzz's Ideabooks". The title of the page is "Vendor Dashboard: Selecting a Style for Your Products". Below the title is a sub-header: "Use these descriptions to pick the right product style, so customers can find what you're offering".

Below the sub-header are five interactive buttons: "Print", "Comment | 29", "Like | 29", "Embed", and "Email".

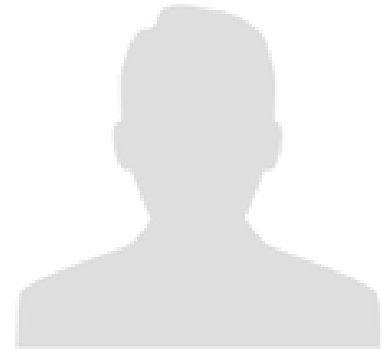

A paragraph of text follows: "Don't know the difference between contemporary and modern? No problem! Houzz is here to help. Assigning the correct style to each of your products will help customers find exactly what they're looking for, including items from your inventory. Here's an in-depth explanation of the 15 styles you can choose from on Houzz."

At the bottom of the main content area is a section titled "Photos & Products" with a green circular icon. Below this title are four grid-like image galleries, each labeled "Lakshmi" in the top right corner. Each gallery contains various interior design items such as pillows, sofas, tables, and chairs.

# Step 2

Go to Settings > API tab; If it is not available, please email sellerapi@houzz.com and ask for API access for your account.

## Seller API

The Houzz Seller API allows you to list and manage inventory, process orders, and more through the following to begin using the API:

How do you intend to use the API? (check all that apply)

- Create, edit, and remove product listings
- 2.**  Update product inventory
- List and process orders
- Get payment reports

Note: use of the Houzz Seller API is bound by the terms of the [Houzz Seller Agreement](#).

**3.** [Complete Registration](#)
