<b>Brief Description of Business Operations</b>	Advanced Blockchain AG is an exchange-traded blockchain development company based in Berlin, whose shares are traded on XETRA, Frankfurt, Düsseldorf and other stock exchanges. The company develops and invests in blockchain software solutions for leading industrial companies. The largest participation is in FinPro ( <a href="http://www.finpro.de">www.finpro.de</a> ), a platform that makes investments accessible to the German populace by tokenizing, fractionalizing, and selling portions of loans and various assets to investors. Another significant participation is Peaq Technology GmbH, which is developing its own blockchain technology base system called "peaq" ( <a href="http://www.peaq.com">www.peaq.com</a> ) based on the new DAGchain technology.
