AMAZING·AUDACIOUS·ADAMANT

PIRNAR®

We believe in miracles.
We believe in the boundless potential of the human imagination.
We believe in a future that pushes the limits of what is possible. We are proud to be trend creators and the first choice for those with exquisite taste, thanks to the best of our products.

For those who know that nothing is impossible.

For you.

Roman Pirnar

Owner and CEO, Pirnar d. o. o.

PIRNAR PREMIUM

PIRNAR PREMIUM is the gateway to a full and rich life, where peace and deep contentment reside. It entices you into a state of relaxation that revitalises body and soul. It whispers to you that this is time just for you. Step over the threshold and into an oasis of peace. Take a deep breath and, with the precision of a seismometer's needle, shoot for success. In spite of all the obstacles in your way. Despite the uncertainty. That sense of triumph and contentment still rests comfortably on your face as you arrive home and settle in for a well-deserved rest.

Enjoy the Comforts of Modern Living

Modern living is characterised by the use of smart technologies and modern solutions. This also applies to the development of front doors. At Pirnar, we have brought a range of innovations to the front door that will turn your home into an oasis of peace, cosiness and warmth. Never before has this class of front doors seen so many effective improvements and such superior features. Upgrades in thermal and acoustic insulation combined with a smart unlocking system and smart lighting perfectly complement the most established smart home solutions.

A Smart Home Starts With a Smart Door

A smart home starts at the front door. Now you can control your door wherever you are. In addition to unlocking your door remotely, the SecuroSmart mobile app allows you to control entry, monitor activity, create an entry log and enter your fingerprint in an emergency, even for several of your properties at the same time. It is compatible with many popular smart home solutions.

- Voice control with Google Assistant and Amazon Alexa
- Use on Apple Watch
- Control with Siri – Apple's personal assistant
- Linked to Pirnar's SmartLux smart lighting system

SmartLux Smart Lighting

When the sun goes down and the first stars appear in the night sky, Pirnar's entrance comes to life. The beauty of the night light, already enhanced at the entrance with LUX lighting, is now complemented with SmartLux smart lighting. It provides both manual and remote control of the illumination of the front door's thresholds, bar handles and decorative trim.
The manual control mode is built into the door frame and allows manual changes of the intensity and colour of the light.
Remote control via the SecuroSmart mobile app allows you to change the temperature, intensity and colour of the light and to control and set the timer.

- Light timer control
- Wi-Fi and Bluetooth connectivity
- Remote control
- Voice control with Google Assistant and Amazon Alexa integration
- Light temperature control from 2700 kelvin (warm white) to 6500 kelvin (cool white)

ILLUMINATION

PREMIUM CarbonCore

The world's Strongest Carbon Fibre Front Door Construction

Construction is at the heart of every top-quality front door. CarbonCore is the world's only patented carbon construction developed exclusively for front doors. Carbon fibre is extremely light, rigid and several times stronger than steel, so the door will not warp in the scorching sun or the coldest winters. CarbonCore allows for easier installation without warping, reduces delivery and installation defects, lessens the environmental impact and shortens the production and sales process.

ENTER THE FUTURE.

WATERTIGHTNESS AT WIND SPEED

114 km/h | 600 Pa

AIR PERMEABILITY CLASS

4

Ready to fight the wind, water and cold?

Advanced Magnet WeatherSeal system

The advanced Magnet WeatherSeal system is an innovation that has earned the door an outstanding 9A watertight rating in the testing laboratories by maintaining perfect watertightness at 600 Pa, equivalent to a wind speed of 114 km/h. This is six times the pressure that a conventional front door can withstand.

Superior additional thermal insulation

Combined with additional thermal insulation, CarbonCore creates an energy-efficient front door that achieves an outstanding thermal transmittance value of 0.71 W (m²K).

Welcome to
PIRNAR's
digital world

SoundCore

Sound Insulation for more Peace and better Comfort for Residential Houses.

SoundCore is a front door for residential houses with a 900 kg/m³ density filler, which combined with a superior seal and door leaf, reduces the sound load in living spaces more than 18 fold compared to an open door. Compared to standard front doors, the intensity of sound passing through the door is significantly reduced.

Acoustic insulation panel: **SoundCore**

Thermal transmittance: **U_d = from 0,84 W/(m²K)**

Soundproofing: **Rw** (C; Ctr) **= to 42** (-1; -4) **dB**

ThermoCore

Thermal Insulation for more Heat and Additional Savings on Heating in Residential Houses.

ThermoCore is a front door for residential houses with a significantly higher thermal insulation rating. The ultra-thin glass nanofiber panels, combined with other insulating materials, help reduce energy consumption and thus save on heating costs. Thermal conductivity is almost 20 % better than a standard door.

Thermal insulation panel: **ThermoCore**

Thermal transmittance: **U_d = from 0,59 W/(m²K)**

Soundproofing: **Rw** (C; Ctr) **= to 29** (-1; -4) **dB**

Rw = sound insulation
C = correction factor for the midrange frequency
Ctr = correction factor for the low frequency range

RECOMMENDED UPGRADE

SupremeCore

Supreme Sound and Heat Insulation for the most Warmth and Peace in your Home.

SupremeCore is a front door for residential houses that inspires with record-breaking sound insulation and thermal conductivity values. Innovative sound and heat insulation panels are combined with other materials to create a solid door with not only exceptional sound-proofing but also the lowest possible levels of heat loss. Good sound insulation does not impair thermal transmittance.

Acoustic and thermal insulation: **SoundCore + ThermoCore**

Thermal transmittance: **U_d = from 0,62 W/(m²K)**

Soundproofing: **Rw** (C; Ctr) **= to 42** (-2; -5) **dB**

Open the Door to Happiness

The front door is the entrance to a new life and an overture to the comforts of modern living. Your home will be filled with the warmth of family harmony, full of children's laughter and contentment. At PIRNAR, we enhance your happiness with advanced thermal and acoustic insulation. The sophisticated entrance will provide your family with greater security and ease of living, while the smart lighting will create an exceptionally elegant look for your house.

PREMIUM CLASSICO

A home with a respectable age and the romantic touch of the past needs something special. PREMIUM CLASSICO, with its timeless beauty, perfectly matches a facade of a bygone age. Every CLASSICO door ornament is poetry, worth viewing at length and with respect, the same as your home.

Grande. For the Grand.

SOMETIMES SIZE DOES MATTER.

Spacious rooms with high ceilings, majestic villas, castles and masterpieces of modern architecture cannot be fitted with a run-of-the-mill entrance. And some simply refuse to have a regular-sized entrance. Pirnar Premium entrances can be produced as Grande entrances, measuring up to 300 cm in height and 280 cm in width. Along with side elements, they create an impression of breathtaking grandeur.

Grande is a world of unparalleled elegance. It is an entrance for spaces and people that are larger than life. When size matters, choose Pirnar Premium Grande.

GRANDE double door with side lights

Standard Equipment Aluminium

ALUMINIUM PREMIUM CARBONCORE

A safe, extremely rigid and excellently insulated aluminium construction, reinforced with a carbon fibre profile. The double-sided monoblock construction allows for the creation of the most beautiful shapes.

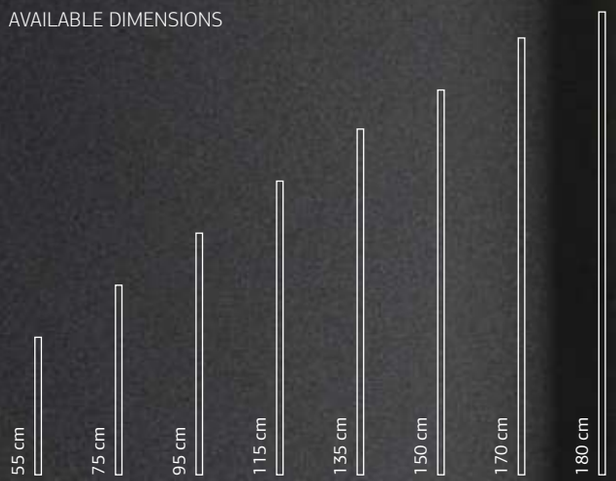
Make an Impression with a Unique Bar Handle

Handles are the most personal part of the door. Every resident touches it at least a thousand times a year, which is why PIRNAR pays special attention to them. We select one of the basic forms, either round or angular, and determine the exact length. To ensure the best impression and a personal touch, we have created several series of unique illumination upgrades of handles that use patented technology and that were awarded the prestigious international German Design Award Special 2019.

AVAILABLE DIMENSIONS



Please contact the Sales Department for further details on the full range of handles and illumination upgrades.

BASIC SHAPES

LUX

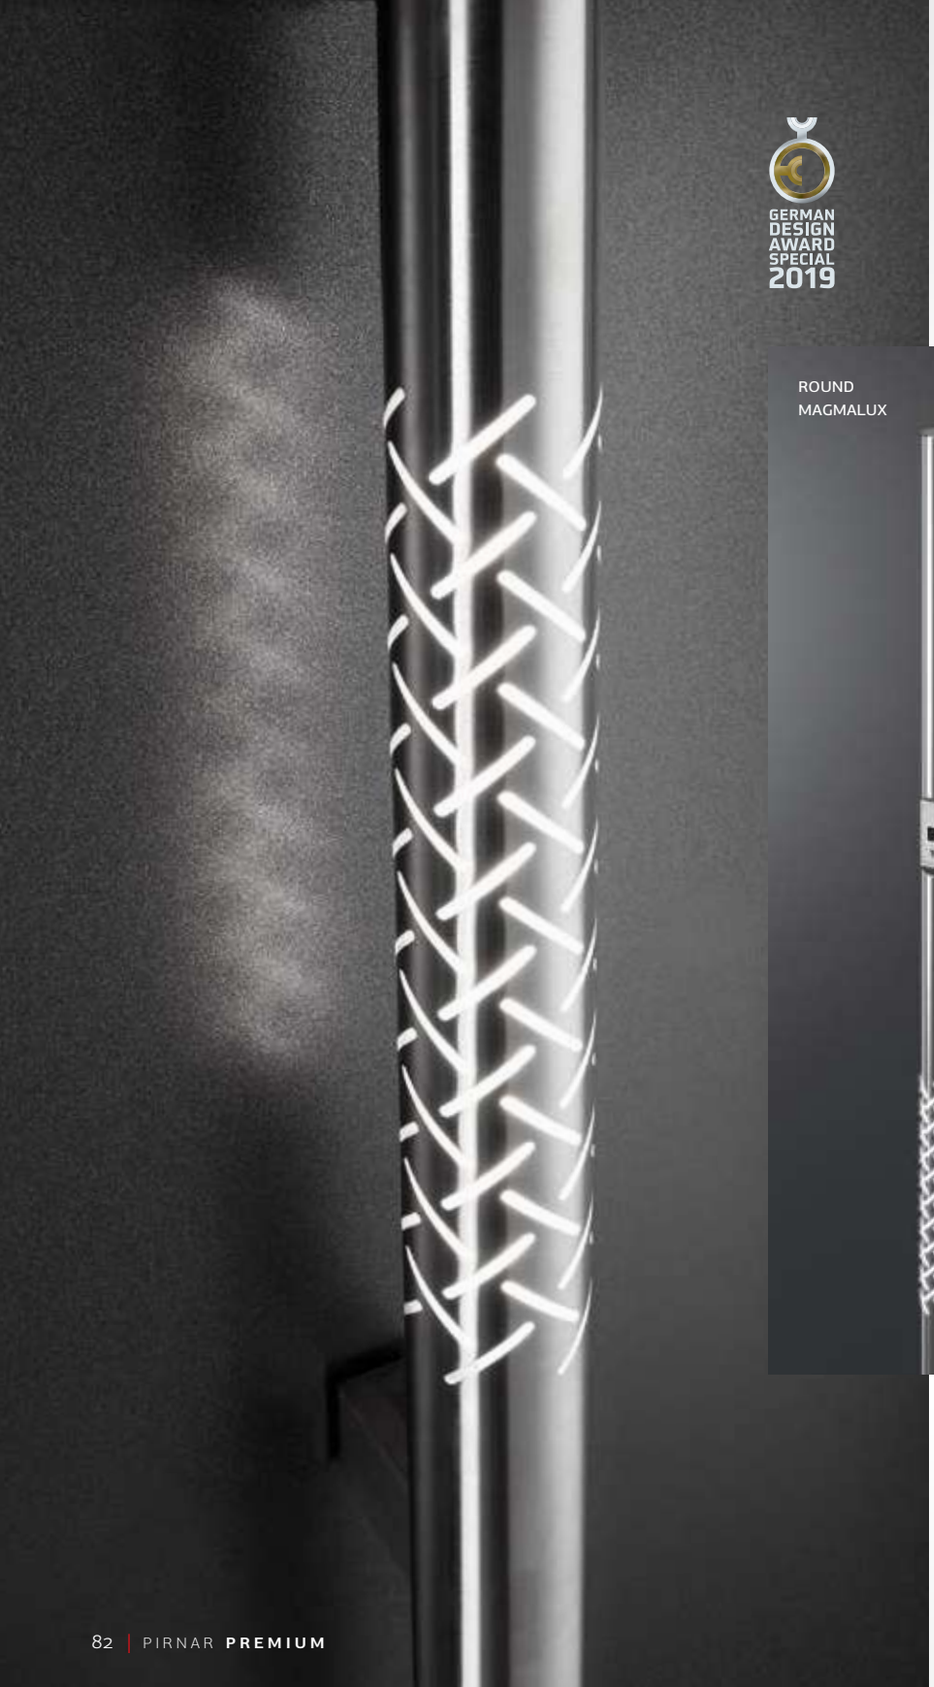
Soft ambient illumination of a vertical or plain door handle illuminates the entire house, creating a beautiful and magical atmosphere and feelings of safety and comfort in your home.

LABELUX

The technology patented by PIRNAR will make your surname or any other inscription shine out from the surface of a handle, fully levelled with the surface. This magical detail remains even while the handle is in use.

GERMAN DESIGN AWARD SPECIAL 2019

Welcome to **PIRNAR's** digital world



GERMAN DESIGN AWARD SPECIAL 2019

MAGMALUX

An astonishing game of light, where your hand touches the doorknob or handle. Playful patterns facilitate an unfathomable game of reflections, which transforms a prestigious door into an even more illustrious entrance. PIRNAR's patented technology.

Welcome to **PIRNAR's** digital world

CRYSTALUX

When it touches the handle, the hand is greeted by a large, polished piece of crystal glass with wonderful shapes and reflections. The impression of a jewel bounded in metal is especially striking in the twilight when it magically shines.

Relax

Take advantage of upgrades that offer top notch comfort and safety. Open the door by using only a finger. Forget about searching for the key or being left standing in front of the entrance without it. Treat yourself with a secure automatic locking system, connection to the intercom or remote control system. With high-tech fingerprint technology you will stay safe and become master of your home.

Pirnar models are protected by copyright. We reserve the right to change prices, technical descriptions and fitting without prior notice. Images are symbolic and cannot always reflect the exact condition. Variations in colour may occur due to the technical printing process. Colours should be checked using the RAL colour chart or wood samples.

The varnished surfaces of ALU Pirnar entrance doors are exceptionally colour resistant, which is attained with special electrostatic powder-coating on a previously chromated base. Small deviations in the varnished surfaces, not visible when viewed from a distance of 5 m from the outside or 3 m from the inside in normal daylight, are not considered to be faults (RAL RG 631 quality standard provision).
