

Manifesto

Gastronomy is part every nation's culture and a celebration of togetherness. However, it is also an important segment of the economy with an impact on the health of individual people.

Gastronomy brings joy, uplift and inspiration into our lives. When the passion, skills, knowledge and experience of gastronomic workers come together, the result puts a smile on our face.

We realize that building a reputation is a long-term commitment and a never-ending innovative process, in which each generation plays an important part. We are a generation of responsible and mature professionals who want to capitalize on their experience and play a leading role in a permanently sustainable world; a world where entrepreneurs and suppliers are able to run their businesses well, employees are able to work well, teachers are able to teach well and students are able to study well; and where the dreams of guests are fulfilled beyond their expectations.

We want to bring together culinary, business and political leaders; experts from the fields of science, education, and technology; professional colleagues from every sector of our industry; and passionate innovators in the world of gastronomy. We are ready to promote and moderate our discussion and work together in creating a professional, modern, fair and creative work and business environment that's attractive both for the current and the coming generation of young gastronomy professionals.

We wish to encourage all food lovers to embrace change, professionalism, and growth in their own companies, institutions, schools and teams. We are ready to campaign for our shared demands before legislators and government administrators. We are committed to educating each other and all of our members.

We want to have as many people as possible supporting our efforts. If you share our ideas, we want to hear from you!

Join us and let's work together to ensure a better future for the gastronomy that we love and that gives us all a living.

Vision

We want to become a professional organization bringing together professionals who are ready to give back to the industry they love and that sustains them. Our ambition is to build a fair gastronomic environment, one where entrepreneurs and suppliers will be able to run their gastronomic businesses better, employees will be able to work better, teachers will be able to teach better and students will be able to learn better. We want to turn our everyday efforts into a better gastronomic experience for all.

Working from the round table, CGI strives to improve the daily gastronomic experience for all.

Mission

With our partners at the round table, we want to shape the entire gastronomic industry and its professional standards, fostering a professional and creative environment for our members, i.e. employees and entrepreneurs in gastronomy, hospitality and gastronomic schools, their teachers, students, and institutional food service; an environment in which they can receive professional training, grow, and make their business, dining and study plans a reality.

Working together from the round table, we help Czech gastronomy develop and grow.
