The multi chain protocol for locks, vesting and swaps

Every cycle, huge gains are made in presales

Investors access tokens in exchange for accepting **lockups** and **vesting schedules** lasting **3-24+ months**

Maximum Bid	No maximum
Terms	1 year lock-up, after which fully unlocked
Supply Available in auction	2% (25M Tokens)
Eligible Participants	Non-US persons only

Example presale terms

 Locked XACTLI			Withdraw	Deposit
LOCKED BALANCE 20,000 XACTLI	YOUR HOLDINGS \$302,795.00	PENDING 0		

Investors make huge paper gains but often cannot trade their locked tokens

Many tokens don't vest until the next bear market, wiping out gains

The solution:

UNVEST

We make tradeable vesting tokens **the norm**
By building **free vesting tools** for founders

(Our vesting tools include built in infrastructure to support the secure transfer of un-vested tokens, while protecting founders)

Everything we build is open for any team to use

100% Self Service / Decentralized

Coordination with Unvest's team is entirely optional

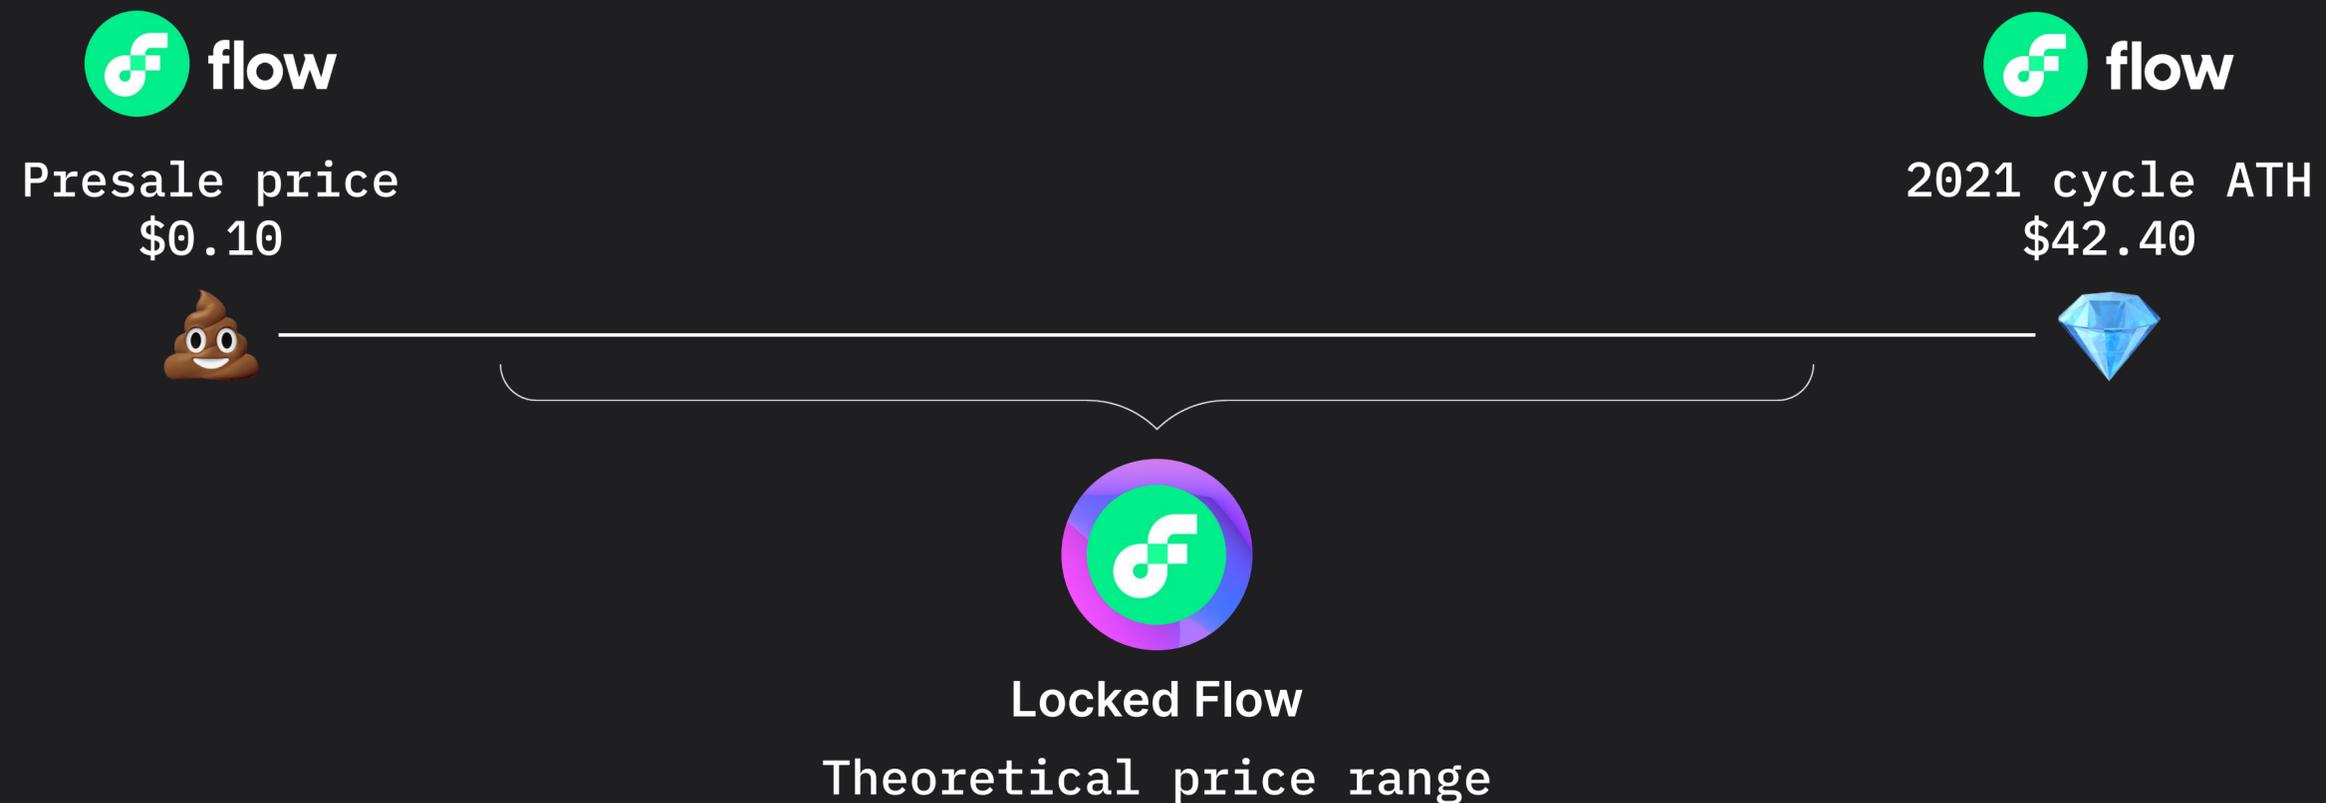

**Teams lock their tokens in non-custodial contracts
(meaning we/they can't touch them)**

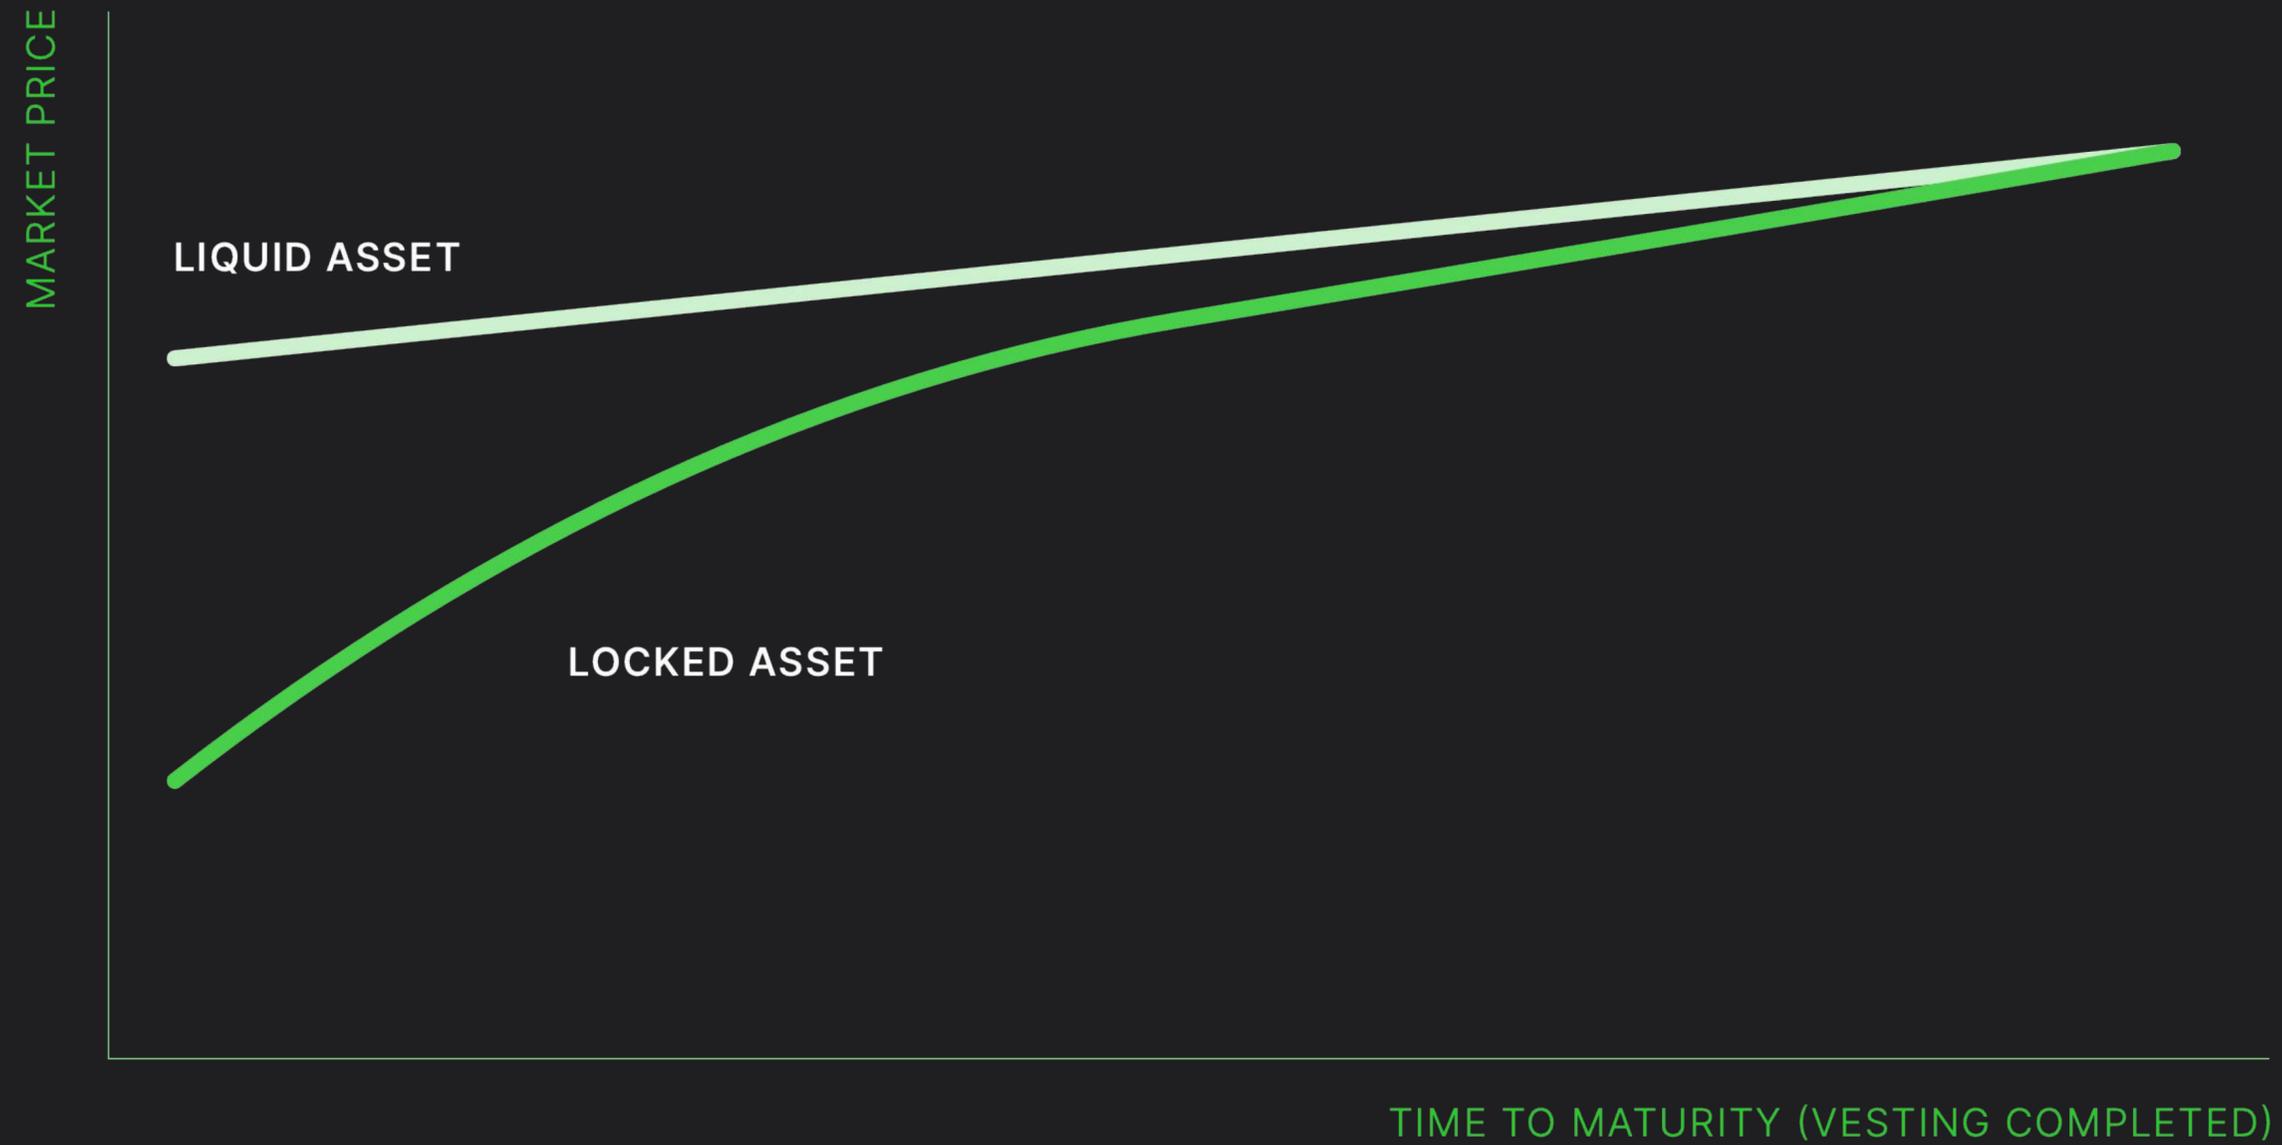

Why should vesting tokens be tradeable?

(They already are, off-chain OTC groups
already exist, but they add risk and
overhead and are relatively inflexible)

Token owners can **take profits early**

Buyers are able to access tokens **below market price**

LOCKED TOKENS ARE A NEW ASSET CLASS

The market price of the underlying liquid asset is not disrupted

Teams still get the benefit of vesting schedules

New market efficiencies are unlocked

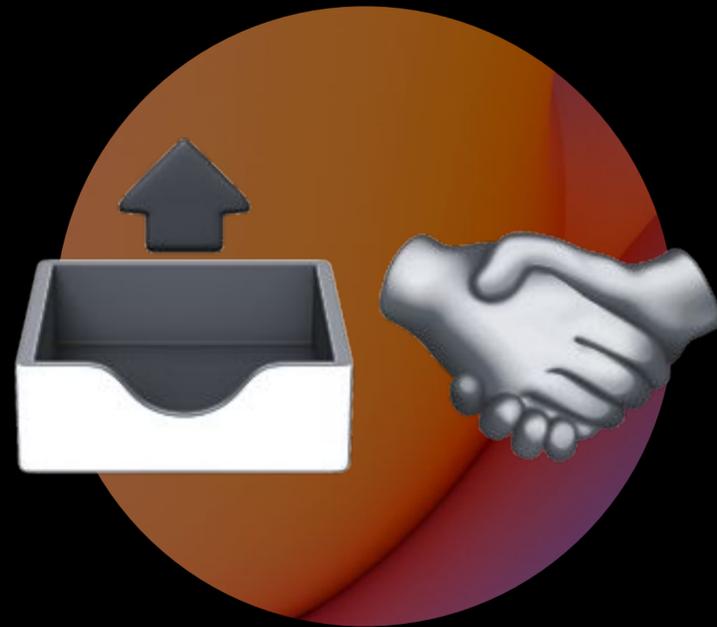

Core Apps

UNVEST LVTs

Liquid Vesting Tokens - lock, send, vest then claim any token

Zero code required, with a built in claim dashboard for investors, installment based vesting only

A project owner sends their tokens to the Unvest contract, along with recipient addresses for their investors, and a few other vesting details

The contract mints Liquid Vesting Tokens representing the rights to the original tokens, divided by instalment (eg. 1mth, 2mth...) these are sent to investors and can be freely traded

On maturity, the buyer holding the Liquid Vesting Tokens can redeem them 1:1 for the original unlocked token via the Liquid Vesting contract

UNVEST NFT Vesting

Universia Seed Round #135

Claimed 245352 UXD	Available to Claim 2315 UXD	Locked 2452452 UXD	Total allocation 2452452 UXD
-----------------------	--------------------------------	-----------------------	---------------------------------

[Claim Coins](#) [Split](#) [Transfer](#)

Party Finance Private Round #12

Claimed 0 PFI	Available to Claim 0 PFI	Locked 2000000 PFI	Total allocation 2000000 PFI
------------------	-----------------------------	-----------------------	---------------------------------

[Claim Coins](#) [Split](#) [Transfer](#)

Every investor gets an NFT, the NFT is the key that allows claiming of tokens during vesting

Zero code required, with a built in claim dashboard for investors, linear vesting and installment based vesting

Sell your NFT to sell your allocation (on any marketplace).

Complete vesting customization, cliffs, continuous and/or instalments.

Teams can mint new NFTs using the protocol.

Or, can use their existing NFTs (Apes, Goblins etc.).

NFTs can easily be split by investors for partial sales.

By using Unvest, any NFT community can launch their own ApeCoin

Unvest's tools can Airdrop and Vest any coin to **existing NFTs** in an external collection. Meaning NFT teams can reward people for continued ownership.

Unvest also allows **existing projects**
to raise capital and awareness
without dumping on their communities

Via issuing new Liquid Vesting Tokens and/or Vesting NFTs

In April 2021, Rally and Coinlist were able to sell \$22M in RLY to over 40,000 new holders at a 30% markdown (to compensate for the RLY tokens being locked up for a 12-month linear release)

There's even more...

UNVEST Liquid Locks

UNVEST [← Exit & Return Home](#) Ethereum 0.5507 ETH 0x5526...43961

STEP 2 / 7

When do you want your LP tokens to unlock?

Set a date when these LP tokens will be unlocked.

You'll get "Liquid Lock Tokens" (LLTs) that can be moved, traded and even airdropped. At the unlock date, these LLTs can be redeemed for LP Tokens, which can then be redeemed with your DEX for assets in the DEX liquidity pool.

Unlock date (Local time)

Mon May 03 2021, 8:43 PM 

Wed, 09 Jun 2021 05:43:00 GMT (UTC)

[Or, Create a more complex custom unlock schedule, multiple unlock dates etc. →](#)

[Back](#) [Next](#)

Lock liquidity + issue proxy tokens

Decentralize project liquidity while protecting against rug pulls and dumping

UNVEST OTC

UNVEST Activity Ethereum 0.5507 ETH 0x5526...43961

Propose a Trade

Select the tokens, amounts, and expiration for your trade offer

You'll send ABNB-3MO **5000** **You'll receive** **10000** USDC

AFTER FEES: 4875 ABNB-3MO

1 ABNB-3MO = 2 USDC 1 USDC = 0.5 ABNB-3MO

OFFER EXPIRES IN WEEK

Create Trade Offer

Buy or sell any token with zero slippage, peer to peer.

The perfect marketplace for Liquid Vesting Tokens and Liquid Locks

UNVEST NFT Market

The screenshot displays the UNVEST NFT market interface. At the top, the UNVEST logo is on the left, and a search bar with the text "Search items, collections, and accounts" is on the right. The main content area features a large image of the NFT, which is a green square with the text "UNIVERSIA SEED ROUND" and "UNVEST" in white. To the right of the image, the listing title "Universia Seed Round #279" is displayed, along with a verified creator badge. Below the title, statistics show 29 owners, 30 total items, 2.3K views, and 78 favorites. A "Sale ends July 5, 2022 at 11:52am GMT+12" notification is present. The current price is listed as 2.55 ETH (\$4,554.91). Two buttons are visible: "Buy now" and "Make offer". Below the price, a "Price History" section is shown, featuring a dropdown menu set to "All Time" and an "All Time Avg. Price" of 1.2891. A line graph below the dropdown shows the price history, with a blue line starting at approximately 2.1 and ending at approximately 1.3.

Trustless NFT sales with integrated vesting data

Perfect for Vesting NFTs, fees are redirected back to the protocol, instead of external marketplaces

UNV Token

Staking

Currently, community members can swap their unlocked UNV for time-locked UNV (LVTs) at a favorable rate.

Access

Protocol features can be paywalled, with UNV tokens required as payment. Collected tokens can be permanently burned.

Governance

As the protocol matures, protocol parameters will be controlled by the Unvest DAO, with UNV tokens controlling vote weight.

Deflationary

Beyond the initial supply cap of 1,000,000,000 tokens, no new UNV can be minted. Ongoing burns will reduce the supply.
