

Tip #5

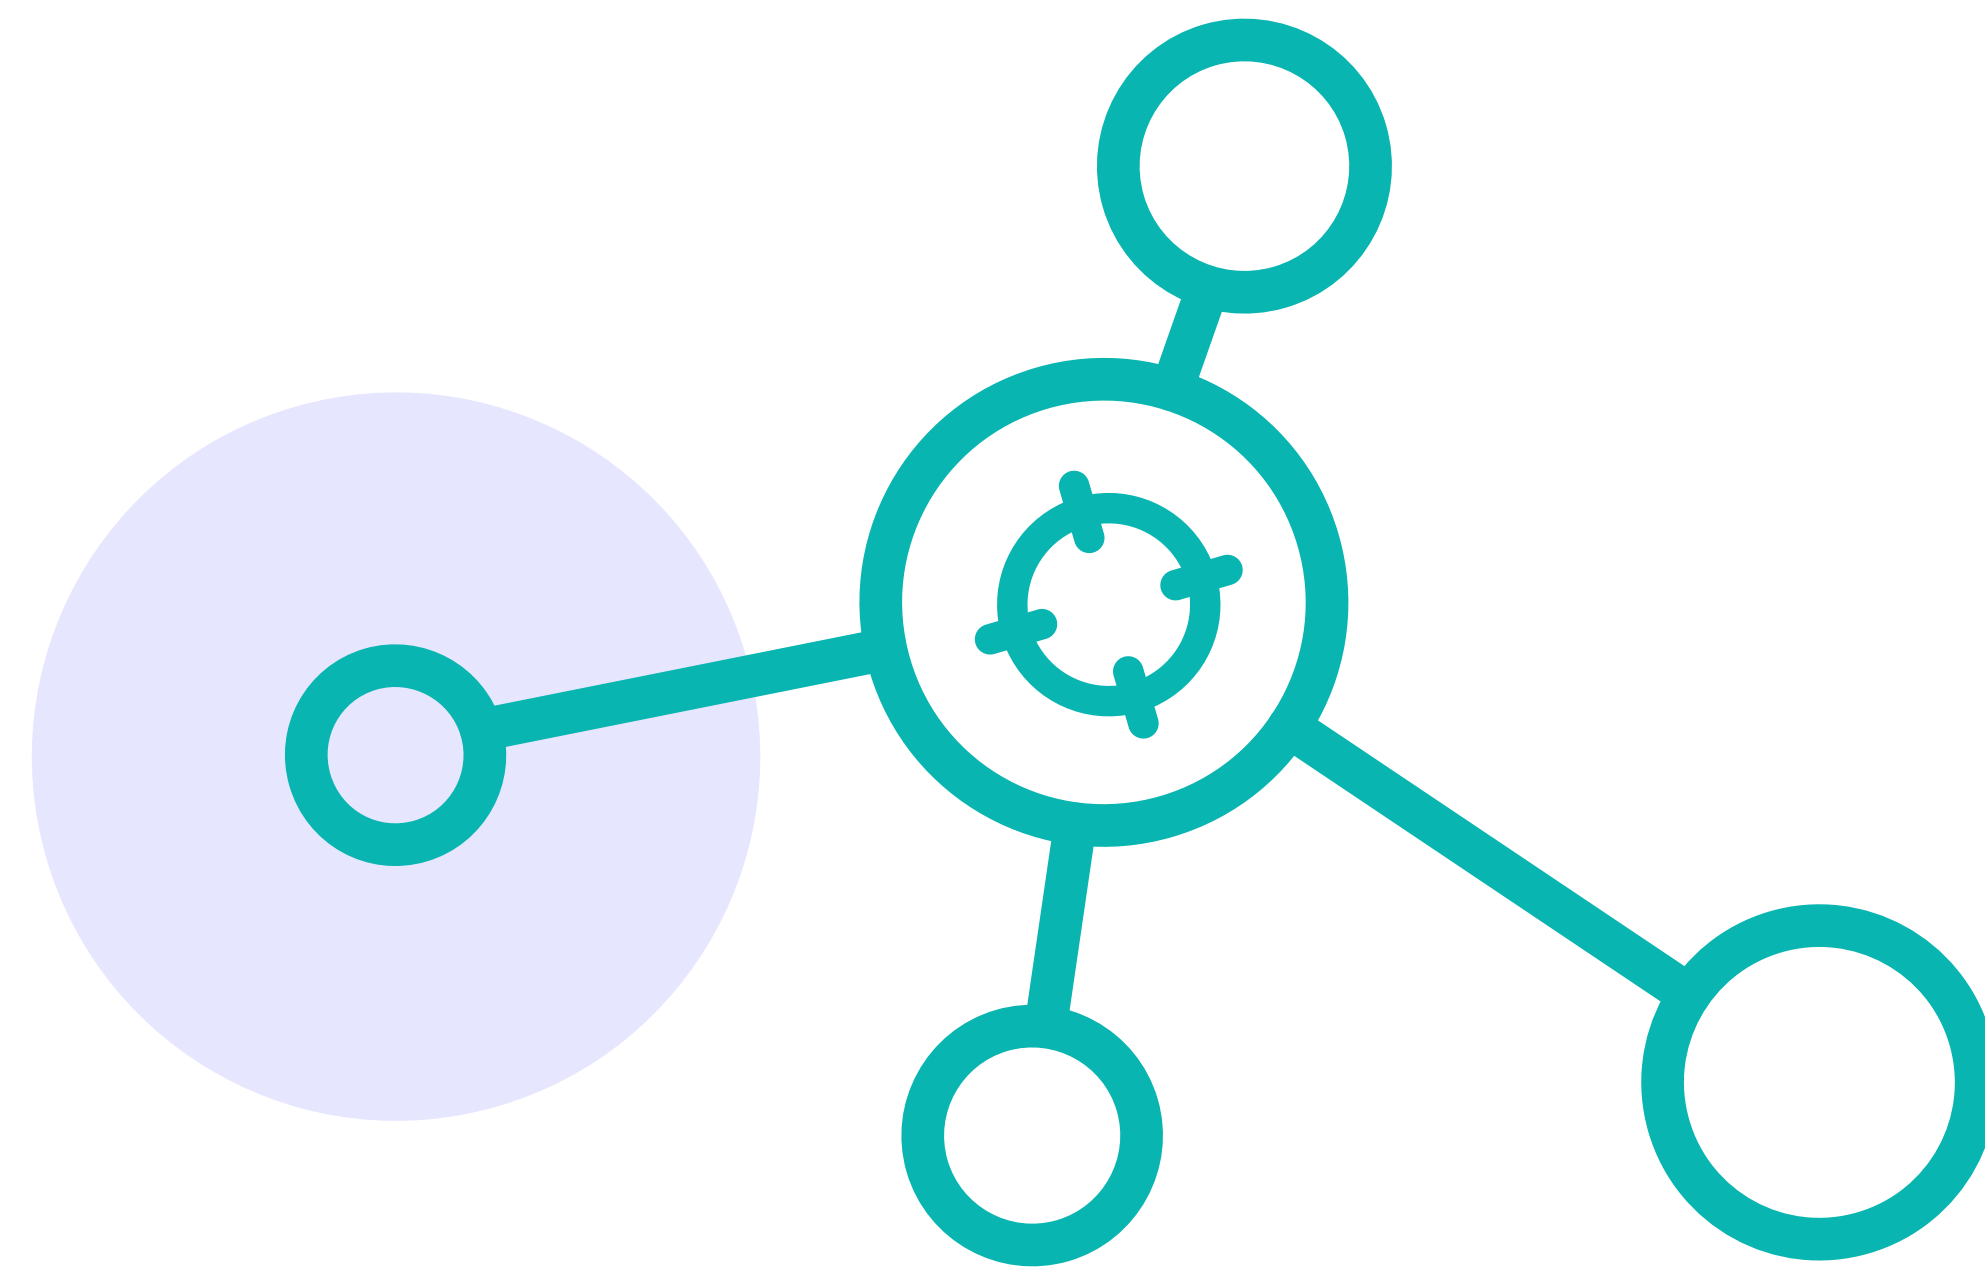

Use Business Driven
Test Automation to
Start Early &
Finish Faster

Swipe next >

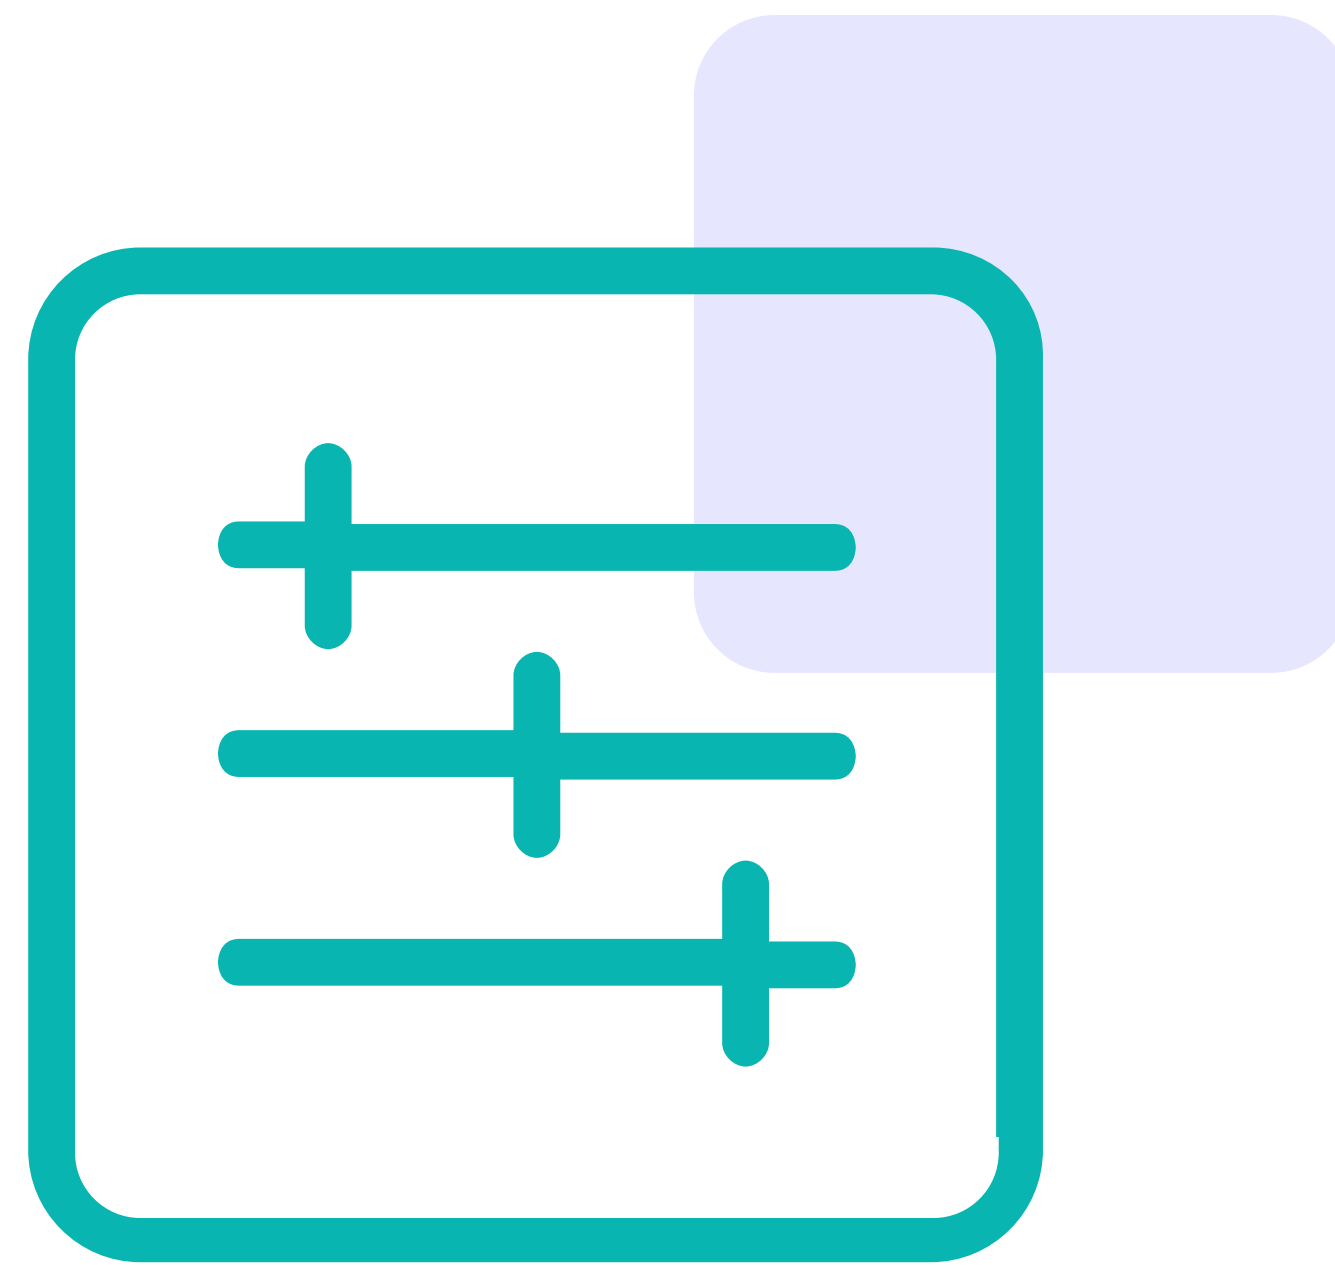

How to use BDTA?

Define the flow in your Language
like English, German or Dutch.

Define the flow using Keywords
like Login, Add Books etc.

Optionally, **add parameters as applicable.**
(Eg. Login: Username, Password).

Use the Run/Record feature to record steps and implement the Keywords.

How does BDTA help you?

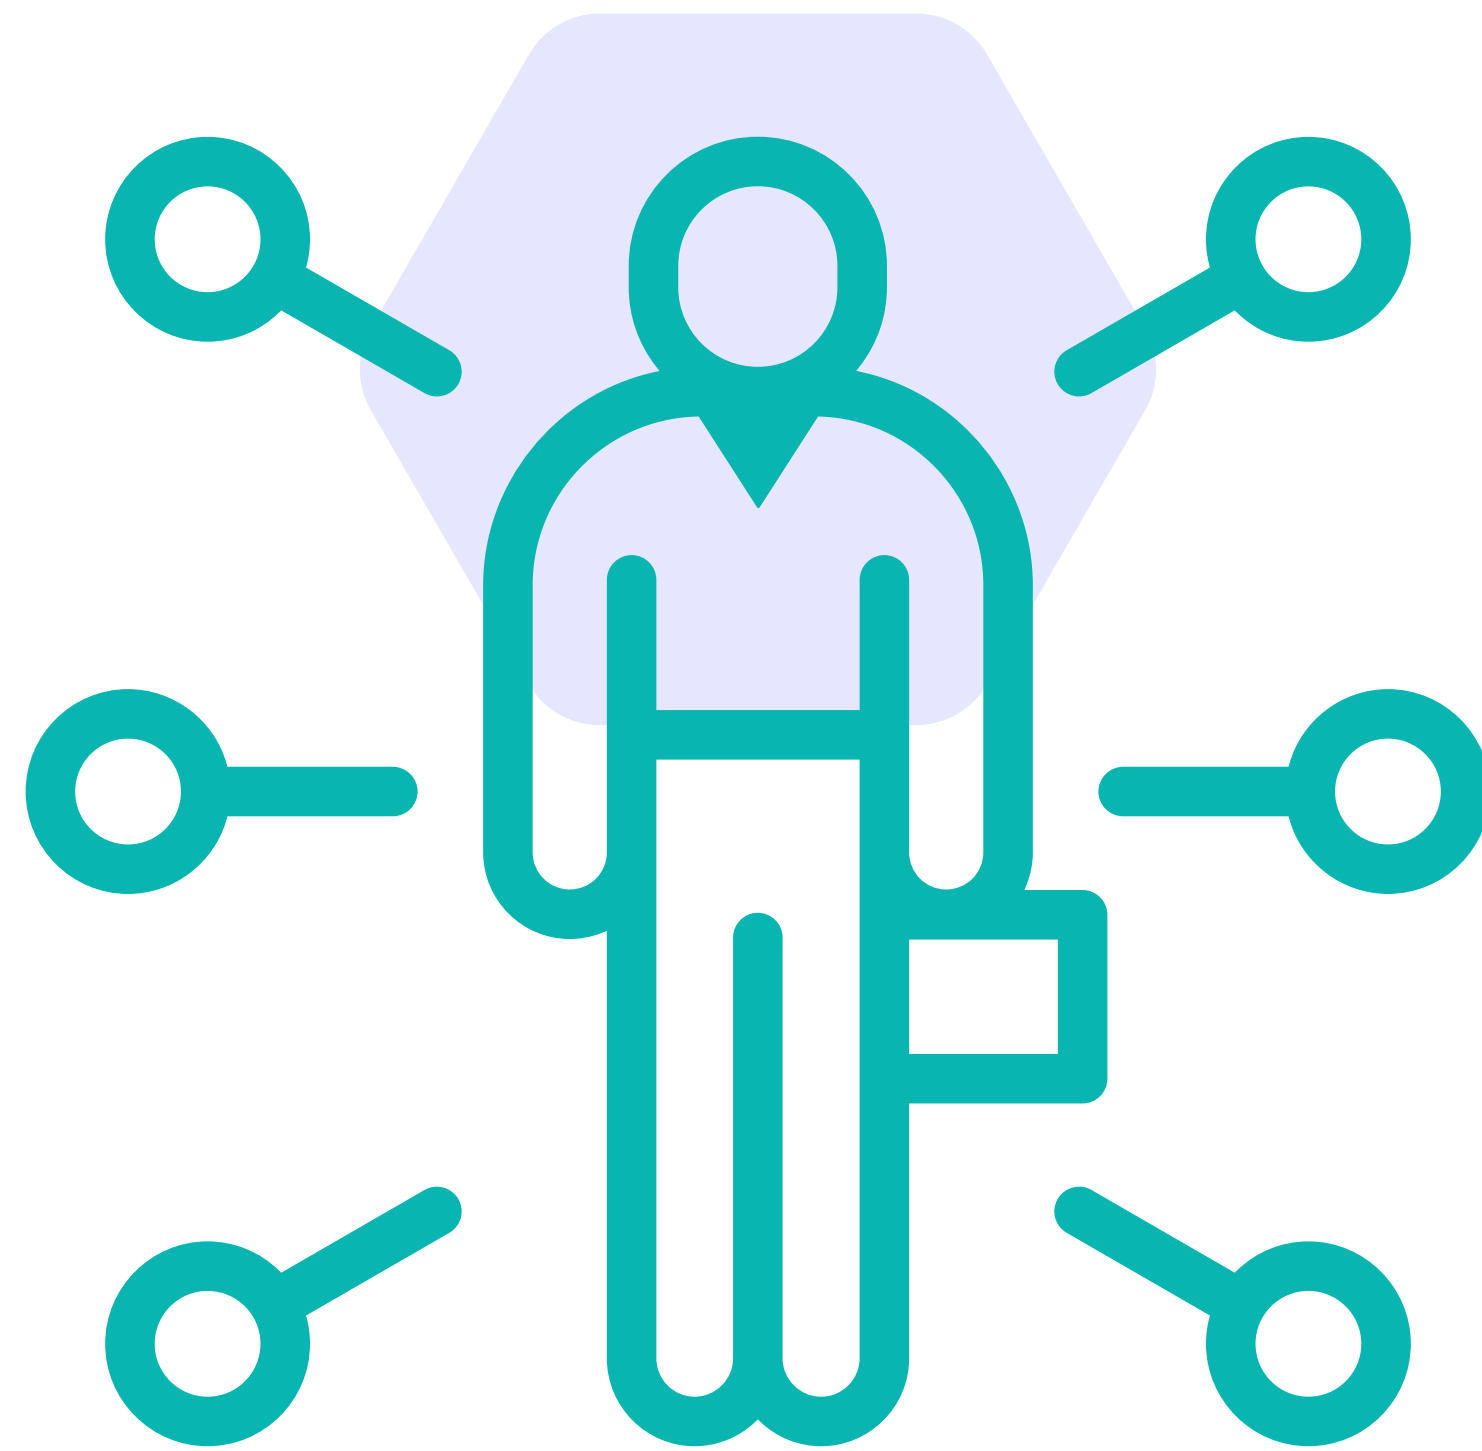

1. You Start Testing Before They Code

BDTA allows test automation to begin much earlier in the project lifecycle.

2. Involve BA & PM Right Away

Business personnel, testers, or project managers can be involved in creating scenario files as they are simple and business-centric.

3. Less Effort

This modularized approach leads to lesser maintenance time & effort!
