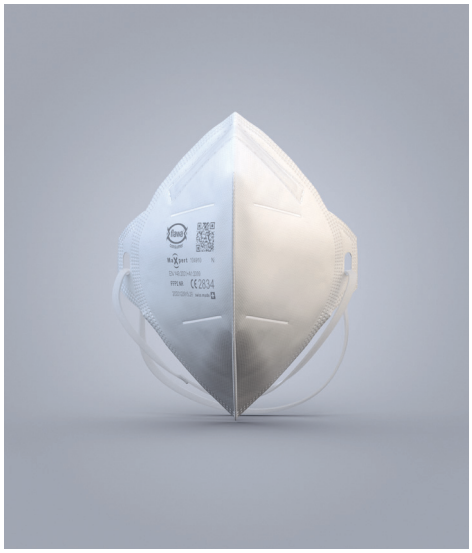
flawa consumer

Swiss Made

The present mask provides effective **protection of the airways against solid and liquid aerosols** in accordance with EN 149:2001+A1:2009.

Technical data sheet



Main characteristics

- Particle-filtering half mask of device class FFP2
- Penetration of the filter medium: max. 6%
- Verified inwardly directed leakage
- The mask is designed to be worn during one shift (NR)
- Design: five-layer fleece (outer fleece, 2x filter fleece/Meltblown, 2x inner fleece)
- Elastic head straps
- Nose clip for an optimal fit
- Flat design enabling space-saving storage

Review and conformity

The particle-filtering half mask meets the requirements of EN 149:2001+A1:2009 and the European Directive (EU) 2016/425.
The type examination and the conformity assessment procedure were carried out with the participation of the following accredited testing and certification body: CCQS Certification Services Ltd., Block 1, Blanchardstown Corporate Park, Dublin 15 D15 FWP6

CE 2834

Materials

The following materials are used for the manufacture of this product:

- Filter – polypropylene
- Rubber band – elastodiene/polyester
- Nose clip – metal/polypropylene

Application

The selection of the most suitable personal protective equipment (PPE) depends on the respective situation and may only be carried out by qualified persons.

Instructions for use

- The mask is intended for use during a single shift only and must not be reused.
- The mask must not be used:
  – if wetted by breathing air
  – if damaged / heavily soiled or no longer sealing tightly

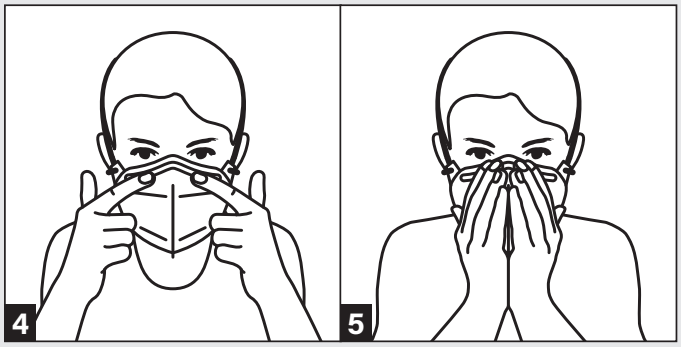
Putting on and fitting

Wash or disinfect hands before putting on mask.

Open the mask and pull the head straps parallel

Holding the mask on the outside with one hand, hold it to your nose, mouth and chin, press it gently against your face and slide both straps over your head with the other hand

Pull the lower strap below the ears and the upper strap over the back of your head



Press the nose clip down using both index fingers to shape it to your face

Ensure the mask fits correctly and tightly. Breathe in sharply and adjust fit again if not sealing tightly

Precautions for use

- The mask must fit tightly and completely cover your mouth and nose.
- Presence of facial and/or beard hair below the sealing line may compromise the effectiveness of the mask.

Removing and discarding the mask

1. Eyeglasses wearer: take off your glasses
2. Hold the straps with both hands, slide over your head and remove from your face with the mask
3. Take off the mask without touching the mask part and dispose of it in a closed waste container at the end of the shift at the latest
4. Clean hands
5. Eyeglasses wearer: put your glasses back on

Packaging units

- Primary packaging: bag containing 1 mask
- Secondary packaging: folding box of 25 masks
- Tertiary packaging: WP box containing 10 FS = 250 masks per WP box (ID: 769x316x242 mm, ED: 777x324x257mm)
- Transport unit: 21 WP boxes per pallet = 5,250 masks (3 boxes per layer, 7 layers per pallet, total height of the pallet 1.944 m)

Storage and Transport

The product must be stored and transported in the original packaging. For further storage conditions and shelf life, see the manufacturer's information brochure.
