

Backend Developer Role | full-time or part-time

At [NetNada](#), we are building the future of sustainable businesses by quickly analysing their sustainability performance and implement reduction strategies. We are looking for a highly motivated Backend Developer to join our rapidly expanding team.

We are a startup co-founded by UNSW alumni with the support of UNSW's Innovation Center. NetNada is experiencing fast growth and has currently joined the Catalysr Accelerator Program.

Essential Responsibilities:

- Develop, implement and support overall web architecture for multi-tenant SaaS platform
- Building and maintaining connections with 3rd party software using OAuth 2.0 API
- Working alongside founders to improve sustainability analytics dashboards

On your first day we expect you to have:

- Love for programming. Enjoy sharing. Willing to take the challenge.
- Passion to work in a Start-up environment and develop quality internet products
- Studying for or completed a Degree in Computing, Computer Science, Information Technology or related disciplines
- Familiar with modern web technologies, including any but not limited to PHP, Python, NodeJS, and RESTful API.
- Experience in relational databases

Good to have:

- Experience with automation using either Shell scripting, Python or other similar languages
- Understanding of basic financial and accounting language and terminology
- Familiar with data visualization best practices
- Previous professional or personal projects that demonstrate innovative use of public and private API
- Passion for the climate and sustainability
- Any special skills or experience which can expand the skill set of our company is highly valued

Why work with us?

- Open and transparent management structure – collaboration is how we make decisions happen
- Working in the sustainability space
- Career growth within this role, including leadership and product innovation opportunities

Please send an email with your CV and any projects you would like to be considered to afonso@netnada.com.au
