

Credentials with purpose.

We happily support these awesome change-makers. The C.TI credentials we provide recognize skills learned, and move people and organizations towards their goals.

Rapid upskilling - a growing need. Sept-2021

Supporting United Nations Sustainable Development Goal 4, UNESCO recognises that micro-credentials support learning in daily life and for employment. COVID has created a need for youth and adult learners – especially those already marginalized – to rapidly upskill and reskill to meet the market’s changing demands.

In preparation for The International Conference on Adult Education, CONFITEA VII in Morocco in 2022, we Tech provided micro-credentials to the speakers and participants attending UNESCO Bangkok’s event.

Changing unemployed lives. 2022-ongoing

ComIT helps change the lives of unemployed and underemployed Canadians by providing free technology and professional skills training, helping them get in-demand tech jobs in their community. In 2020, Google partnered with ComIT and launched a program for Indigenous students across Canada.

We provide C.TI credentials to recognize the skills gained and also to provide students with the experience of blockchain and digital identity technology.

Powering into tech roles. March-2022

International Women’s Day, a free workshop in Machine Learning 101 for women who are immigrants to Canada. Part of The Women in Technology program, the micro-credentials we provided recognizes skills learned and helps them secure the roles they’re set on in Calgary’s tech sector.

Supporting student voices. February-2022

For 40 years, The World Affairs Conference has brought thousands of high school students together - in Canada and across the globe - to discuss the world’s most pressing issues. In 2022 the theme was “Affairs That Matter’, has there ever been a clearer set of urgent collective challenges to address?

We’re proud to support these energized, determined, hopeful young people and provide digital credentials to attendees, recognizing their accomplishments and learnings.
