

Byte Case Study Vemco Group

Vemco Group is a 350 seat organisation with multiple sites nationally and embedded heavily within Telstra's product offering. Their core business functions are electrical distribution design, engineering, surveying and construction. They provide expert consultancy service and turnkey project management.

01. Challenge

02. Solution

03. Results

IT systems were physically insecure and had cooling issues.	Architected a Cloud solution to 'outsource' IT workloads.	Improved security and cooling while reducing energy costs.
Slow user experience when working remotely.	Hosting all services in the Cloud.	Faster access to services resulting in a better for remote users.
Internal IT team did not have enough capacity to provide support to the entire user base.	Bolstered internal IT team by providing Managed Services.	Delivered end users proactive IT support with responsive SLAs, improving relationship between IT and end users.
High IT overhead required to administer the core business application.	Custom developed a new core business application with streamlined processes.	Reduced IT overhead by 35%.
No business continuity or disaster recovery solution.	Architected Cloud based disaster recovery solution.	Introduced business continuity systems to prevent data loss and provide operational BAU systems in the event of a disaster.
