EXPERIENCE

Nordstrom • Software Engineer

Seattle, WA - May 2020 - Present

- Implemented features for SAM web application used in our Photo Studios to create and manage more than a million selling digital assets for the Nordstrom website using NodeJS, React, Angular and MySQL.
- Collaborated with cross functional partner teams to identify and implement project requirements.
- Developed several features to onboard the Nordstrom Rack teams to our in house Photo Studio tools to reduce and streamline overhead; meeting the MVP requirements 1-month ahead of schedule.
- Developed services in AWS to maintain the deployment and health of our application.
- Provided timely on-call support for our customers/application users.

Bamboo • Front-End Engineer

Seattle, WA - April 2019 - February 2020

- Created internal data visualization tools and dashboard using react-vis to facilitate the client services team
- Collaborated with back-end developers to build out tools that utilize and consume the Google and Facebook ad API

Ada Inc • Front-End Developer

Toronto, Canada - March 2018 - August 2018

- Improved the analytics dashboard by implementing a consolidated function that allowed users to download a well-formatted spreadsheet of their analytics data.
- Created functionality that allowed multi-language support, allowing us to market to a larger customer base.
- Implemented a chat transcript download system that allowed users to have access to logs of their chats.

Air Whistle Media • Front-End Developer

Burlington, Canada - June 2017 - November 2017

- Built and maintained web projects for company clients like WorldVision Canada
- The Worldvision.ca website won the 2018 Communicator Award's Award of Excellence, the 2018 W3 Silver Award, and the 2018 MarCom Gold Award.
