

Invitation to MAG Networking Reception September 19, 2021

Greetings, MAG Members!

My name is Marian Orr, the CEO of American CryptoFed.

CryptoFed is proud to be a MAG sponsor and host this networking reception of MAG 2021 Annual Conference attendees. Thank you to the MAG leadership team and staff help to make this possible.

Please accept my invitation to join us for this hosted MAG reception, 6:30-8:30 pm on Sunday, Sept 19th at the Hilton Orlando. Our team has exciting news to share with you at the reception - and we'll be brief! We know you've missed your colleagues and we want to socially engage with you as well.

The Miami-Dade Cryptocurrency Task Force (please see report below) is responsible for exploring the feasibility of receiving cryptocurrency and other digital monetary forms as an acceptable method of payment for county taxes, fees, and services, and they want your engagement as merchants as well. We look forward to sharing their message and invitation to you from Mr. Samir Patel, member of the Blockchain Task Force.

In addition to municipalities in Wyoming, Miami - Dade County and Miami City are emerging as a crypto friendly jurisdictions. We will explore the feasibility with these municipalities to launch our Ducat Economic Zone in Wyoming and Miami, in which these municipalities will accept our inflation protected stable token Ducat in its native form and receive additional tax donation from CryptoFed.

The key feature of this plan is that it separates monetary supply of Ducat and credit functions of the banking system. CryptoFed does not create monetary supply of Ducat, ex nihilo, but through the actual purchase usage and saving needs in real world economy. Merchants not only pay zero transaction fees to accept Ducat as payment for goods and services, but also receive 1%-4%

rewards for every purchase transaction made in Ducat, while consumers receive 5.5% - 12% rewards. All rewards are paid by CryptoFed as a method (fiscal policy) to put Ducat into circulation (not as costs), to directly drive effective demand for generating maximum employment. For holding Ducat, CryptoFed pays 3% - 5% annual interest in Ducat as a method (monetary policy) to adjust saving and spending for deterring and curing possible inflation. The range adjustment of rewards and interest will be optimized over time via machine learning with the accumulation of historical data. CryptoFed's business model is driven by rewards and interest paid out, and the stability of Ducat currency, not revenue. Zero inflation is the only and ultimate restriction for CryptoFed to pay out rewards to consumers, merchants, local governments, and Ducat holders.

For this reason, I formally invite you as an individual to join our Ducat Economic Zone. We hope you can help us grow the Zone, improve the CryptoFed Constitution, and participate discussions with city governments from merchant's perspective. In return, Merchant attendees are eligible to receive a grant of 10 million Locke Governance tokens per person. Locke grants are restricted and untradeable until the SEC declares CryptoFed's Form S-1 filing effective, and the price of Locke is sustained above \$0.10 USD on compliant exchanges. You will need to sign one page agreement to accept the grant and the Constitution which are available at our website <https://www.americancryptofed.org/> together with all the SEC filings, such as Form 10, Form S-1, Ducat Economic Zone, etc.
