

VIVA the secure voice assistant for your enterprise

POWERED BY IBM WATSON AND IBM HYPER PROTECT

BUSINESS PROBLEM

Your conversations should be yours only, but they're not...
You don't own the security controls of your voice assistant
no solution meets the strong requirements for the enterprise

BUSINESS SOLUTION

Stores your conversation on the IBM Hyper Protect Virtual Server (HPVS) protected by FIPS 140-2 Level 4 HSM
Uses IBM Watson
An API Gateway for your Enterprise Applications,

VIVA conversation data encrypted with FIPS 140-2 Level 4 protection
You own the security controls, not cloud operators
Deploy VIVA on-premise or hyper protected IBM Cloud securely

MAXIMUM SECURITY

YOUR DATA IS YOUR DATA

Developed with maximum security in mind, Conversation on the IBM Hyper Protect Virtual Server (HPVS)

Protected by FIPS 140-2 Level 4 HSM

Uses IBM Watson, the secure API Gateway for your Enterprise Applications, enabling most applications to be conversational.

MAXIMUM PRODUCTIVITY

A NEW LEVEL OF EFFICIENCY

Vicom Infinity will work with you to create your own version of Secure Voice Assistant. Protected by IBM Hyper Protect Services

MAXIMUM COMFORT

MORE THAN A VOICE ASSISTANT

Secure & Enterprise-ready Voice Assistant gives freedom of processing your business conversation securely using Voice User Interface

Powered by IBM Hyper Protect Virtual Server, IBM Watson, and Privakey for biometric authentication.

API service endpoints IBM Hyper Protect Virtual Server

VIVA NLP API service ZOWE, MIPSBot, Finance API

Privakey CX server IBM Hyper Protect Virtual Server

Secure & Enterprise-ready Voice Assistant gives freedom of processing your business conversation securely using Voice User Interface, powered by IBM Hyper Protect Virtual Server, IBM Watson, and Privakey for biometric authentication. Our Natural Language Processor API gateway as well as Privakey CX server run on HPVS which makes using voice assistant app for enterprises easy and more secure at a very competitive cost.
