INSIGHT TERRA – THE COMPANY

Insight Terra is an innovative new SaaS business that is taking a leading position in the application of an integrated edge and cloud-based data management platform to the increasingly important field of environmental and infrastructure risk management. Climate change and ever-increasing scrutiny of an organisation’s sustainability and societal impact is creating a significant opportunity for the provision of insightful monitoring, analysis and visualization of critical data, and Insight Terra is doing just that.

The Company is headquartered in London with key operations in the U.S., Europe and South Africa and has a globally distributed software engineering team. Following 24 months of development between Inmarsat in the UK and Civic Connect in the US, Insight Terra was formed from a spin-out by Inmarsat in August 2021, merging with Civic Connect and attracting significant venture capital funding to position the company for rapid growth to scale.

With a global footprint, relaxed, creative, and quality-focused culture, Insight Terra is a great place to work and be part of a dynamic team with purpose and meaningful values.

POSITION DESCRIPTION:

Staff / Sr. UX/UI Web Product Designer – SOFTWARE R&D

The Company recently closed on a funding round and is seeking to expand the Technical Leadership team in preparation for the scale-up of our Customer Product Deliveries. The Company expects to see a significant growth and ramp-up in customer deployments over the next 3 to 5 years.

The selected candidate will work directly with the Company’s existing seasoned Founding Product Leadership team along with the technical team to further enhance and develop our Software Product deliverables, while also helping to further the Company’s goal of making a positive impact on people’s lives and the environment.

This is an exciting opportunity for the right individual who will play a pivotal role in the Company’s growth, strategy, and ultimate success.

Key roles and responsibilities:

- Define and design the UX/UI of a data-driven, responsive web application (mobile experience is a plus).
- As part of the team, help define, design, and document the application user stories, along with detailed interaction and visual design specifications.
- Create process flows, user flows, conceptual diagrams, information architecture, wireframes, and mockups to effectively communicate high-level design strategies and detailed interaction behaviors.

- Develop and maintain a scalable design system with a design architectures, application design, and appropriate design artifacts necessary for the technical team to develop the web application.
- Identify and troubleshoot UX problems, and provide design recommendations in response to product needs and customer requirements
- Work with marketing team to generate product collateral.
- Develop interactive Storyboards to demonstrate product concepts. (InVision experience is a plus).
- Design for usability, quality, code reusability, and application feature scalability.

Desired background and experience:

- 5-10 years' experience in web and/or mobile UX/UI design.
- Bachelor's degree in Web Design, Interaction or relevant field, or equivalent practical experience.
- A portfolio demonstrating excellent UX design skills for solving complex problems with clear results.
- Expertise in core design skills including the development of scalable design systems, information architecture, personas and user scenarios, user stories and flows, and product features.
- Deep understanding and appreciation for website and web app UX/user centered design, data-driven UI design patterns and state of current technologies.
- Experience with conducting and analyzing the results of user research and usability testing to improve UX.
- Extensive experience with creative software including Adobe (Photoshop, XD, Illustrator) and InVision.
- A solid knowledge of ReactJS, JavaScript, HTML/CSS and/or coding experience for UX to be conversant with engineering and technical discussions.
- Experience collaborating with cross functional teams across multiple time zones.
- Expertise in motion and animation effects is a plus.

Work Environment:

- Target start date of January 2022 or earlier.
- Salary based on experience and qualifications.
- Eligible for equity and pay incentives.
- Full Company benefits.
- Remote working environment in the Dublin, Ireland and greater London area preferred—other remote locations considered for the right candidate.
- Must be available online minimally during operating business hours (GMT+1).

Insight Terra is committed to building a diverse and inclusive workforce; Insight Terra expects all employees to directly help create and foster such an environment.
