The \$NEKO token

# Introduction

Sakura Neko is a next generation meme coin that aims to build utility by building it's own metaverse world and economy. We felt that this was the most natural evolution of meme coins to ensure their survival.

Our vision  
The club Neko  
Metaverse

# Club Neko

**We're building the future home of Sakura Neko  
and the largest meme coin game in the  
metaverse.**

We're creating utility for \$NEKO by building a P2E game, community owned assets as NFTs, and a metaverse called Club Neko where \$NEKO holders can meet and hang out.

We aim to partner with other meme coins to bring them into our metaverse.
