

SHEQ Manager

Category

SHEQ

Based in

Lancaster, UK

Line Manager

CEO

Salary Range

£40,000-£50,000

About Us

Founded in 2017 by veterans of the industrial gases and hydrogen fuel-cell industries, NanoSUN is a fast-growing engineering company that develops novel cascade hydrogen fuelling technology for a wide range of hydrogen powered applications, where high pressure, safe and cost-effective hydrogen storage, distribution and dispensing solutions enable end users to operate zero-emission products.

Based in Lancaster we are uniquely placed close to the Lake District National Park, and the small city of Lancaster for local amenities, good schools and outstanding natural beauty. NanoSUN's team of highly experienced industry experts, coupled with early career engineers and scientists, is currently dedicated to the provision and scale up of its core product offering, the mobile Pioneer Hydrogen Refuelling Station (HRS). With a clear focus on accelerating hydrogen transportation across the UK and Europe, our innovative and convenient hydrogen refuelling system is specifically developed to facilitate hydrogen mobility and rapid, low-cost deployment of the support infrastructure needed to encourage the adoption of hydrogen vehicles from buses and heavy-duty trucks to construction and material handling equipment.

As a company driven by the twin goals of reducing carbon emissions and local air pollution, NanoSUN's primary objective is to supply optimal solutions for delivering hydrogen in the endeavor for hydrogen to become a major energy vector in a decarbonised world.

About the Role

Reporting directly to the CEO as a safety, health, environment, and quality (SHEQ) manager you will play a pivotal role in the development of a rapidly growing company. You will be responsible for leading a small team to ensure quality, health and safety, and environmental best practice within the company. NanoSUN currently holds ISO9001:2015 accreditation, is working towards ISO45001:2018 accreditation and intends to implement ISO14001:2015 management system shortly. You will coordinate company systems to ensure best practice and continual improvement.

The Role:-

- To lead a small team ensuring health and safety and quality standards are met within the framework of ISO 45001/9001 respectively
- Developing the company's environmental management system and leading the company through the accreditation process

- Creating and developing safety, quality and environmental policies and procedures and ensuring implementation across the company.
- Leading non-conformance investigations
- Developing and managing provision of all SHEQ training to ensure all workers understand the systems in place and best working practices
- Design and delivery of toolbox talks
- Working proactively throughout the company to establish and maintain a program of continuous improvement
- Ensure that data regarding SHEQ performance is effectively captured and analysed to enable improvement plans to be developed
- Reporting to the board and management team on compliances within each standard
- Proactively working with operational teams during projects' life cycle to ensure SHEQ is considered at all stages together with relevant control measures
- Monitoring, evaluating and reviewing new and upcoming H&S legislation and ensuring systems and procedures are in place to meet legal compliance.
- Ensuring all workers identifying potential hazards
- Responsibility for risk assessment and incident management system processes

About You

Essential

- Computer literacy – MS Office
- Previous experience of leading quality, safety, and environmental management systems within a company

Desirable

- IEMA qualification
- Member of IOSH

What we Offer
