

## DEMOCRATIZING CLOUD SECURITY

Prevasio's agentless SaaS cloud security solution combines the power of:

Get all the information you need directly from a central dashboard

Get a unified view of all security issues found in your AWS/Azure/GCP setup. The security issues are classified by related assets and prioritized according to severity.

Spend your time where it matters most through prioritized cloud risks

Build a prioritized risk list according to CIS benchmark, HIPPA and PCI regulations, allowing your team to focus on what matters most.

Uncover hidden backdoors in your container environments

Prevasio is the only solution that provides container-security dynamic behavior analysis coupled with static analysis. This unique capability enables you to uncover hidden backdoors and supply chain attack risks, as well as vulnerabilities and malware.

## About Prevasio

Prevasio, an AlgoSec company, helps organizations of all sizes protect their cloud-native applications across containers and all other cloud assets. Prevasio's agentless cloud-native application protection platform (CNAPP) provides increased visibility into security and compliance gaps, enabling the cloud operations and security teams to prioritize risks and ensure compliance with internet security benchmarks.

Acquired by AlgoSec in 2022, Prevasio combines cloud-native security with SRI International's proprietary AI capabilities and AlgoSec's expertise in securing 1,800 of the world's most complex organizations.
