About Tonica

Hello! My name is Iris and I'm the design director of Tonica Brand Lab. Thank you for considering us for your brand identity and design needs. We're excited to collaborate with you!

Tonica Brand Lab was born out of a deep passion for the health and wellness of people and the planet. I have always been a lover of nature, beauty, movement and quality nutrition.

I was then surprised to receive a cancer diagnosis in my early 30s, followed closely by the global pandemic. These two sobering experiences opened my eyes to the disappointing state of our healthcare system and the shared terrain of which we inhabit. Important messages of wellbeing do not always reach the greater public and advice for a good long life are not reflective of current research (or manipulated by industry). The patient and dis-ease are not viewed and treated holistically and healthcare seems dis-proportionally reactive instead of pro-active and preventative. With the amount of disconnection from our inherent interdependence from our environment and each other, it has never been more important to give a voice to integrative healers.

In 2021, after running a successful multi-disciplinary design practice for over 14 years, I decided to funnel my expertise specifically into serving brands that are pioneering a change in the collective wellness of the Earth. It is with a great sense of purpose that I offer these services to you, with the intention of empowering you as a business as well as every individual that is engaged with your brand.

Our Process

1

BRAND CLARITY

In our initial discussion we will get to know your brand; From qualities to customers, voice and vision. We'll collect and discuss any visual examples or ideas that you may already have started on.

If you have not yet developed a detailed brief, you'll be provided with a short brand clarity PDF workbook or Brand Discovery session before we commence.

2

RESEARCH & IDEATION

From the brief, we'll explore various sketched solutions before refining the best options in digital format. Concepts are considered for their creativity, personality, brand positioning, usability and appeal to your target audience.

3

PRESENT & REFINE

We'll present the 2 best design concepts that define the visual direction of your brand. These will include logo designs, brand fonts, colours and general style elements.

3 rounds of revisions are included to your chosen concept.

4

STYLE GUIDE

Everything we've created will then be conveniently presented in a brand style guide, detailing your new assets. This document will ensure your brand's new visuals are used correctly and remain consistent throughout all of your future materials.

5

DELIVERY

Your final package will include logo files, style guide and all relevant fonts and images.*

Your new logo is provided in high resolution, web and vector formats, full colour, mono and reverse; Ready to use in any situation, across multiple applications.

**It is your legal obligation to license fonts and stock photos under your name before use. This is a fast and easy process that we can guide you through. All additional costs will be discussed before proceeding.*

MAGICAL SHIFT

#1

The Universe Starts To Work Through You

The minute you decide to listen to your intuition and align with your Soul's Divine Gifts, and you intentions, the Universe starts to work through you to actualize those intentions, which are guaranteed to bring you fulfillment.

The Universe KNOWS what you're aligned with and where you have resistance. It knows what your mind's limitations are and so it brings to you the experiences in a way that you can receive them. It surpasses the limitations of the ego mind through baby steps.

The Universe also knows the fastest route to your true destiny, and will bring you what you need in a way that you can receive it.

"The Universe knows the fastest route to your true destiny, and will bring you what you need in a way that you can receive it"

When we allow our mind, which has a narrower perspective, direct us, it will try to guide us from that narrow perspective. Essentially our mind will try to (a) set intentions based on an "external" view of the world (who's been done and is "acceptable") and (b) take us straight up the mountain as the only viable route to where we want to go. It's hard, there's struggle, there's pain and it's the surest way to give up. Most important, it is far from fulfilling.

08

The Universe, on the other hand, will take you on a longer, more scenic route that will actually get you there faster, with greater ease and with significantly more passion, fun and fulfillment.

When you set Soul-aligned intentions, which come from an inner knowing and guidance, and you surrender to the Universe, it will bring to you what you truly NEED at this moment in time. NOT what resistance to where you need to be. It might seem like a longer route, but ultimately it is faster, easier and far more fulfilling.

When I used my logical mind and subsequently resisted and persisted in my own journey, it became hard and painful and I ended up losing my passion and drive. So when I finally decided to let go (I literally surrendered to the Universe), I received what I truly NEEDED in that moment of time as it explained in the next section. The Universe did not try to force me to accept what my intuition was telling me. It took me out of that situation completely because I was extremely depleted by then. I was literally given a "time out" in order to re-fulfill and receive a renewed sense of passion that I had lost along the way. It took me on what seemed like a much longer route (2.5 years), which ultimately brought me to where I am today. Aligned with my Divine Gifts, fueled with energy and passion and creatively expressing myself in the way my Soul intended.

Testimonials

"I started out my work with Iris for full re-branding of my business. I selected her because of the impeccable reviews she had. Yet, she still managed somehow to exceed my expectations! From the first round, she fully got and delivered on my vision. Since then, we have expanded our work engagement to do a full redesign of my website, opt-in forms, and Ebook. Everything was always spot-on, from the look-and-feel to the color palette to the images. I rarely had to request changes. I highly recommend that you work with Iris. Don't think twice. This job has been the best investment I've made on my business so far."

– MONA SHIBEL

Author, Speaker & Soul-aligned Coach

We've been working with Iris for years and she is the only designer we ever want to work with! This job has been updating our branding and Iris's advice and skill has been instrumental in ensuring our brand stays fresh and current. She has exceptional ideas and really takes the time to understand what we do and what we are trying to achieve. I highly recommend Iris to anyone who wants to work with a designer who cares for your business like its their own."

– GLOBAL SUCCESS ACADEMY

Life Coaching

"Iris is extremely intelligent and talented. She pushed me to think about my new business in a completely new way and led me in a new path that has proved to be very successful. Not only is she a skilled designer, she has a bright, strategic mind that lends so much to the projects she touches. I would (and have) recommended her to friends and colleagues. I am located in Toronto, Canada and did not find the time zone difference to be of any issue."

– JOAN + COMPANY

Ecologically Conscious Interior Design

Working with Iris has been the best decision I've made in regards to my business. From the start, her outstanding professionalism and attention to detail was noted, along with her holistic view of life which is portrayed beautifully through her work. Her branding service has aligned the vision for my business with my own values and strengths, creating clarity and attractive graphics that my clients love. I couldn't recommend Iris enough. She is a beautiful person inside, and out, and to have such amazing content that reflects me as a person and the core of my offering, is an absolute dream."
