

Work Orders

The most robust, comprehensive, and customizable work order system available in the healthcare industry. Includes **9 applications** designed from the ground up by facility directors and surveyors to provide compliance-centric healthcare solutions.

Not Your Typical CMMS

Unlike other systems that were designed for one purpose, Soleran's Work Orders Suite has all the traditional functions of a CMMS with a world of expanded capabilities and a robust mobile app to keep techs moving.

- ✓ Make web, mobile, and portal-based work order requests
- ✓ Schedule asset maintenance and events
- ✓ Easily manage and schedule rounds and anti-ligature assessments
- ✓ Attach documents and photos
- ✓ Document complex or simple risk scoring methodologies
- ✓ Associate Standards, manufacturer/model, and literally any other asset you need

Control every detail

Take complete control of your tasks, inspections, corrective and preventative maintenance, and planned events with automation.

- ✓ Control at a granular level the permissions to data, fields, and functions any role has
- ✓ Automate contract renewals and labor time
- ✓ Create reports on any work order, asset maintenance, labor, and more
- ✓ Improve efficiency with limitless analytics
- ✓ Write on any map of any area/floor plan

Efficiently Close Out Work

Once a work order is submitted, we'll handle the rest. Our automated workflows and processes allow you to stop paper-pushing and get you back to doing what you were hired to do.

- ✓ Mass update anything in the system
- ✓ Auto-assign work orders by type, classification, area or any other factor
- ✓ Tickets and notifications route automatically to the appropriate party
- ✓ Automate reminders and escalations
