Project Manager

Overseeing every step of your project management process from start to finish, Soleran's Project Manager Suite includes **5 applications** that will streamline your project planning and execution.

Project planning just got easier

Closing the loop on a project is simple with Soleran's integrated processes, automated workflows, and easy-to-use electronic approvals and assessments.

- Generate reports and documentation
- Move projects along efficiently and with less data entry Assess your hospitals project risk
- Automatically generate ILSMs and route deficiencies Customize dashboards to support process improvement

Complete construction management

Manage every detail of your next construction project with automated processes and workflows.

- Create projects and enter milestones/tasks
- Complete projects through invoices and purchase orders
- Determine risk for any project & manage it with daily monitors through completion

Up-to-date & easy to access life safety

Upload all your life safety drawings in one complete and searchable database.

- Update drawings as they are refreshed for up to the minute accuracy
- Place assets on the drawings and "mark them up" with notes, annotations, drawing marks, and more
- Invite someone else to view a drawing with you and mark-up together
