

What is ICM?

Integrated Compliance Management (ICM) is a centralized platform that connects external and internal processes with shared data in real-time.

- ✓ Creates actionable dashboards
- ✓ Instant reports
- ✓ Processes for seamless collaboration

ICM ensures all outstanding processes are completed automatically, closing the loop, while providing flexibility to adapt to future needs. A comprehensive ICM platform makes accountability and efficiency achievable.

Who is ICM for?

An Integrated Compliance Management (ICM) system is for any business or organization, large or small, needing to manage multiple facets of regulatory compliance under one umbrella.

Why does ICM matter for your business?

To put it simply, it is about control. It's about taking control of every aspect of your facility and knowing what's happening in every department and in real-time.

- ✓ Increased efficiencies
- ✓ Fully integrated tools within a single platform
- ✓ One system, one cost
