Security Manager

✔ PCRA

✔ ICRA

✔ ILSM

✔ Construction Project Manager

✔ Change Order Manager

The idea is to do proactive maintenance instead of reactive. It wasn't possible before Soleran to the degree we needed.

- Hurley Medical Center

Features & Benefits

Project Manager Suite allows you to create date-bound milestones for your projects & budgets. Tracking high-level components and contingencies for all your projects (like new capital expenses) is a piece of cake. POs and invoices are created in a matter of seconds. All your personnel can make changes quickly and automatically with real-time syncing of records.

32

Comprehensive, real-time reports and dashboards

- Send automatic notifications to managers on projects about pending assessments, precautionary measures deadlines, and monitoring survey dates.

- View & share multiple designs

- Make design changes in real-time

- Automate & document processes for interim life safety measures and infection control risk assessments

- Manage pre-construction risk assessment processes from completion of all assessments to generating required documentation

- Communicate automatically between members of your multi-disciplinary team to approve and verify all work is done and closed out

- Generate a specific task list from assessment results and daily monitoring survey based on the specific risks identified.

System Requirements
