

## **TECH LEAD**

### **Full time remote**

*We are looking for a technical lead with proven Solidity & management experience. You will be joining a highly technical team that has deep knowledge of DeFi and all the cool things from the blockchain ecosystem.*

### **Responsibilities**

- Able to roll up your sleeves and play a hands-on role while building a world class team; write high quality and well tested Solidity/Substrate code, following the latest design and development patterns
- Document the requirements and the architecture and design proposed to provide the software solution
- Research, design, scope and estimate what you need to do
- Collaborate with the UI team
- Constantly improve yourself by keeping up to date with the latest technologies trends
- Provide leadership and support to the development teams
- Provide project status information to the other stakeholders
- Overall project drive and steering from a technical perspective

### **Requirements & skills**

- 2+ years of experience writing, testing, deploying and verifying Solidity applications including working with various L2s or side chains.
- 5+ years of work experience in software management with a proven history of delivering new, consumer-facing software products to market
- Understand how Ethereum works under the hood
  - Understanding how Ethereum stores state and related data structures
  - EVM knowledge - opcodes etc.
  - Solidity and knowledge of ABI (eg. variable mapping to storage slots)
- Have experience with
  - GraphQL API
  - Ethereum blockchain test tools (e.g.Truffle, Embark, Hard Hat, etc.)
  - Experience with writing automation test
- Have experience with server virtualisation and containers technology such as Docker
- Highly efficient communication skills, able to interact at various levels of the organization, from individual contributors to upper management
- Demonstrated ability to deliver with deep understanding of business mechanics
- Have and develop knowledge of trends, relevant software development technologies, design patterns and methodologies
- Being able to work in a team environment, take part in audit sessions (and create remediation documents) and follow Agile-like processes

- Being passionate about crypto space (new developments tools releases and latest features of the solidity language)
- Being able to work in a fast paced environment (you know, crypto?)
- Written and spoken communication skills in English for professional environment

Nice to have:

- Experience with Substrate (creating a parachain, custom pallets)
- Cryptography experience

**Benefits of working at Composable:**

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- Paid days off
