

## **BACKEND DEVELOPER - SOLIDITY**

### **Full time remote position**

*We are looking for a software developer with proven Solidity experience. You will be joining a highly technical team that has deep knowledge of DeFi and all the cool things from the blockchain ecosystem.*

### **Requirements & skills**

- 2+ years of experience writing, testing, deploying and verifying Solidity applications
- 5+ years of programming experience
- Know how to document your work and make it simple for the UI team to integrate what you're creating
- Being able to work in a team environment, take part in audit sessions (and create remediation documents) and follow Agile-like processes
- Being passionate about crypto space (new developments tools releases and latest features of the solidity language)
- Being able to work in a fast paced environment (you know, crypto?)
- Written and spoken communication skills in English for professional environment

Nice to have:

- Worked with L2s or different side chains
- Understanding of low level parts of ethereum blockchain, specifically
  - Understanding how Ethereum stores state and related data structures
  - EVM knowledge - opcodes etc.
  - Solidity and knowledge of ABI (eg. variable mapping to storage slots)
- Experience with
  - GraphQL API
  - Ethereum blockchain test tools (e.g.Truffle, Embark, Hard Hat, etc.)
  - Experience with writing automation tests

### **Responsibilities**

- High quality and well tested Solidity code, following the latest design and development patterns
- Write documentation, design flow diagrams and review PRs
- Research, design, scope and estimate what you need to do
- Collaborate with the UI team
- Constantly improve yourself by keeping up to date with the latest technologies trends

**Benefits of working at Composable:**

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- Paid days off
