

## **Senior Backend Developer [DeFi]**

### **Full time remote position**

*We are looking for a passionate backend developer with solid experience and no fear of learning new things. Are you a data-processing master? Do you “speak” blockchain technology? Are you a quick learner when it comes to new technologies, frameworks, or libraries? Do you want to work with the latest technologies used in the blockchain world? If you answered yes to most of the questions then we are looking forward to working with you.*

### **Main Responsibilities will be:**

- Develop backend for web3 frontend apps
- Collecting and processing data from blockchain and storing in the off-chain database
- Using the latest technologies in serverless world with AWS

### **Requirements & skills**

- 5+ years of programming experience
- Collect, process, store and retrieve data from the EVM based blockchain
- Understand the data stored on the blockchain and emitted by the transactions and how to retrieve them - view functions, events, etc.
- Be able to discuss the database model for several projects
- GraphQL, Rest
- Typescript
- Experience with AWS DynamoDB, Lambda, EC2 (or any linux-based virtual machines)
- Written and spoken communication skills in English for professional environment

### **Nice to have:**

- Experience using serverless framework
- Experience with thegraph
- Experience with Solidity
- Experience in DeFi

### **Benefits**

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- Paid days off
