

Senior Polkadot / Substrate Rust Developer Lead

Full time remote

We're looking for a senior software developer with proven Rust experience, working knowledge of Substrate, and general familiarity with blockchain technologies.

Responsibilities

If you join this role you will be able to:

- Lead a development team focused on building a parachain
- Manage a team of 4 rust substrate developers
- Sync with Ethereum developers building other things in the space

Requirements & skills

We are looking for someone that:

- Has experience working with Rust, Substrate
- Has background in building distributed systems
- Developing decentralized high-performance systems
- Can analyze and optimize the platform's performance
- Has idea of running tests in a distributed environment
- Has experience with security audits of third-party and internal solutions
- Has been involved in Devops responsibilities working together with blockchain nodes
- Is interested in the Polkadot ecosystem
- Ability to design, research and develop blockchain-based solutions
- Understands how to improve engineering standards, tooling, and processes
- Write and review technical proposals - Writing, testing, and deploying high-performance networking code
- Programming and optimizing rust / wasm based smart contracts
- Developing infrastructure software

Nice to have:

- Experience running large projects with a git hosting service (github organization will be needed for this project)
- Cryptography and system software development experience

- Understanding of design patterns and networks
- Ability to design algorithms and mathematical models
- Has experience with Virtual machines used by modern blockchains: WebAssembly, EVM, COSMWASM

Benefits

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- Paid days off
