

Quality Assurance - Blockchain

Full time remote

We are looking for a QA engineer with proven blockchain experience. You will be joining a highly technical team that has deep knowledge of DeFi and all the cool things from the blockchain ecosystem.

Requirements & skills

- Analytical, disciplined and detail oriented
- You have a high-quality awareness and understanding of the business process
- 3+ years of experience in testing and/or software development
- Know how to create a mind map for the product you are testing (experience in writing clear, concise and comprehensive test plans and test cases)
- Being passionate about crypto space (new developments tools releases and latest features of the solidity language)
- Being able to work in a fast paced environment (you know, crypto?)
- Written and spoken communication skills in English for professional environment

Responsibilities

- Determine and develop test strategies for a wide range of testing issues and drive to completion.
- Proactively create and execute test cases, triage bugs, and report testing status to project teams.
- Ensuring the successful deployment of products into the market
- Help troubleshoot issues found within the products.
- Prioritize test coverage, identify risk, and communicate recommendations and updates to stakeholders.
- Constantly improve yourself by keeping up to date with the latest technologies trends

Benefits

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- Paid days off
