

BACKEND DEVELOPER - GO language

Full time remote position

We are looking for a software developer with proven GO programming language experience. You will be joining a fast moving company, highly technical team that has deep knowledge of DeFi and all the cool things from the blockchain ecosystem. You will join a talented team working with cutting-edge.

Requirements & skills

- Experience writing Golang with a good understanding of best practices, its concurrency primitives, go/* packages, and reflection
- Professional experience with Cosmos SDK.
- A deep understanding of EVMs
- A deep understanding of building performant, scalable microservices
- Strong computer science fundamentals including network, storage, OS, data structures, transpilers/compilers, etc.
- Self-motivated and able to be trusted with a high level of autonomy
- Excellent communication skills as our entire team is remote

Nice to have

- Bachelors in Computer Science, Engineering, Mathematics, Statistics or equivalent work experience
- Experience in creating microservices, working with tools like Kubernetes, Ansible, Docker, Terraform.
- Interest in topics such as proof-of-stake, consensus algorithms, cryptography, etc.
- Contribution to open-source projects

Responsibilities

- Write high quality and well tested Golang code, following the latest design and development patterns.
- Explore Cosmos SDK projects and other projects that will be built on the cosmos
- Write documentation, design flow diagrams and review PRs
- Research, design, scope and estimate what you need to do
- Constantly improve yourself by keeping up to date with the latest technologies trends

Benefits:

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- 15 Paid days off
