

## **DevOps Engineer**

### ***Full time remote position***

*We are looking for a person with the ability to deploy, maintain and monitor services, databases, or API endpoints, while prioritizing the ease of deployment, lowering the costs, and horizontal scalability.*

### **About Composable Finance**

Our team at Composable Finance is on a mission to build a fully interoperable future capable of offering developers and end-users alike seamless user experience and utility.

Our vision of hyper liquidity and composability abstract the underlying technology into a single interface, unlocking the potential for new primitives to be developed at an unprecedented pace. We believe that creativity, communication, and community will be reimaged and reconciled for a more inclusive and composable future. Be a part of it...

### **Responsibilities**

- Design, deploy, maintain and monitor infrastructure for (blockchain) data processing systems with API endpoints built on top.
- Assure the security of each infrastructure component.
- Design, deploy, maintain and monitor different types of non-traditional projects (such as deploying blockchain nodes).
- Detect and fix issues with the infrastructure and detect (monitor) the issues with the backend implementation.
- Create documentation for the deployed infrastructure on the design, deployment, and monitoring.

### **Required knowledge and skills**

- Experience with AWS Services such as EC2, DynamoDB, API Gateway, Lambdas, VPC (security groups, subnets, etc).
- Experience with containerization.
- Experience implementing and maintaining CI/CD pipelines.
- General knowledge of the infrastructure of Ethereum blockchain.
- Skills to identify issues with backend infrastructure or code (monitoring, logging).
- Advanced English Proficiency

**Nice to have:**

- Experience with AWS CloudWatch, AWS Elastic Beanstalk.
- Experience deploying infrastructure for parachains (Polkadot/Substrate).
- Experience deploying Ethereum blockchain nodes
- Experience deploying backend infrastructures for DeFi projects to process, store and retrieve Ethereum blockchain data.

**Benefits**

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- Paid days off
- Crypto payment
