

Digital Empowerment for Migrant Women

RIDE package helps migrant women into digital jobs

The RIDE – Reach Inclusion through Digital Empowerment for Migrant Women – project, funded by the EU’s AMIF programme, has developed and piloted an support package to help migrant women find jobs in information technology. It comprises three elements: skills training in IT, mentoring to build confidence and social inclusion, and job fairs to bring trainees into contact with potential employers. Its key guidance documents are available online.

Three key components of the package

RIDE’s work integration package for migrant women comprised three main components: **training** in IT skills, **mentoring** and coaching to ensure social inclusion, and a **job fair** at which trainees could meet employers informally. Different RIDE partners explained them in turn.

Guidance available online

The key documents describing the RIDE inclusion package are available for download on the project website. The partners invite you to use and adapt them!

- A [preliminary study](#) on the labour market situation of migrants in the six project countries
- [Guidelines](#) on designing an IT training project for migrant women
- [Guidelines](#) on mentoring and training – detailed guidance on 13 modules of 3-4 hours on intercultural and social inclusion, labour market integration and human rights¹

Migrant women should look at the [crowdmap](#) of initiatives which offering migrant women IT skills opportunities throughout the EU. At the end of the project it included 100 initiatives in 23 countries.

Further detail can be found in the article on the RIDE final conference.
