

## \$PINKPANDA TOKEN BUYING GUIDE

## BUYING GUIDE PURPOSE

**Buying, trading, and selling cryptocurrency can be complicated, especially crypto not listed on a centralized exchange (i.e., Coinbase), and in this case, crypto that is primarily available through a "swap" such as PancakeSwap.**

**Unfortunately, \$PINKPANDA falls into this complicated category. This complication will eventually be alleviated using the **Pink Panda wallet (under development).****

**In the meantime, here is a guide providing step-by-step written instructions to help anyone navigate the complicated cryptocurrency landscape and follow the easiest path to purchase the \$PINKPANDA token!**

# 1

## First, you need a **wallet** to store your cryptocurrency

Your wallet is where any purchased tokens will reside, as well as support transfers or sales of tokens. While Pink Panda will support wallet functionality shortly, we suggest **Trust Wallet** in the meantime.

**Note:** There are various other options for cryptocurrency wallets (i.e., [MetaMask](#)) that can be used as well!

### STEPS TO DOWNLOAD/SET UP TRUST WALLET

1. Navigate to the [Trust Wallet Website](#) or find the app in all App stores.
2. Download the Trust Wallet App to your phone (Diagram 1).
3. Once the App is downloaded, select the 'Create a new wallet' option and follow the prompts.
4. As part of the set-up process, Trust Wallet will provide you a list of 12 words in a specific order. This is your 'recovery phrase' – save this somewhere safe! **Important Note:** This phrase is the key to your wallet, and there are people out there looking to scam you for this phrase (to steal your crypto). **NEVER SHARE THIS PHRASE WITH ANYONE**, even if you believe they have your best interest in mind – you will lose your crypto.

Trust Wallet

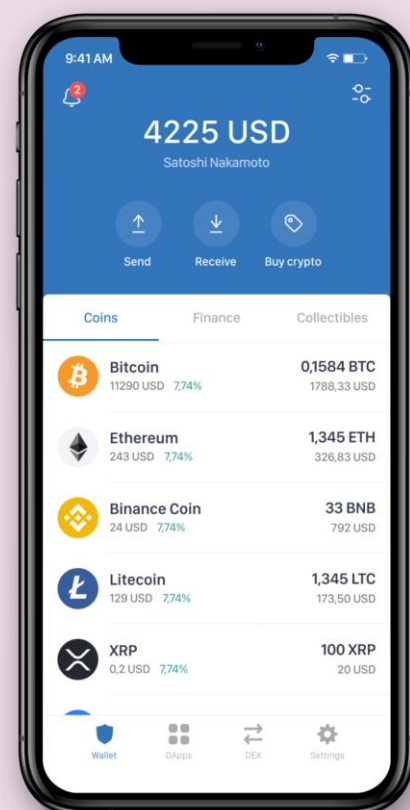

Diagram 1

**You now have your very own cryptocurrency wallet! The next step is buying some coin!**

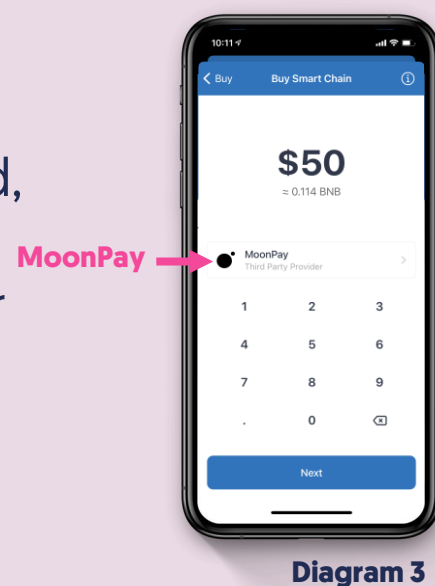

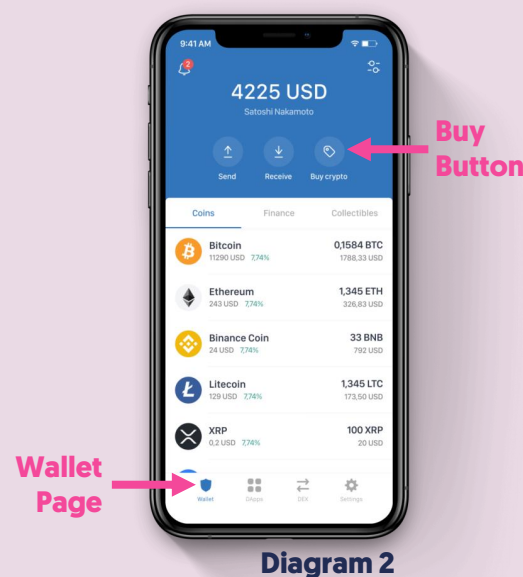

# 2

## Next, you will want to **purchase some coins**

Since \$PINKPANDA is a relatively new token, it is not directly available for purchase at this moment. Instead, you will need to purchase a more mainstream coin and “swap” it for \$PINKPANDA. To do that, you will purchase the **Binance (BNB) token** directly through Trust Wallet.

### STEPS TO BUY THE BNB TOKEN THROUGH TRUST WALLET

1. Within your Trust Wallet App, navigate to the ‘Wallet’ page (Diagram 2) and click the ‘Buy’ button.
2. Select the ‘**Smart Chain**’ token (this is the easiest token to exchange for \$PINKPANDA).
3. Enter the amount you wish to purchase (Trust Wallet has a \$50 minimum) and select a provider to purchase from (MoonPay or Simplex – both are reputable but can vary in price) (Diagram 3).
4. For the purpose of this guide, we use **MoonPay**. Once selected and your amount has been entered, hit ‘Next’. This will redirect you to MoonPay’s website. Follow the prompts on this site to register (includes phone number, email address, a picture of your driver's license, and a selfie). You will then be verified by MoonPay (takes a few minutes). Once verified, you are able to use a debit card to purchase BNB!

**Current Challenges:** Some banks may not allow debit card purchases of cryptocurrency (or limit the amount). If you run into this challenge – try calling your bank. If that fails, we recommend going to [Binance.us](https://binance.us), creating an account, and connecting to your bank account via ACH (Binance uses a third-party reputable clearing house) for larger amounts. For smaller amounts, use Crypto.com.

# 3

## Now it's time to prepare Trust Wallet for **\$PINKPANDA** tokens

Now that you have your BNB tokens, you can swap them for \$PINKPANDA. To do this, you can use an application called [PancakeSwap](#). However, before you navigate to that application, you need to prepare Trust Wallet for incoming \$PINKPANDA tokens.

### STEPS TO PREPARE TRUST WALLET FOR \$PINKPANDA

1. Within your Trust Wallet App, navigate to the 'Wallet' page (Diagram 4) and click 'Manage' button (top right, looks like sliders).
2. Within the 'Manage' page, search for PinkPanda. Once found, activate the token by turning the switch to the right (green) (Diagram 5).

Diagram 4

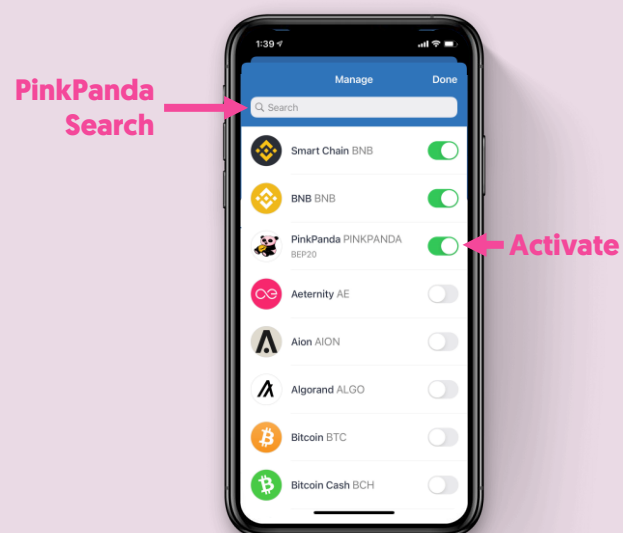

Diagram 5

**This step is crucial as Trust Wallet will not display any \$PINKPANDA tokens without activation in the mobile App.**

# 4

## Once Trust Wallet is configured, you need to connect to **PancakeSwap**

You can now leverage [PancakeSwap](https://pancakeswap.finance) to swap your purchased Smart Chain BNB tokens for \$PINKPANDA. This process will basically trade the USD value of BNB for the USD value of \$PINKPANDA. To accomplish this, you need to connect PancakeSwap to Trust Wallet.

### STEPS TO CONNECT PANCAKESWAP TO TRUST WALLET

1. Open a web browser on your mobile device and navigate to <https://pancakeswap.finance/swap>.
2. Once open, you need to connect our Trust Wallet to this application by selecting 'Connect Wallet' at the top right of the screen (don't worry, this doesn't expose your wallet or provide any data to PancakeSwap – this merely allows the application to swap tokens for the user) (Diagram 6).
3. Once the Connect Wallet screen is open, **select the 'WalletConnect' option** (do not select 'Trust Wallet'). This will prompt you to select your preferred wallet – select 'Trust'. (Diagram 7). This will redirect you to the Trust App and automatically connect your wallet to the Pancake Swap application (after selecting 'Connect').
4. After selecting 'Connect', navigate back to the browser with PancakeSwap open. You should now see that your wallet is connected.

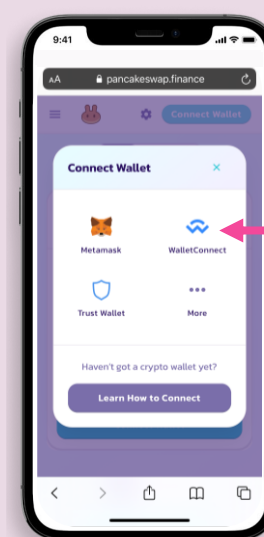

Diagram 7

# 5

## Finally, it's time to swap Smart Chain BNB for **\$PINKPANDA** tokens

Finally, you will need to do some final [PancakeSwap](#) configuration to swap your purchased Smart Chain BNB tokens for \$PINKPANDA. These steps are simple, quick, and crucial to the \$PINKPANDA buying process.

### STEPS TO SWAP SMART CHAIN BNB FOR \$PINKPANDA

1. Starting with our web browser open to PancakeSwap, you must configure the PancakeSwap application to adequately swap BNB for \$PINKPANDA. To do this, you will navigate to the 'Exchange' page and click the settings button (small gear in top right of the home screen). Here, you will adjust the transaction speed to 'Instant' and adjust the 'Slippage Tolerance' to 11.5% (Diagram 8).

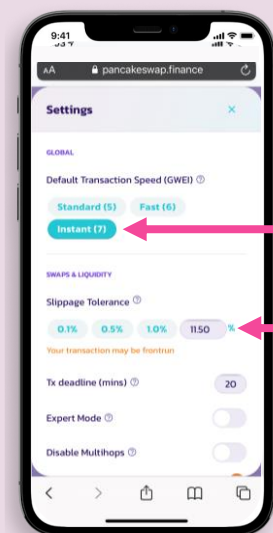

Diagram 8

2. Once PancakeSwap is configured, you need to find the \$PINKPANDA token in the 'To' portion of the exchange window. To do this, you must select 'Select a currency', and paste in the BSC [Contract Address for PinkPanda](#) (0x631e1e455019c359b939fe214edc761d36bf6ad6). Finally, select 'Import' and follow the prompts to import the token (Diagram 9).

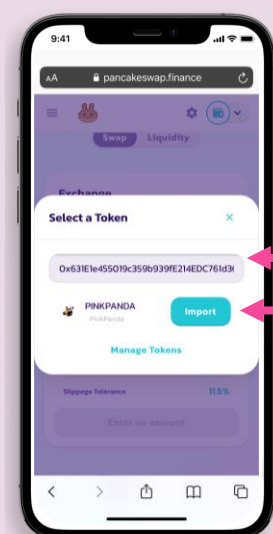

Diagram 9

3. You are now ready to swap your BNB for \$PINKPANDA. Choose your amount and select the 'Swap' button. Wait a few minutes, and Trust Wallet should provide you a confirmation of the Swap. **Congratulations, you own \$PINKPANDA!**

# 6

## Time to keep an eye on your investment with the **Pink Panda App**

Now that you are an owner of \$PINKPANDA, you will want to keep track of its current price as well updates to the Pink Panda application (i.e., wallet functionality, DEX capabilities, charitable contributions)

### STEPS TO DOWNLOAD THE PINK PANDA APP AND CONNECT IT TO YOUR TRUST WALLET

1. Navigate to the [Pink Panda website](#) to find App download links for the Apple App store as well as the Google Play store (or search 'Pink Panda Defi'). Download the application (for this guide, we will show the Apple version of the App).
2. Once the Pink Panda App is downloaded, open the App. You will be prompted with a screen to enter your 'BSC address'. This is the address to your Trust Wallet (again, you don't give any permissions or provide any data by providing this address, it only connects the app to your wallet to show your current \$PINKPANDA holdings) [Diagram 10].
3. To find this address, you will need to open Trust Wallet, select the \$PINKPANDA coin, and select the 'Copy' button [Diagram 11]. You will then paste that address into the Pink Panda App.
4. You are now able to view your \$PINKPANDA holdings within the Pink Panda App!
