

PainScript Achieves Early Patient Enrollment Milestone

Over 1,200 patients enrolled in the first quarter of commercial outreach

New York, NY – March 17, 2022 – PainScript, Inc., a telehealth and compliance technologies (TACT) company offering a flexible personalized digital telehealth platform for chronic care management, and a subsidiary of Optimus Healthcare Services, Inc. (“Optimus”) (OTC: OHCS), announced today that the first quarter (1Q 2022) of commercial patient enrollment has already exceeded 1,200 patients among the initial healthcare practices utilizing PainScript’s Pain Management and Substance Use Disorder (“SUD”) platform. All these patients were enrolled in 60-90 day “kick starter” programs, with the goal of converting the “kick starter” programs into traditional enterprise usage relationships.

“The initial launch of PainScript’s TACT platform, designed to improve health outcomes for pain and SUD patients requiring on-going care plan management, has exceeded our expectations,” said Dan Cohen, CEO of PainScript and President of Optimus. “With physician practices located from Texas through New York, more than 1,200 patients have already been enrolled and are sending daily clinical data to their physicians for evaluation and management of their health condition.”

Mr. Cohen continued: “Just as important, our TACT platform has performed as expected for user experience and acceptance, and the rollout has been smooth due to the reliability and performance of our TACT platform. As a consequence of being recently named the “Best Chronic Care Management Platform” by GHP Magazine, we were able to augment our internal sales team by recruiting an external affiliate sales force which has led to our robust sales funnel”.

“We invested in and have faith in the PainScript TACT platform because it is an easy-to-use mobile app which connects physicians with their patients in an individualized manner and is designed to improve medication compliance and care plan adherence,” said Marc Wiener, Chief Executive Officer of Optimus. “Validated through nine peer-reviewed and published trials, PainScript is the lead entity in our TACT portfolio. As we make plans to expand our TACT offerings, I look forward to both PainScript’s continued progression and the near-term launch of a bariatric vertical.”

About PainScript, Inc.

PainScript, a subsidiary of Optimus Healthcare Services, Inc. (OTC: OHCS), is a telehealth and compliance technologies (TACT) company offering a personalized, flexible telehealth platform for physicians and their patients who require improved care plan management and medication adherence within different chronic care conditions.
