

# STAFF AUGMENTATION SERVICES

## On-demand skilled IT resources

Collotech practices customer centric staff augmentation approach, to stay abeam with technology disruptions, changing customer preferences and fundamental shifts in business landscape. We help you evolve and mobilize technology expertise to scale your business.

### Features

- Flexible solutions that enable utilization of skilled technical resources on a monthly or annual basis.
- Simple engagement for easy access to on-broad range of technical skills in AI, ML, Data Science and related technology expertise.
- Cost-effective ways to supplement your existing IT staff.
- Efficient reporting to provide clarity on resource usage and enable forecast of IT infrastructure support costs.

### Enabling your business with required skills

To attain a lead in competitive and an everchanging market, you need to focus on core competencies while maintaining a dependable IT environment. Managing IT processes includes managing infrastructure and tools across platforms and organization which is a complex task.

Most challenging jobs that emerge when looking for right skills are sourcing and maintaining. Whether your business is embarking on new projects or focusing on strategic business initiatives, having the capability and easy access the right skills, when and where required, is imperative.

### In time Support

Our staff augmentation services provide you with a privilege to not actually commit, but pre-define budgets on ad hoc resources scaling for enhancements you plan on. We take the load and let you focus on business.

Collotech's Staff Augmentation Service is a in time staffing service that allows access to a hub of specialised AI and Data Science skills, as you need them.

### Collotech Edge

Our vast pool of skilled resources can be called upon when required, allowing your team to focus on strategic high value tasks. With a myriad of skills across AI and Data science technologies, you are assured that the right resources will be engaged to achieve desired goals of your projects.

COLIOTECH becomes your 'extended technology team' and eases the pressure on you to maintain good technical inhouse staff.

### Service Options

Collotech's Staff Augmentation Services offers a range of IT Roles in the areas related to Artificial Intelligence, Machine Learning and Intelligent Process Automation.

One phone call or an e-mail is all it takes to start.

## Complete control over your resourcing budgets

A pre-defined job role catalogue and price charts are provided at the onset of Collotech’s Staff Augmentation Service enablement, allowing you to forecast and control your project’s budget.

Once the engagement starts, we will send you a monthly activity report highlighting detailed resource usage to help you track and efficiently control your overall project costs. The contracts could be drawn annually to ensure most efficient outputs and results.
