UX Design Projects

Keeping it consistent: Design Tokens

[Read the Case Study](#)

Design Tokens help bridge the gap between Devs and Designers, but how do we get them running?

From the ground up

[Check it out here](#)

The first of many parts in my series about creating and learning design systems. Follow along as I explore the design, technology, and operations that come with creating a design system.

Experience

mPwr, UX Designer

Dec 2020

Worked with a 3-person design team and was responsible for creation and maintenance of the mPwr design system which has helped speed up and optimize design and prototyping.

Provided insights from research to founders, giving recommendations on core flows and processes based on research.

Long Beach Printing, Printer

Feb 2019 - Mar 2020

Responsible for designing, printing, cutting and packing of print materials for several large recurring clients as well as one-time jobs

Operated and maintained printing press and other printing equipment.

Imperva, Sales Engineer

Jan 2017 - Jan 2019

Provided technical coverage for Inside Sales Team, handling anywhere from 7-14 accounts at a time each valued from \$30k-\$300k.

Worked with Product Team to execute on customer feedback to support future product releases.
