

## Every detail matters

CTS Consulting offers both strategy and design consultancy. We partner with you from early ideas through to final delivery and ongoing operations.

- **Intuitive, flexible, and easy-to-use** technology designs.
- **Technical project management** for effective installations.
- Electroacoustic engineering for **captivating listening environments**.

*CTS focus on strategic operational design and advice, including sustainability objectives, for a simplified user experience that meets the current and future needs of your business.*

# WHAT WE DO

## CONSULTANCY SERVICES

## AV SYSTEM DESIGN

## PROJECT MANAGEMENT

## ELECTROACOUSTICS

## CONSULTING AND DESIGN

CTS offers both strategy and design consultancy with a particular **focus on client-side representation** in complex technology projects. We are **your trusted partner** in navigating the constantly changing world of workplace, broadcast, and AV system technologies.

Our approach

- **Collaborative workshops** with your executive design team and technical stakeholders.
- Vendor agnostic, **solution focused advice**.
- Strategic technology roadmaps.
- Design, procurement, deployment, and **ongoing management optimisation**.

Our design philosophy ensures that the user-friendly technology provided is fit for purpose, scalable, and **seamlessly integrated into your built environment**.

### VENUES

Collaborations hubs

Broadcast and recording studios

Video conferencing meeting rooms

Council chambers

Multifunction spaces

Houses of worship

Lecture theatres

Sports stadiums

Entertainment facilities

Critical control centre

### SYSTEMS

LED video walls

Public address and background music

Sound systems

Digital Signage & IPTV

Room scheduling and desk booking

Lighting

Display solutions

Smart building control

Visitor management

## PROJECT MANAGEMENT AND INSTALLATION

CTS Consulting provides technical project management services across the enterprise, broadcast, and event sectors. Our team has experience across all manufacturers and **collaborate proactively with other trades to ensure project success.**

Our promise

- **Meet user expectations.**
- Commissioned according to industry standards.
- Detailed **proof of concept installation.**
- Comprehensive audit and commissioning reports.
- **Personalised end user training** for your organisation.

Post-installation, CTS can remotely **monitor systems to gather and share metrics** on utilisation, user satisfaction and reliability.

## ELECTROACOUSTICS

Electroacoustics is a **specialised branch of acoustic engineering** that combines design of sound systems and interior room acoustics.

By creating a 3D electroacoustic model, CTS can predict outcomes of audio performance in critical spaces and solve acoustic problems. This approach **enhances your audience's comfort, enjoyment, and content engagement** by:

- Improving **speech intelligibility**
- **Reducing listener fatigue**
- Measuring sound pressure levels
- Upgrading **uniformity and quality**
- Reducing audible reflections (echoes)

From video conferencing rooms to multifunction spaces where clear communication is essential, **every workplace environment benefits** from electroacoustic design.

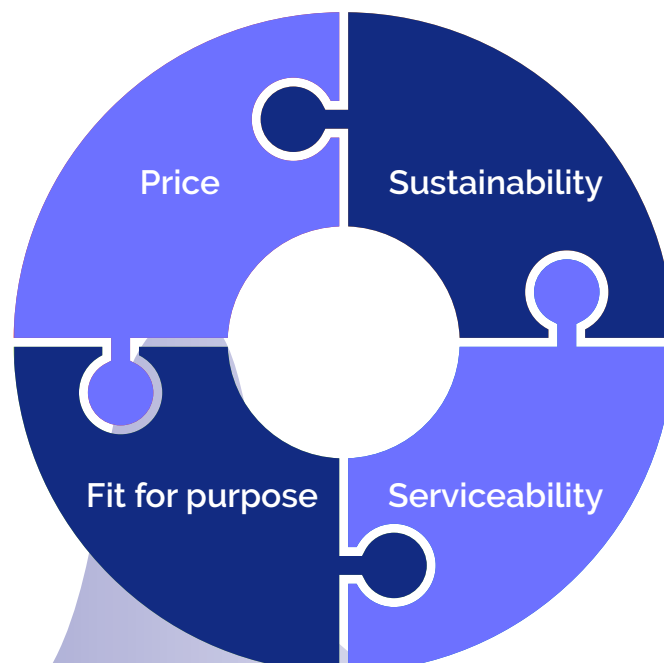

## SUSTAINABILITY

CTS utilise Triple Bottom Line principles (profit, people, and the planet) in our consulting and design work. **We consider economic, social, and environmental impacts in all of our designs** to ensure you meet the appropriate sustainability practices within your industry.

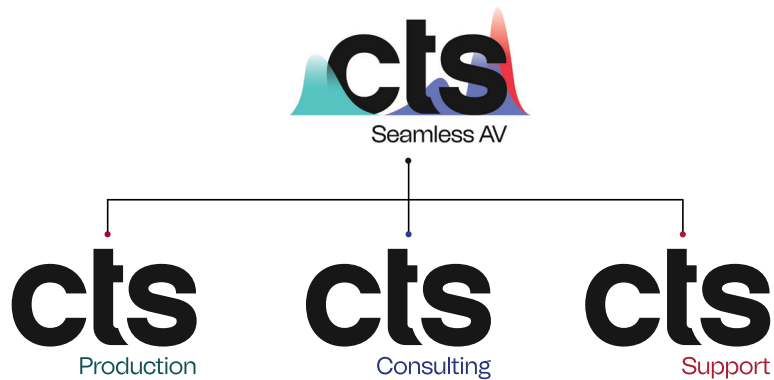

## EQUIPMENT SPECIFICATION PROCESS

CTS is product agnostic and **selects equipment based on merit**. Our equipment specification process ensures the most suitable product are incorporated into our strategic roadmaps and AV products.

## Contact Us

CTS provides end-to-end AV services, from consulting to production and ongoing support

**We offer solutions for a seamless world.**
