A big thanks to Paragon Capital for giving us a shoutout on LinkedIn, celebrating a monumental milestone!

We're excited to have Paragon as our investor and we are grateful for their support as Doxa prepares to face its next phase in our growth, focused on expansion of the built environment and servicing companies across more regions. Find out more on their LinkedIn [here](#).

We look forward to this partnership and to achieving remarkable things together!

ISO Certifications

We are delighted to announce that we have been awarded the ISO20000 and ISO27001 certifications!

These certifications are internationally recognised standards that ensures that we maintain an effective and strong information security system through our processes (ISO27001) as well as a demonstration of reliability and a high quality of service through a service management system as a service provider (ISO20000).

After a thorough and rigorous auditing process, Doxa became ISO certified on 1 March 2022 after the audit and assessment being successful and no major non-conformances identified.

Find out more [here](#) about the ISO Certifications and how it benefits you.

Feature Highlight: Integrated Bank Transfers

Doxa Connex features a direct Host-to-Host connection with many of the largest banks in Singapore (and Asia). It is provided out-of-the-box with your Doxa Connex account — for free — while ERP providers charge on a 'per bank' integration.

All you have to do is select multiple invoices (from the same vendor) and simply click "Create Payment Batch". After the approval flow is complete, the payment is automatically made, and a success receipt is sent back, marking your invoices as paid, even while you're asleep.

If your accounting software is integrated, it can simultaneously update those records as well!

Conduct all your financial transactions within one platform and leverage the power of automation with our Integrated Bank Transfer feature today.
