Customize with Analytics Plus

Zenoti Analytics Plus lets you see your business data exactly the way that you need to. Build custom dashboards that only your business has access to.

Create specialized dashboards for your CEO, accounting head, operations head and other stakeholders. Real-time data gives them the insights and answers they need to do their job better.

Go beyond the KPI

KPIs (key performance indicators) are an excellent start to understanding your business' trends and successes, but they don't give the whole picture.

With Analytics you're empowered to go beyond simply monitoring business performance, you have the tools to investigate and find why stellar or poor performance happened.

A robust set of features

Zenoti Analytics helps you keep tabs on the most important data for your business. With all of your important insights in one place, you'll have a better view of what's working and where you can improve.

Aggregate business data

Combine data from multiple locations to view a more complete look at performance across your franchise chain or corporate-owned network.

Tabular data and visualizations

Whether you want just the numbers or a visual view, we offer easy access to your data in the way most useful to you.

Pull from multiple data sources

Combine data captured in third party systems with data from Zenoti - all within Zenoti Analytics.

Email alerts

Be notified by email when requested events or problems arise.

Role-based permissions

Customize access for different employees and collaborators in both the dashboard and center level.

Mobile-friendly

View analytics data no matter where you are and at anytime using your smartphone.
