

FSC-Mini Brochure

Flecto Sense Concentrator (FSC) - Mini is a solution designed for companies and individuals to access meter readings without having to send someone to site. Saving you time and money and making life easier.

Included

5V power supply

FSC - Mini

Optional *

USB to 5.5mm plug.

Water Management System

Powered by Flecto Sense

- The concentrator facilitates AMR (Automatic Meter Reading) to read meters on fixed network, walk-by or drive-by modes.
- Immediate feedback to users on water usage, credit balances, excessive usage detection and leak detection.
- The system enables the user supported functions to be collected via the radio.
- Enable users to manage their water consumption and track usages.
- All communication is secure, only you have access to your user account and data.
- Facilitate revenue collection.
- The system caters for future expansion to full AMI (Advanced Metering Infrastructure), aimed at automating all facets of meter management.

Unique

The system is unique in the way the data is always encrypted. Your data will never be in the wrong hands. Know exactly what is happening on the ground while not having to spend time in the mud.

Target audience

Will this be the solution for you? Ask yourself how much time is spent on accurately getting the data for every unit you manage. Just the billing hours should justify having an FSC solution for your business.

Business in a box.

Without accurate data the reading doesn't mean much. The FSC will get you the results you need, every time. You can count on accurate readings, timely responses, data that you can use and report the way you want to.

Smart ideas

By partnering with a technology company that is on the bleeding edge, you position yourself to always be a trend setting firm. This is what Flecto Sense does daily for hundreds of customers. Join us today.

Location

The FSC - Mini should be placed central to all your meters. This product requires power from a wall outlet. This product can be used with a USB powerbank for mobility*.

*Refer to optional extras.

Make more profit.

Imagine having a system that gives you early warning of a leak, in the old days you would only notice the leak when the water bill gets higher. Our system saves you money by notifying you of a problem when it occurs.
