Water Management System

Powered by Flecto Sense

- The MC21 measure and displays meter data and hosts an incredible amount of early warnings.
- The MC21 enables the user supported functions to be collected via the radio.
- All communication is secure, only you have access to your user account and data.
- The MC21 can be incorporated into full AMI (Advanced Metering Infrastructure), aimed at automating all facets of meter management.
- Notifies users of water usage, excessive usage detection, leak detection, dry detection, reverse flow and tamper warnings.
- Enable users to manage their water consumption and track usages.
- Powered by a lithium battery with up to 16 years' lifetime.
- With no moving parts inside the meter, no wear can be experienced, giving you best in class accuracy, all the time.

Unique

The system is unique in the way the data is always encrypted. Your data will never be in the wrong hands. Know exactly what is happening on the ground while not having to spend time in the mud.

Target audience

Will this be the solution for you? Ask yourself how easy it is to know your water consumption. How do you know if you have a leak? The MC21 makes it possible for you to know exactly what the water in your pipes are doing.

Business in a box.

You can count on accurate readings, timely responses and data that makes sense. You will receive warnings when a leak is detected and when you have used excessive amounts of water i.e. a burst pipe. Warnings will also be displayed when your meter is dry, water flowing in reverse and if an attempt was made to tamper with your meter.

Smart ideas

By partnering with a technology company that is on the bleeding edge, you position yourself to always be a trend setting firm. This is what Flecto Sense does daily for thousands of customers. Join us today.

Location

The MC21 should be installed behind the municipal meter and on the same pipe. This product is self powered and doesn't require power from a wall outlet.

Saving you money.

Imagine having a system that gives you early warning of a leak, in the old days you would only notice the leak when the water bill gets higher. Our system saves you money by notifying you of a problem when it occurs.
